問題 #41

What are examples of internal barriers to achieving the goals of the finance department?

Note: There are 3 correct answers to this question.

- **A. Manual, error-prone processes**
- **B. Multiple legacy systems**
- C. High cost of capital
- D. Constant regulatory shifts
- **E. Data silos and poor data quality**

答案: **A,B,E**

解題說明:

Comprehensive and Detailed 150 to 250 words of Explanation From Positioning SAP Business Suite via SAP Financial Management Solutions documents:

To position SAP Financial Management Solutions effectively, one must understand the internal friction points that prevent a finance department from becoming a strategic partner to the business. Internal barriers are factors within the organization's control that impede efficiency. The most prevalent barriers include manual, error-prone processes, which consume valuable time and increase the risk of financial misstatement. When employees spend the majority of their time on data entry and spreadsheet manipulation, they cannot focus on value-added analysis.

Furthermore, data silos and poor data quality act as major roadblocks. When financial data is trapped in departmental silos, getting a holistic view of the company's performance is impossible, leading to "multiple versions of the truth." This is often exacerbated by the existence of multiple legacy systems that do not communicate with each other. These legacy systems require expensive maintenance and complex reconciliations. While "High cost of capital" (Option A) and "Constant regulatory shifts" (Option D) are certainly challenges for a CFO, they are considered external market or regulatory forces. SAP's value proposition is centered on removing these internal technical and process-oriented barriers by providing a unified, automated, and modern digital platform.

問題 #42

How does SAP Business Suite ensure regulatory compliance?

- **A. Through SAP Governance, Risk, and Compliance (GRC)**
- B. By reducing financial reporting requirements
- C. By outsourcing financial processes
- D. By increasing manual intervention

答案: **A**

問題 #43

The head of which finance function is most committed to streamlining operations through automation?

- A. Audit, Compliance, and Tax
- **B. Treasury and Shared Service Operations**
- C. Accounting and Controlling
- D. Sales / Revenue

答案: **B**

解題說明:

Comprehensive and Detailed 150 to 250 words of Explanation From Positioning SAP Business Suite via SAP Financial Management Solutions documents:

While all finance functions benefit from efficiency, the head of Treasury and Shared Service Operations is typically the most committed to streamlining operations through automation. Shared Service Centers (SSCs) are designed specifically to centralize and process high volumes of transactional data-such as accounts payable, accounts receivable, and travel expenses-across the entire enterprise. For these leaders, "efficiency is the product." Automation in Treasury and Shared Services is critical because manual processing in these areas leads to high operational costs, human error, and liquidity risks. By implementing solutions like SAP Cash Application (for automated payment matching) and SAP Multi-Bank Connectivity (for automated bank communications), these leaders can significantly reduce the cost per transaction and shorten processing times.

In the Treasury function, automation ensures that cash visibility is instantaneous, allowing for more effective liquidity management and risk mitigation. While Accounting and Controlling (Option B) also seek automation, their focus is often more on data integrity and closing speed, whereas Shared Services and Treasury are fundamentally driven by the operational "throughput" and cost-efficiency that only high-level automation can provide.

問題 #44

What is the primary function of SAP CRM?

- A. To optimize customer relationship management
- B. To automate payroll processing
- C. To manage financial operations
- D. To enhance supply chain operations

答案： A
