NEW QUESTION # 101

On which search engines/web sites is the Safe Search feature supported in Harmony Endpoint?

- A. Google and Bing if the Harmony Endpoint Management is On-Premises deployment
- B. Google, Yahoo!, and OneSearch
- C. Google, Bing, Yahoo! by default, and extra support for Baidu, Yandex, Lycos, and Excite if the Harmony Endpoint Management is deployed in Cloud
- D. Google, Bing, and Yahoo!

Answer: D

Explanation:

The Safe Search feature in Harmony Endpoint is intended to protect users by filtering out malicious or inappropriate content from

search engine results. While specific documentation on supported search engines is not detailed here, it is standard for endpoint security solutions like Harmony Endpoint to support the most widely used search engines by default. These typically include Google, Bing, and Yahoo!, as they are the most common platforms where Safe Search functionality is applied.

Option A suggests additional support for Baidu, Yandex, Lycos, and Excite in cloud deployments, but there is no evidence to confirm these are supported, especially since Lycos and Excite are less prominent today.

Option C limits support to Google and Bing for on-premises deployments, but there's no indication that Safe Search functionality varies by deployment type. Option D includes OneSearch, which is less common and not typically associated with Harmony Endpoint's Safe Search feature. Thus, the most accurate and likely answer is B. Google, Bing, and Yahoo!.
