Reliable Splunk SPLK-1004 Guide Files - New SPLK-1004 Exam Topics

Our test bank includes all the possible questions and answers which may appear in the real exam and the quintessence and summary of the exam papers in the past. We strive to use the simplest language to make the learners understand our SPLK-1004 study

materials and the most intuitive method to express the complicated and obscure concepts. For the learners to fully understand our SPLK-1004 Study Materials, we add the instances, simulation and diagrams to explain the contents which are very hard to understand. So after you use our SPLK-1004 study materials you will feel that our SPLK-1004 study materials' name matches with the reality.

Splunk Core Certified Advanced Power User Sample Questions (Q75-Q80):

NEW QUESTION # 75

Which of the following is true about Log Event alerts?

- A. They must be used with other alert actions.
- B. They cannot use tokens to reference event fields.
- C. They create new searchable events.
- D. They require at least Power User role.

Answer: C

Explanation:

Log Event alerts in Splunk are designed to create new events in the index when specific conditions are met.

These events are then searchable like any other event, allowing for further analysis and correlation.

This functionality is particularly useful for tracking occurrences of specific conditions over time or triggering additional workflows based on the logged events.

Reference: Splunk Documentation on Alert Actions

NEW QUESTION # 76

Why use the tstats command?

- A. To generate statistics on indexed fields.
- B. To generate an accelerated data model.
- C. As an alternative to the summary command.
- D. To generate statistics on search-time fields.

Answer: A

Explanation:

The tstats command is used to generate statistics on indexed fields, particularly from accelerated data models. It operates on indexed-time summaries, making it more efficient than using raw data.

NEW QUESTION # 77

What is used to separate multiple tokens when creating a drilldown in XML?

- A. A pipe character (|)
- B. An escaped double quote (\"')
- C. A comma (,)
- D. An escaped ampersand (&)

Answer: D

Explanation:

Comprehensive and Detailed Step by Step Explanation: In Splunk XML dashboards, multiple tokens must be separated using an escaped ampersand (&), which prevents syntax errors and ensures that tokens are correctly passed in drilldowns.

NEW QUESTION # 78

Repeating JSON data structures within one event will be extracted as what type of fields?

- A. Mvindex
- B. Multivalue
- C. Single value

- D. Lexicographical

Answer: B

Explanation:

When Splunk encounters repeating JSON data structures in an event, they are extracted as multivalue fields.

These allow multiple values to be stored under a single field, which is common with arrays in JSON data.

When Splunk extracts repeating JSON data structures within a single event, it represents them as multivalue fields. A multivalue field is a field that contains multiple values, which can be iterated over or expanded using commands like `mvexpand` or `foreach`.

Here's why this works:

* JSON Data Extraction: Splunk automatically parses JSON data into fields. If a JSON key has an array of values (e.g., "products": ["productA", "productB", "productC"]), Splunk creates a multivalue field for that key.

* Multivalue Fields: These fields allow you to handle multiple values for the same key within a single event. For example, if the JSON key `products` contains an array of product names, Splunk will store all the values in a single multivalue field named `products`.

```
{
  "event": "purchase",
  "products": ["productA", "productB", "productC"]
}
```

NEW QUESTION # 79

Which is a regex best practice?

- A. Use `*` rather than `+`.
- B. Use complex expressions rather than simple ones.
- C. Use greedy operators (`.` `*`) instead of non-greedy operators (`.` `*?`).
- D. Avoid backtracking.

Answer: D

Explanation:

In regex (regular expressions), one of the best practices is to avoid backtracking when possible. Backtracking occurs when the regex engine revisits previous parts of the input string to attempt different permutations of the pattern, which can significantly degrade performance, especially with complex patterns on large inputs.

Designing regex patterns to minimize or avoid backtracking can lead to more efficient and faster evaluations.

NEW QUESTION # 80

.....

All these three Splunk SPLK-1004 exam questions formats are easy to use and perfectly work with all devices, operating systems, and the latest web browsers. The Splunk Core Certified Advanced Power User (SPLK-1004) PDF dumps file is the collection of real and updated Splunk Core Certified Advanced Power User (SPLK-1004) exam questions that are being presented in PDF format. You can install SPLK-1004 Pdf Dumps file on your desktop computer, laptop, tab, or even on your smartphone devices. Just install the SPLK-1004 PDF dumps file and start Splunk Core Certified Advanced Power User (SPLK-1004) exam preparation anywhere and anytime.
