It is also designed to help professionals enhance their career prospects and increase their earning potential.

## EC-COUNCIL EC-Council Certified CISO (CCISO) Sample Questions (Q61-Q66):

**NEW QUESTION # 61**
Which of the following functions evaluates patches used to close software vulnerabilities of new systems to assure compliance with policy when implementing an information security program?

- A. Risk assessment
- B. System testing
- C. Incident response
- D. Planning

**Answer: B**

Explanation:
Role of System Testing:System testing evaluates patches and updates to ensure they address vulnerabilities effectively and comply with organizational policies before deployment in live environments.
Key Actions:
* Verifies the functionality of patches and updates.
* Confirms that updates align with compliance requirements and do not introduce new vulnerabilities.
Why Not Other Options:
* Risk Assessment (B): Identifies risks but does not focus on testing patches.
* Incident Response (C): Manages incidents, not preventive patch evaluation.
* Planning (D): Focuses on strategic alignment rather than patch validation.
EC-Council Alignment:System testing is critical to maintaining the integrity and compliance of systems, ensuring vulnerabilities are properly addressed.

# NEW QUESTION # 62
Who in the organization determines access to information?

- A. Information security officer
- B. Compliance officer
- C. Data Owner
- D. Legal department

**Answer: C**

Explanation:
Role of the Data Owner:
According to EC-Council principles, the data owner is the individual responsible for the classification, control, and protection of specific data sets. They have the authority to determine who has access to information based on business needs and compliance requirements.
Other Roles:
* Legal Department (A): Provides guidance on regulatory and legal compliance but does not directly manage access.
* Compliance Officer (B): Ensures adherence to policies but does not own the data.
* Information Security Officer (D): Implements security measures but does not decide access permissions.
Why Data Ownership Is Crucial:
EC-Council emphasizes that access to information must be controlled by the data owner to ensure accountability and alignment with the organization's security policies.
References:
The role of the data owner in determining access controls is consistent with EC-Council's CISO standards for data governance and access management.

# NEW QUESTION # 63
Which of the following BEST describes revenue?

- A. Non-operating financial liabilities minus expenses
- B. The sum value of all assets and cash flow into the business
- C. The economic benefit derived by operating a business
- D. The future profit-making potential of an organization

**Answer: C**

Explanation:
Comprehensive and Detailed Explanation (250-350 words) From Exact Extract from Chief Information Security Officer (CCISO) Documents:

The EC-Council CCISO Body of Knowledge defines revenue as the economic benefit generated from normal business operations, typically through the sale of goods or services. CCISO finance and strategy modules emphasize that revenue represents income earned before expenses, taxes, and liabilities are deducted.

Option A correctly reflects this definition. Option B incorrectly combines assets and cash flow, which are balance-sheet concepts rather than revenue. Option C describes a financial calculation unrelated to revenue, while option D refers to organizational valuation or goodwill, not revenue.

CCISO materials stress that CISOs must understand revenue because security decisions can directly impact revenue generation through system availability, customer trust, and regulatory compliance. Therefore, understanding revenue as operational income is essential for business-aligned security leadership.

## NEW QUESTION # 64

As a new CISO at a large healthcare company you are told that everyone has to badge in to get in the building.

Below your office window you notice a door that is normally propped open during the day for groups of people to take breaks outside. Upon looking closer you see there is no badge reader.

What should you do?

- A. Have a risk assessment performed
- B. Close and chain the door shut and send a company-wide memo banning the practice
- C. Nothing, this falls outside your area of influence
- D. Post a guard at the door to maintain physical security

**Answer: A**

Explanation:
Explanation

## NEW QUESTION # 65

An organization has defined a set of standard security controls. This organization has also defined the circumstances and conditions in which they must be applied. What is the NEXT logical step in applying the controls in the organization?

- A. Perform an asset classification
- B. Analyze existing controls on systems
- C. Create an architecture gap analysis
- D. Determine the risk tolerance

**Answer: A**
