It is widely accepted that where there is a will, there is a way; so to speak, a man who has a settled purpose will surely succeed. To obtain the UiAAAv1 certificate is a wonderful and rapid way to advance your position in your career. In order to reach this goal of passing the UiAAAv1 Exam, you need more external assistance to help yourself. With our UiAAAv1 exam questions, you will not only get aid to gain your dreaming certification, but also you can enjoy the first-class service online.

UiPath Agentic Automation Associate Sample Questions (Q20-Q25):

NEW QUESTION # 20

A Citrix Administrator is creating a Pooled/Random catalog using Machine Creation Services (MCS). Which service on the Citrix Delivery Controller will enable the communication to the Hypervisor?

- A. Citrix Broker Service
- B. Citrix Environment Test Service
- C. Citrix Host Service
- D. Citrix Hypervisor Service

Answer: C

Explanation:

The Citrix Host Service on the Delivery Controller manages communication with the hypervisor. It enables Machine Creation

Services (MCS) to provision, power manage, and update virtual machines in pooled or random catalogs.

NEW QUESTION # 21

Scenario: A Citrix Administrator created a machine catalog using Machine Creation Services. The Desktop Experience was set to 'Random'.

Where will the unique information for the virtual machines be stored?

- A. In the differencing disk of each virtual machine
- B. In the PERSONALITY.INI file at the root directory of each virtual machine
- C. Only in the Site database
- **D. In the identity disk of each virtual machine**

Answer: D

NEW QUESTION # 22

Scenario: A Citrix Administrator has enabled an HDX Session printers policy within a Citrix Virtual Apps and Desktops Site. The administrator added a printer to a print server and assigned the printer to all users through a session printer policy. In addition, several local client printers are auto-created within HDX sessions. No other printing policies are configured. How will print jobs be routed when users send print jobs to a printer managed by the print server?

- A. Over the HDX virtual channel to the specified printer attached to the print server
- B. Over the HDX virtual channel, through the endpoint, and then to the print server
- **C. Directly to the network print server and then to the specified printer**
- D. Directly from the session Virtual Delivery Agent (VDA) machine to the printer

Answer: C

Explanation:

When using session printers from a print server, print jobs are routed directly from the VDA to the network print server, which then forwards them to the physical printer. The HDX virtual channel is only used for client printers, not for print server-based session printers.

NEW QUESTION # 23

On which two components must the Secure Ticket Authority (STA) server locations be configured if a Citrix Administrator wants to configure secure external access to a Citrix Virtual Apps and Desktops Site? (Choose two.)

- A. Citrix Workspace app
- **B. NetScaler Gateway**
- C. Delivery Controller
- D. Virtual Delivery Agent (VDA)
- **E. StoreFront**

Answer: B,E

Explanation:

The Secure Ticket Authority (STA) server locations must be configured on both the NetScaler Gateway and StoreFront. This ensures that tickets generated by the STA (on the Delivery Controllers) are validated consistently, enabling secure external access to Citrix resources.

NEW QUESTION # 24

Scenario: A Citrix Administrator is enabling TLS Secure connections between the Cloud Connectors and on-premises StoreFront. After configuring the TLS certificate on all Cloud Connectors and disabling HTTP connections, the administrator finds that no resources are being enumerated.

Which extra step does the administrator need to take to allow enumeration to work between on- premises StoreFront and Citrix Cloud?
