

100% Pass Quiz Cisco - The Best 300-740 - Valid Designing and Implementing Secure Cloud Access for Users and Endpoints Test Pdf

DOWNLOAD the newest TrainingDumps 300-740 PDF dumps from Cloud Storage for free: <https://drive.google.com/open?id=1SV8IZo7O9CD0dvnEunHL30xzsvf7xNga>

We TrainingDumps are built in years of 2010. Recent years we are offering reliable certification 300-740 exam torrent materials and gain new & old customers' praise based on our high pass rate. We put much emphasis on our 300-740 exam questions quality and we are trying to provide the best after-sale customer service on 300-740 training guide for buyers. If you are looking for professional & high-quality 300-740 preparation materials, you can trust us and choose our 300-740 study materials. Our 300-740 exam guide is able to help you clear exams at the first attempt.

You will be able to assess your shortcomings and improve gradually without having anything to lose in the actual Designing and Implementing Secure Cloud Access for Users and Endpoints exam. You will sit through mock exams and solve actual Cisco 300-740 dumps. In the end, you will get results that'll improve each time you progress and grasp the concepts of your syllabus. The desktop-based Cisco 300-740 Practice Exam software is only compatible with Windows.

Free PDF Reliable Cisco - Valid 300-740 Test Pdf

For Cisco 300-740 certification test, are you ready? The exam comes in sight, but can you take the test with confidence? If you have not confidence to sail through your exam, here I will recommend the most excellent reference materials for you. The latest 300-740 Certification Training dumps that can pass your exam in a short period of studying have appeared. The dumps are provided by TrainingDumps.

Cisco 300-740 Exam Syllabus Topics:

Topic	Details

Topic 1	<ul style="list-style-type: none"> • SAFE Architectural Framework: This section of the exam measures skills of Security Architects and explains the Cisco SAFE framework, a structured model for building secure networks. It emphasizes the importance of aligning business goals with architectural decisions to enhance protection across the enterprise.
Topic 2	<ul style="list-style-type: none"> • Integrated Architecture Use Cases: This section of the exam measures the skills of Cloud Solution Architects and covers key capabilities within an integrated cloud security architecture. It focuses on ensuring common identity across platforms, setting multicloud policies, integrating secure access service edge (SASE), and implementing zero-trust network access models for more resilient cloud environments.
Topic 3	<ul style="list-style-type: none"> • Threat Response: This section of the exam measures skills of Incident Response Engineers and focuses on responding to threats through automation and data analysis. It covers how to act based on telemetry and audit reports, manage user or application compromises, and implement response steps such as containment, reporting, remediation, and reinstating services securely.
Topic 4	<ul style="list-style-type: none"> • Network and Cloud Security: This section of the exam measures skills of Network Security Engineers and covers policy design for secure access to cloud and SaaS applications. It outlines techniques like URL filtering, app control, blocking specific protocols, and using firewalls and reverse proxies. The section also addresses security controls for remote users, including VPN-based and application-based access methods, as well as policy enforcement at the network edge.
Topic 5	<ul style="list-style-type: none"> • User and Device Security: This section of the exam measures skills of Identity and Access Management Engineers and deals with authentication and access control for users and devices. It covers how to use identity certificates, enforce multifactor authentication, define endpoint posture policies, and configure single sign-on (SSO) and OIDC protocols. The section also includes the use of SAML to establish trust between devices and applications.
Topic 6	<ul style="list-style-type: none"> • SAFE Key Structure: This section of the exam measures skills of Network Security Designers and focuses on the SAFE framework's key structural elements. It includes understanding 'Places in the Network'—the different network zones—and defining 'Secure Domains' to organize security policy implementation effectively.
Topic 7	<ul style="list-style-type: none"> • Industry Security Frameworks: This section of the exam measures the skills of Cybersecurity Governance Professionals and introduces major industry frameworks such as NIST, CISA, and DISA. These frameworks guide best practices and compliance in designing secure systems and managing cloud environments responsibly.

Cisco Designing and Implementing Secure Cloud Access for Users and Endpoints Sample Questions (Q170-Q175):

NEW QUESTION # 170

Automated response actions based on telemetry reports can include:

- A. Removing all forms of access control
- **B. Blocking IP addresses associated with malicious activity**
- C. Unconditionally trusting all internal network traffic
- D. Decreasing the sensitivity of intrusion detection systems

Answer: B

NEW QUESTION # 171

Cisco Umbrella provides visibility and assurance by:

- **A. Offering DNS-layer security to prevent access to malicious domains**
- B. Limiting its functionality to on-premises solutions
- C. Focusing exclusively on email security

- D. Reducing the scope of security monitoring to non-web traffic

Answer: A

NEW QUESTION # 172

Refer to the exhibit. An engineer must provide RDP access to the AWS virtual machines and HTTPS access to the Google Cloud Platform virtual machines. All other connectivity must be blocked. The indicated rules were applied to the firewall; however, none of the virtual machines in AWS and Google Cloud Platform are accessible. What should be done to meet the requirement?

- **A. Move rule 1 to the last position**
- B. Configure a NAT overload rule
- C. Configure a virtual private cloud firewall rule
- D. Move rule 2 to the first position.

Answer: A

Explanation:

Rule 1 is a "deny all" rule placed at the top of the access control policy. Because Cisco firewalls process rules sequentially from top to bottom, Rule 1 is blocking all traffic-including RDP (Rule 2) and HTTPS (Rule 3).

To allow specific traffic, the "deny all" catch-all rule should be placed last so that the specific allow rules are evaluated first. SCAZT Section 3 (Network and Cloud Security, Pages 69-74) discusses rule hierarchy and clearly states that allow rules must precede any general deny policies to ensure intended traffic is matched correctly. This best practice is essential when dealing with multi-cloud access control.

Reference: Designing and Implementing Secure Cloud Access for Users and Endpoints (SCAZT), Section 3, Pages 69-74

NEW QUESTION # 173

Cisco Secure Firewall (FTD and ASA) is designed to:

- **A. Provide advanced threat defense and unified policy management**
- B. Simplify network design by removing the need for any other security measures
- C. Only monitor outbound traffic for potential threats
- D. Act solely as a physical barrier without any software-based controls

Answer: A

NEW QUESTION # 174

In the context of threat response, "restantiate" primarily means:

- A. Permanently disabling compromised accounts
- B. Maintaining the compromised state for forensic analysis
- C. Ignoring the incident after containment
- **D. Restoring services or applications to their operational state after a security incident**

Answer: D

NEW QUESTION # 175

.....

We provide Designing and Implementing Secure Cloud Access for Users and Endpoints 300-740 web-based self-assessment practice software that will help you to prepare for the 300-740 certification exam. Designing and Implementing Secure Cloud Access for Users and Endpoints 300-740 Web-based software offers computer-based assessment solutions to help you automate the Cisco 300-740 exam testing procedure. The stylish and user-friendly interface works with all browsers, including Google Chrome, Opera, Safari, and Internet Explorer. It will make your certification exam preparation simple, quick, and smart. So, rest certain that you will discover all you need to study for and pass the Designing and Implementing Secure Cloud Access for Users and Endpoints 300-740 Exam on the first try.
