

Reliable H20-923_V1.0 Exam Pattern | H20-923_V1.0 Valid Exam Labs

DOWNLOAD the newest SureTorrent H20-923_V1.0 PDF dumps from Cloud Storage for free: https://drive.google.com/open?id=18_b7FY9R1ch0Nq3ZsRm3DU4xZ-MntT3C

Passing the exam just one time is a good wish of every candidate. If you choose us, we can help you pass your exam in your first attempt. H20-923_V1.0 exam braindumps are high quality, and you can improve your efficiency during the preparation. Furthermore, H20-923_V1.0 exam dumps are cover most of the knowledge points for the exam, you can have a good command of the knowledge points during practicing. We have online and offline service for H20-923_V1.0 Exam Materials, if you any questions bother you, you can just have a conversion with us or you can clarify the problem through email, and we will give you reply as quickly as we can.

The second step: fill in with your email and make sure it is correct, because we send our HCSP-Field-Data Center Facility V1.0 learn tool to you through the email. Later, if there is an update, our system will automatically send you the latest HCSP-Field-Data Center Facility V1.0 version. At the same time, choose the appropriate payment method, such as SWREG, DHPay, etc. Next, enter the payment page, it is noteworthy that we only support credit card payment, do not support debit card. Generally, the system will send the H20-923_V1.0 Certification material to your mailbox within 10 minutes. If you don't receive it please contact our after-sale service timely.

Huawei H20-923_V1.0 Online Practice Test Engine

The H20-923_V1.0 Exam Questions is of the highest quality, and it enables participants to pass the H20-923_V1.0 exam on their first try. For successful preparation, it is essential to have good H20-923_V1.0 exam dumps and to prepare questions that may come up in the exam. SureTorrent helps candidates overcome all the difficulties they may encounter in their exam preparation. To ensure the candidates' satisfaction, SureTorrent has a support team that is available 24/7 to assist with a wide range of issues.

Huawei HCSP-Field-Data Center Facility V1.0 Sample Questions (Q39-Q44):

NEW QUESTION # 39

In IT scenarios, which of the following are the power supply and distribution components of the FusionDC1000A?

- A. Integrated UPS
- B. SmartLi
- C. AC/DC power system
- D. Power PDB

Answer: A,B,D

Explanation:

In the FusionDC1000A IT scenario, the power chain is built around an AC input, conditioned backup power, energy storage, and final distribution to the IT racks. Integrated UPS is the core power-conditioning component, providing voltage and frequency stabilization and uninterrupted supply during mains disturbances. The UPS works together with SmartLi, Huawei's lithium battery system, which serves as the energy storage unit to sustain the load during outages and to support controlled shutdown or generator switchover. After UPS output, power is delivered to the IT loads through the Power PDB, which performs downstream distribution, branch protection, and organized cable termination toward rack PDUs or IT equipment feeders. By contrast, an AC/DC power system is typically associated with DC bus supply used in telecom-oriented or dedicated DC load scenarios, not the standard IT scenario architecture of FusionDC1000A that is centered on UPS plus battery plus AC distribution. Therefore, the correct components for IT scenarios are SmartLi, Power PDB, and Integrated UPS.

NEW QUESTION # 40

The NetEco service program backend can be accessed through the iBMC port.

- A. False
- B. True

Answer: A

Explanation:

In Huawei data center facility management, NetEco is the management software platform (server/application) used to centrally monitor and manage sites, while iBMC is the out-of-band hardware management interface used for server remote maintenance (such as power control, hardware health, BIOS settings, and remote console) on the specific server where iBMC exists. The iBMC port is not a service access interface for NetEco. NetEco's backend services are accessed through the server operating system network interfaces (management/service network) and corresponding application ports after the server is properly networked and configured. Even if NetEco is deployed on a Huawei server that has iBMC, iBMC only provides a channel to manage the server hardware and does not expose NetEco application access as an official commissioning /O&M path. Therefore, NetEco backend access should be planned via the site's management network (IP addressing, routing, security policy), not via iBMC.

NEW QUESTION # 41

Through device management, you can view the information about

- A. Signal
- B. Overview
- C. Alarm
- D. Service period

Answer: A,B,C,D

Explanation:

In Huawei smart module management (such as on the ECC800-Pro/WebUI), Device Management is used to centrally view and maintain managed objects (UPS, SmartLi, rPDU, sensors, air conditioners, etc.).

The Overview page provides a consolidated snapshot of a device's operating status, key parameters, running mode, and basic identification information so engineers can quickly judge whether the device is healthy and online. The Alarm view lists active and historical alarms related to the device, supporting rapid fault isolation and verification after recovery. The Signal view shows monitoring points and I/O status (including analog values and digital inputs/outputs where applicable), which helps engineers confirm sensor wiring, linkage logic, and real-time state changes during commissioning and troubleshooting. The Service period information is used for lifecycle and maintenance planning, such as tracking service time, maintenance intervals, or component life indicators where supported, enabling preventive maintenance and reducing unexpected downtime. Therefore, Device Management supports viewing all four categories.

NEW QUESTION # 42

In an in-room solution that adopts overhead air supply through air ducts, the net height of each floor must be greater than or equal to how many meters?

- A. 0

- B. 1
- **C. 2**
- D. 3

Answer: C

Explanation:

For an in-room cooling solution that uses overhead air supply with air ducts, sufficient vertical space is required to accommodate the ductwork, airflow distribution components (such as plenums, turning vanes, flexible connectors, and diffusers), cable trays/pipes that may share the overhead route, and the necessary maintenance clearance. If the net height is too low, the duct cross-section becomes constrained, which increases airflow resistance and static pressure, reduces delivered airflow volume, and can cause uneven air distribution. This leads to hot spots, higher fan power, and difficulty maintaining stable supply/return temperature control. In Huawei data center air-conditioning design guidance, overhead ducted supply is therefore matched with a minimum net floor height requirement of 4 m, ensuring ducts can be sized correctly for the target airflow, noise, and pressure limits while preserving safe installation and maintenance space. A 3 m net height is generally suitable for non-ducted in-room layouts, but becomes insufficient once full overhead ducting is introduced.

NEW QUESTION # 43

The default port number for logging in to the NetEco is

- A. 0
- B. 1
- **C. 2**
- D. 3

Answer: C

Explanation:

In Huawei NetEco access design, the Web client is reached using HTTPS to protect credentials and management data in transit. During initial deployment and commissioning, engineers access the NetEco login page by entering the server IP address followed by the default HTTPS service port. Huawei's standard login method specifies that users open a browser and enter `https://NetEco server IP:31943` to access the NetEco login interface. This port is therefore treated as the default Web login port in typical on-premises NetEco deployments, and it is the baseline value referenced in installation and login guidance. Other ports may appear in specific tools, customized scenarios, version variants, reverse-proxy deployments, or when security policy requires port changes, but those are exceptions driven by planning or product packaging. For exam and commissioning purposes, the correct default login port is the one used by the NetEco Web client entry point under the standard deployment model: 31943.

NEW QUESTION # 44

.....

Many IT certification exam dumps providers spend a lot of money and spirit on advertising and promotion about Huawei H20-923_V1.0 exam lab questions but pay little attention on improving products' quality and valid information resource. They prefer low price strategy with low price rather than excellent valid and high-quality H20-923_V1.0 Exam Lab Questions with a little more cost. I think high passing rate products is what you need in fact.

H20-923_V1.0 Valid Exam Labs: https://www.suretorrent.com/H20-923_V1.0-exam-guide-torrent.html

If you would like to receive H20-923_V1.0 dumps torrent fast, we can satisfy you too, If you are an office worker, H20-923_V1.0 practice materials provide you with an APP version that allows you to transfer data to your mobile phone and do exercises at anytime, anywhere, There are many customers have passed their H20-923_V1.0 exam with our help, However, you should keep in mind that the H20-923_V1.0 Valid Exam Labs - HCSP-Field-Data Center Facility V1.0 exam is a valuable credential and will play an important role in your career advancement.

You do not have to add this namespace information H20-923_V1.0 at the top of every code file in your project, Displays private messages sent to you from other Twitterers, If you would like to receive H20-923_V1.0 Dumps Torrent fast, we can satisfy you too.

Free PDF Quiz H20-923_V1.0 - HCSP-Field-Data Center Facility V1.0 Updated Reliable Exam Pattern

If you are an office worker, H20-923_V1.0 practice materials provide you with an APP version that allows you to transfer data to your mobile phone and do exercises at anytime, anywhere.

There are many customers have passed their H20-923_V1.0 exam with our help, However, you should keep in mind that the HCSP-Field-Data Center Facility V1.0 exam is a valuable credential and will play an important role in your career advancement.

H20-923_V1.0 exam is an important Huawei Certification which can test your professional skills.
