Salesforce Identity-and-Access-Management-Architect Reliable Test Question - Identity-and-Access-Management-Architect Valid Test Sample

During the prolonged review, many exam candidates feel wondering attention is hard to focus. But our Identity-and-Access-Management-Architect real exam is high efficient which can pass the Identity-and-Access-Management-Architect exam during a week. To prevent you from promiscuous state, we arranged our Identity-and-Access-Management-Architect Learning Materials with clear parts of knowledge. Besides, without prolonged reparation you can pass the Identity-and-Access-Management-Architect exam within a week long. Everyone's life course is irrevocable, so missing the opportunity of this time will be a pity.

Salesforce Certified Identity and Access Management Architect Sample Questions (Q179-Q184):

NEW QUESTION # 179

Universal Containers wants to allow its customers to log in to its Experience Cloud via a third-party authentication provider that supports only the OAuth protocol.

What should an identity architect do to fulfill this requirement?

- A. Configure OpenID Connect authentication provider.
- B. Use certificate-based authentication.
- C. Create a custom external authentication provider.
- D. Contact Salesforce Support and enable delegate single sign-on.

Answer: C

Explanation:

Explanation

If the third-party authentication provider supports only the OAuth protocol and not OpenID Connect, then an identity architect needs to create a custom external authentication provider for it. A custom external authentication provider is a configuration that allows users to log in to Salesforce using an external identity provider that is not predefined by Salesforce. It requires implementing the Auth.AuthProviderPlugin interface and defining the OAuth endpoints and parameters.

NEW QUESTION # 180

Universal Containers (UC) has implemented SAML-based SSO solution for use with their multi-org Salesforce implementation, utilizing one of the the orgs as the Identity Provider. One user is reporting that they can log in to the Identity Provider org but get a generic SAML error message when accessing the other orgs. Which two considerations should the architect review to troubleshoot the issue? Choose 2 answers

- A. The Federation ID must be populated on the user record.
- B. The Federation ID must be a valid Salesforce Username
- C. The Federation ID must is case sensitive
- D. The Federation ID must be in the form of an email address.

Answer: A,C

NEW QUESTION # 181

Universal containers (UC) wants to implement a partner community. As part of their implementation, UC would like to modify both the Forgot password and change password experience with custom branding for their partner community users. Which 2 actions should an architect recommend to UC? Choose 2 answers

- A. Build a custom visualforce page for the change password experience and a community builder page for the Forgot password experience.
- B. Build a custom visualforce page for both the change password and Forgot password experiences.
- C. Build a community builder page for both the change password and Forgot password experiences.
- D. Build a community builder page for the change password experience and Custom Visualforce page for the Forgot password experience.

Answer: A,B

Explanation:

The two actions that an architect should recommend to UC are to build a custom Visualforce page for both the change password and forgot password experiences and to build a custom Visualforce page for the change password experience and a community

builder page for the forgot password experience. A custom Visualforce page is a page that uses Visualforce markup and Apex code to create a custom user interface. A community builder page is a page that uses the Community Builder tool to create a custom user interface with drag-and-drop components. Both types of pages can be used to modify the look and feel of the password management features for partner community users. However, using a custom Visualforce page for both features requires more coding and customization, while using a community builder page for the forgot password feature allows more flexibility and configuration options.

NEW QUESTION # 182

Universal Containers (UC) uses a home-grown Employee portal for their employees to collaborate. UC decides to use Salesforce Ideas to allow employees to post Ideas from the Employee portal. When users click on some of the links in the Employee portal, the users should be redirected to Salesforce, authenticated, and presented with the relevant pages. What OAuth flow is best suited for this scenario?

- A. User-Agent flow
- B. Web Application flow
- **C. Web Server flow**
- D. SAML Bearer Assertion flow

Answer: C

NEW QUESTION # 183

Which two statements are capable of Identity Connect? Choose 2 answers

- A. Synchronization of Salesforce Permission Set Licence Assignments.
- B. Support multiple orgs connecting to multiple Active Directory servers.
- **C. Supports both Identity-Provider-Initiated and Service-Provider-Initiated SSO.**
- D. Automated user synchronization and de-activation.

Answer: C,D

Explanation:

Explanation

The two statements that are capabilities of Identity Connect are:

It supports both identity-provider-initiated and service-provider-initiated SSO. Identity Connect is a desktop application that integrates Salesforce with Microsoft Active Directory (AD) and enables single sign-on (SSO) between the two systems. Identity Connect supports both identity-provider-initiated SSO, which is when the user starts at the AD site and then is redirected to Salesforce with a SAML assertion, and service-provider-initiated SSO, which is when the user starts at the Salesforce site and then is redirected to AD for authentication.

It enables automated user synchronization and deactivation. Identity Connect allows administrators to synchronize user accounts and attributes between AD and Salesforce, either manually or on a scheduled basis. Identity Connect also allows administrators to deactivate user accounts in Salesforce when they are disabled or deleted in AD, which helps maintain security and compliance. The other options are not capabilities of Identity Connect. Identity Connect does not support synchronization of Salesforce permission set license assignments, as these are not related to AD attributes. Identity Connect does not support multiple orgs connecting to multiple AD servers, as it can only connect one Salesforce org to one AD domain at a time.
