1z0-1057-25 free study torrent & 1z0-1057-25 latest training dumps & 1z0-1057-25 test practice vce

Our world is in the state of constant change and evolving. If you want to keep pace of the time and continually transform and challenge yourself you must attend one kind of 1z0-1057-25 certificate test to improve your practical ability and increase the quantity of your knowledge. Buying our 1z0-1057-25 Study Materials can help you pass the test smoothly. Our 1z0-1057-25 study materials have gone through strict analysis and verification by senior experts and are ready to supplement new resources at any time.

Oracle Project Management Cloud 2025 Implementation Professional Sample Questions (Q126-Q131):

NEW QUESTION # 126

Identify three purposes for which the project resource search index is used. (Choose three.)

- A. Display resource details
- B. Filter counts while you search for resources
- C. Calculate Resources Availability Scores
- D. Calculate Resource Qualification Scores
- E. Provide absence details for resources

Answer: A,B,D

Explanation:

The project resource search index is used to store and retrieve information about project resources such as their availability, qualifications, preferences, etc. The project resource search index is used for three purposes:

* Display resource details: The project resource search index provides the resource details such as name, email, job title, organization, etc. that are displayed on the resource search page.

* Filter counts while you search for resources: The project resource search index provides the filter counts that show how many resources match each filter criterion on the resource search page.

* Calculate Resource Qualification Scores: The project resource search index provides the qualification information such as skills, certifications, languages, etc. that are used to calculate the Resource Qualification Scores for each resource based on their match with the resource request. The project resource search index does not provide absence details for resources or calculate Resource Availability Scores. These are provided by other components such as Oracle Fusion Absence Management and Oracle Fusion Human Capital Management. Reference: <https://docs.oracle.com/en/cloud/saas/project-portfolio-management/20c/oapfm/manage-project-resources.html#OAPFM2356181>

NEW QUESTION # 127

While creating a new project template, you notice that a default Asset Cost Allocation method is being automatically associated. Identify the source setup from which the default value is being inherited. (Choose the best answer.)

- A. project type
- B. project classification
- C. project unit
- D. project organization

Answer: A

Explanation:

Ref: <https://docs.oracle.com/en/cloud/saas/project-portfolio-management/19b/oapjf/define-project.htm#OAPJF220111>

Asset Cost Allocation Methods

The asset cost allocation method determines how indirect or common costs incurred on a project are allocated to multiple assets.

You can specify an asset cost allocation method to enable Oracle Fusion Project Costing to automatically allocate unassigned asset lines and common costs across multiple assets. Unassigned asset lines typically occur when more than one asset is assigned to an asset grouping level.

Projects and project templates inherit a default asset cost allocation method from the associated project type.

You can override the default at the project level. If you use capital events to allocate costs, then you can also override the asset cost allocation method at the event level Asset Cost Allocation Methods The following table describes the available asset cost allocation methods.

Method

Basis of Cost Allocation

Actual Units

Number of units defined for each asset

Current Cost

Construction-in-process (CIP) cost of each asset

Estimated Cost

Estimated cost of each asset

Standard Unit Cost

Combination of the standard unit cost and the number of units defined for each asset Spread Evenly Equal allocation of cost to each asset

NEW QUESTION # 128

You have closed the project accounting period with a warning, but you are unable to close the accounting period due to an error. Identify two reasons for this problem. (Choose two.)

- A. Pending burden summarization items have not been processed.
- B. Unaccounted transactions are not imported.
- C. The corresponding Oracle Payables Cloud accounting period has not been closed.
- D. Transactions entered in an integrated Oracle Cloud Application are accounted, but not yet transferred and imported into Oracle Project Portfolio Management Cloud.
- E. Unaccounted transactions have not been swept to the next period.

Answer: D,E

Explanation:

Ref: <https://docs.oracle.com/en/cloud/saas/project-portfolio-management/19a/oapjb/record-accounting-for-project>

NEW QUESTION # 129

You have defined two expenditure types but they are not available for selection when you enter an expenditure batch. What is the reason for this problem?

- A. The two expenditure types are not assigned to the reference data set that is assigned to the project- owning organization in which the transaction is performed.
- B. The two expenditure types are not assigned to the reference data set that is assigned to the project expenditure organization in which the transaction is performed.
- C. The two expenditure types are not assigned to the reference data set that is assigned to the project unit in which the transaction is performed.
- D. The two expenditure types are not assigned to the reference data set that is assigned to the business unit in which the transaction is performed.

Answer: C

Explanation:

The reason for this problem is that the two expenditure types are not assigned to the reference data set that is assigned to the project unit in which the transaction is performed. Expenditure types are a type of reference data that can be shared across different business units or organizations using reference data sets. To make an expenditure type available for selection when you enter an expenditure batch, you need to assign it to the reference data set that is assigned to the project unit of the transaction. The project unit determines the reference data set for expenditure types. The reference data sets that are assigned to the project expenditure organization, the business unit, or the project-owning organization do not determine the reference data set for expenditure types. These reference data sets may determine other types of reference data such as expenditure categories, expenditure item dates, etc. Reference:

NEW QUESTION # 130

Your company uses an accounting calendar with periods that are identical to calendar months. A contract resource has been identified to work for six months on an accounting close cycle project. The resource is planned to start with 10 days left in the first period and to end 20 days into the last period. For the remaining periods, the resource must be loaded on all working days of the month. You are required to distribute the budget, forecast, and planning amounts across periods based on the task duration. Which predefined spread curve must be used to meet this requirement? (Choose the best answer.)

- A. Even
- B. S-Curve
- C. Daily Spread Basis
- D. Bell Curve
- E. Back Loaded

Answer: C

Explanation:

Ref: <https://docs.oracle.com/en/cloud/saas/project-portfolio-management/19a/oapfm/project-control-configuration-manage-spread-curves.html#OAPFM79760> Predefined Spread Curves Name Description Dist. Factors Even Linear distribution of financial or project plan values across periods.

10-10-10-10-10-10-10-10-10-10

Prorated Even

Linear distribution of financial or project plan values across periods, with an exception of the first period and last period in the financial plan. Financial or project plan values for the first period and last period are prorated based on the number of days in the period.

10-10-10-10-10-10-10-10-10-10

Back Loaded

Back-loaded distribution of financial or project plan values across periods. Assigned amounts increase over succeeding periods.

0-5-10-15-20-25-30-35-40-45

Front Loaded

Front-loaded distribution of financial or project plan values across periods. Assigned amounts decrease over succeeding periods.

45-40-35-30-25-20-15-10-5-0

S Curve

S-shaped distribution of financial or project plan values across periods.

18-10-8-10-15-17-18-17-15-8

Bell Curve

Bell-shaped distribution of financial or project plan values across periods. Assignment of plan values is highest in the middle periods.

0-4-10-12-14-12-10-4-0-0

Daily Spread Analysis

Spread is based upon the number of days in each financial period throughout the duration of the task assignment. Amounts are proportionally distributed throughout all periods for the duration of the task assignment None

NEW QUESTION # 131

.....

Once you have used our 1z0-1057-25 exam training in a network environment, you no longer need an internet connection the next time you use it, and you can choose to use 1z0-1057-25 exam training at your own right. Our 1z0-1057-25 Exam Training do not limit the equipment, do not worry about the network, this will reduce you many learning obstacles, as long as you want to use 1z0-1057-25 test guide, you can enter the learning state.

1z0-1057-25 Valid Vce: <https://www.easy4engine.com/1z0-1057-25-test-engine.html>
