Scrum 的 SAFe-Practitioner 認證是熱門認證之一。如果獲得該項資格認證工程師，可以讓你增加求職砝碼。獲得與自身技術水準相符的技術崗位，將輕鬆跨入IT白領階層拿取高薪。針對 NewDumps 的 SAFe-Practitioner 認證考試考古題，本題庫網提供兩種版本的題庫格式：SAFe-Practitioner PDF版本(電子書格式)，可將題庫列印出來、可PC閱讀、可拷貝；SAFe-Practitioner 軟件版本，多功能在線模擬測試，可以重複在多台電腦安裝使用，不限IP。

## 最新的 SAFe Certification SAFe-Practitioner 免費考試真題 (Q193-Q198):

### 問題 #193

What is the recommended length of an Iteration?

- A. Eight weeks
- **B. Two weeks**
- C. Four weeks
- D. Ten weeks

答案： B

解題說明：

An Iteration is a fixed timebox during which an Agile team delivers a potentially releasable increment of value. The recommended length of an Iteration is two weeks, as this allows for fast feedback, adaptation, and learning cycles. Longer Iterations may increase the risk of overcommitment, scope creep, and reduced quality.

Shorter Iterations may increase the overhead of planning and coordination, and reduce the amount of value delivered per Iteration.

### 問題 #194

What is one way to understand WIP in a system?

- **A. Make current work visible**
- B. Pair to complete the work faster
- C. Size stories smaller
- D. Split stories

答案： A

解題說明：

WIP stands for work in process, which is the amount of work that is currently being done in a system. One way to understand WIP is to make it visible to all stakeholders, using tools such as Kanban boards, cumulative flow diagrams, or burn-up charts. By making WIP visible, we can see the current state of the work, identify bottlenecks, limit WIP to match capacity, and improve flow efficiency.

#6 - Visualize and limit WIP, reduce batch sizes, and manage queue lengths, Make Value Flow without Interruptions, SAFe

Principle 6: Visualise and limit WIP, reduce batch sizes, and manage queued lengths

### 問題 #195

Which of the following types of Enabler Stories is used for building and evaluating prospective Solutions alternatives?

- A. Compliance
- **B. Exploration**
- C. Infrastructure
- D. Architecture

答案： B

解題說明：

According to the SAFe-for-Teams-SAFe-Practitioner-6-0 documents, enabler stories are short descriptions of a small piece of desired functionality that support exploration, architecture, infrastructure, or compliance.

Among these four types of enabler stories, exploration is the one that is used for building and evaluating prospective solutions alternatives. Exploration enabler stories support research, prototyping, and other activities needed to develop an understanding of customer needs, including the exploration of prospective solutions and evaluation of alternatives. They help validate assumptions, reduce uncertainty, and increase the likelihood of building the right thing. Therefore, the correct answer is A. Exploration.

#### 問題 #196

What is one of the Agile Release Train events?

- **A. Solution Demo**
- B. Backlog refinement
- C. Product Owner sync
- D. Iteration Retrospective

答案： A

解題說明：

A Solution Demo is one of the Agile Release Train events. A Solution Demo is a periodic event where the current state of the Solution is evaluated by the relevant stakeholders, including customers and users. The Solution Demo provides an opportunity to inspect and adapt the Solution, and to validate that it meets the Solution Intent and the customer needs. The Solution Demo is typically held at the end of each Program Increment (PI), and may also be held more frequently depending on the Solution context and feedback mechanisms. #### 問題 #197

A User Story includes which three things? (Choose three.)

- A. Definition of Done
- **B. What**
- C. Level of Risk
- D. How
- **E. Who**
- **F. Why**

答案： B,E,F

解題說明：

A user story is a short description of a small piece of desired functionality written from the user's perspective and in their language. A user story has three primary components, each of which begin with the letter 'C':

Card, Conversation, and Confirmation. The card is a written or digital note that captures the essence of the user story using the format: "As a (who), I want (what), so that (why)." The conversation is the ongoing dialogue between the team and the customer or product owner to elaborate and refine the user story details. The confirmation is the set of acceptance criteria and tests that verify the user story is done and meets the customer's expectations<sup>12</sup>.
