## Latest Palo Alto Networks XSIAM-Analyst Version & XSIAM-Analyst Relevant Questions

Our XSIAM-Analyst study guide provides free trial services, so that you can gain some information about our study contents, topics and how to make full use of the software before purchasing. It's a good way for you to choose what kind of XSIAM-Analyst test prep is suitable and make the right choice to avoid unnecessary waste. Besides, if you have any trouble in the purchasing XSIAM-Analyst practice torrent or trail process, you can contact us immediately and we will provide professional experts to help you online on the XSIAM-Analyst learning materials.

### Palo Alto Networks XSIAM Analyst Sample Questions (Q26-Q31):

#### NEW QUESTION # 26

Based on the artifact details in the image below, what can an analyst infer from the hexagon-shaped object with the exclamation mark (!) at the center?

- A. The malicious artifact was injected.
- B. The malware requires further analysis.
- C. The WildFire verdict returned is "Low Confidence."
- D. The artifact verdict has changed from a previous state to "Malware."

Answer: D

Explanation:

In Cortex XSIAM, the hexagon with an exclamation mark denotes a verdict change. Seeing it next to the artifact means its status was updated-now classified as Malware.

### NEW QUESTION # 27

A Cortex XSIAM analyst in a SOC is reviewing an incident involving a workstation showing signs of a potential breach. The incident includes an alert from Cortex XDR Analytics Alert source:

"Remote service command execution from an uncommon source." As part of the incident handling process, the analyst must apply response actions to contain the threat effectively.

Which initial Cortex XDR agent response action should be taken to reduce attacker mobility on the network?

- A. Remove Malicious File: Delete the malicious file detected.
- **B. Isolate Endpoint: Prevent the endpoint from communicating with the network.**
- C. Terminate Process: Stop the suspicious processes identified.
- D. Block IP Address: Prevent future connections to the IP from the workstation.

**Answer: B**

Explanation:

Network isolation immediately cuts the compromised workstation off from lateral movement and command-and-control, containing the threat while you continue triage and remediation.

### NEW QUESTION # 28

Which two statements apply to IOC rules? (Choose two)

- **A. They can be used to detect a specific registry key.**
- B. They can be excluded using suppression rules but not alert exclusions.
- C. They can have an expiration date of up to 180 days.
- **D. They can be uploaded using REST API.**

**Answer: A,D**

Explanation:

Correct answers are A and D.

\* Option A (Correct): IOC rules within Cortex XSIAM can detect specific indicators such as files, registry keys, IP addresses, hashes, and URLs.

\* Option D (Correct): IOC rules can indeed be uploaded or updated programmatically using REST APIs, enabling automation and bulk management.

Options B and C are incorrect due to the following reasons:

\* Expiration dates for IOC rules vary depending on system settings, and there is no strict 180-day limit explicitly defined in the provided documentation.

\* IOC rules are managed through general alert exclusion mechanisms as well as through suppression rules.

"IOC rules can detect specific files, hashes, registry keys, IP addresses, and URLs and can be managed programmatically via REST API." Document Reference:EDU-270c-10-lab-guide\_02.docx (1).pdf Exact Page:Page 33 (Alerting and Detection section)

### NEW QUESTION # 29

Match each prioritization mechanism with its function:

Mechanism

- A) Incident Scoring
- B) Alert Starring
- C) Featured Fields
- D) Incident Domains

Function

1. Assigns dynamic priority to incidents
2. Manually flagging alerts for importance
3. Provide context for faster investigation
4. Group alerts by threat or identity dimension

Response:

- A. A-1, B-2, C-3, D-4
- B. A-1, B-3, C-2, D-4
- C. A-4, B-2, C-3, D-1
- D. A-1, B-2, C-4, D-3

**Answer: A**

### NEW QUESTION # 30

You observe that a CVE is impacting multiple assets. How can you use ASM to investigate further?

(Choose two)

Response:

- A. Review asset tags and status
- B. Disable detection rules
- C. Validate attack surface rule hits
- D. Trigger a Cortex data purge

**Answer: A,C**

### NEW QUESTION # 31

.....

If you suffer from procrastination and cannot make full use of your sporadic time during your learning process, it is an ideal way to choose our XSIAM-Analyst training dumps.
