What we provide is what you want to attend BAPv5 Exam necessarily. You may hesitate whether to purchase our dump or not; don't worry, you can download our free demo of BAPv5 exam software. After you have tried our free demo, you will be sure to choose our BAPv5 exam software.

BCS Practitioner Certificate in Business Analysis Practice v5.0 Sample Questions (Q61-Q66):

NEW QUESTION # 61

Bessant Co. manufactures and sells clothing. The company is very profitable and the IT director would like to invest some of these profits into improving the technical infrastructure of the company, which would help the organic growth of the company. However, the finance director would like to use the profits to acquire one of its competitors.

Shelly is the business analyst on this project and she recognises that the IT and finance director do not agree on the future direction of the business. Once prefers organic growth and the other, growth by acquisition.

What technique COULD Shelly use to improve her understating of these two different perspectives?

- A. SWOT analysis
- B. POPIT model.

- C. CATWOE.
- D. The power/ interest grid

Answer: C

Explanation:

Explanation

CATWOE is a technique that helps to understand different perspectives of a situation by analyzing six elements: Customers, Actors, Transformation process, Worldview, Owner, and Environmental constraints.

Shelly could use CATWOE to improve her understanding of the IT and finance director's views on the future direction of the business, by identifying who are the customers, actors, owners, and so on for each option (organic growth or acquisition), and how they differ. Option A is the correct answer.

NEW QUESTION # 62

TeamClothing sells clothes through its shops based around the country. If a customer in a shop cannot find the item they wish to buy, a sales assistant can order it for them online and when it arrives, the customer can then collect the item from the shop. Customers may also order directly from TeamClothing's website. Orders from the website are usually delivered to the customer's home address. Online customers also automatically receive a monthly catalogue from the firm, which lists current offers. Three events are of particular interest:

Shop sales assistants ordering items for a customer online
Customers ordering through the website
Sending a monthly catalogue to website customers

How would these events be classified?

- A. External = 1; Time-based = 1; Internal = 1.
- B. External = 3
- C. External = 2, Time-based = 1
- D. Internal = 2; Time-based = 1.

Answer: C

Explanation:

Explanation

An event is something that happens or occurs within or outside an organisation or project that triggers or affects an activity or process. Events can be classified into three types: external, internal and time-based.

Therefore, option B is the correct answer, as it correctly classifies the events of interest in this scenario according to their types.

External events are events that originate from outside the organisation or project and are beyond its control or influence. An example of an external event in this scenario is customers ordering through the website, as it originates from outside TeamClothing and is beyond its control or influence. There are two external events in this scenario. Internal events are events that originate from within the organisation or project and are under its control or influence. An example of an internal event in this scenario is shop sales assistants ordering items for a customer online, as it originates from within TeamClothing and is under its control or influence. There are no internal events in this scenario. Time-based events are events that occur at regular intervals or on specific dates or times. An example of a time-based event in this scenario is sending a monthly catalogue to website customers, as it occurs at regular intervals (every month). There is one time-based event in this scenario.

NEW QUESTION # 63

A division of a telecommunication company is reviewing its current product range. It has decided to reposition itself by narrowing its product scope to 'deliver consultancy service'. The activity is the primary doing activity on a business Activity Model (BAM) defined by the Chief Executive Officer (CEO). A number of other activities have been identified, five of which are listed below:

Determine which customer to target for

- Determine which customers to target for our focused service.
- Track the progress of consultancy contracts placed by customers.
- Define the skills sets of the consultants supplying our service.
- Agree on a marketing campaign to make people aware of our new product focus
- Run monthly open days, showcasing our consultancy expertise.

Which of these would be categorized as planning activities on the CEO's BAM?

- A. a, c and d
- B. b, c and e.
- C. a, b and e.
- **D. c, d and e**

Answer: D

Explanation:

Explanation

Planning activities are those that must be considered beforehand in order to complete the doing and enabling activities. They are usually related to defining or determining some aspects of the business. In this question, the activities c, d and e are planning activities, as they involve defining the skills sets of the consultants, agreeing on a marketing campaign, and running monthly open days. These activities are necessary to support the primary doing activity of delivering consultancy service. Option D is the correct answer.

NEW QUESTION # 64

ParcelGo is a distribution company. Parcels arrive at its warehouse, where the inbound team use handheld barcode scanners to acknowledge their receipt. Parcels are then loaded onto pallets for onward distribution.

A project has been commissioned to replace the labour-intensive process and introduce a fully-automated system that reads the barcodes of parcels as they pass along a conveyor belt, automatically delivering to the correct area of the warehouse for onward distribution.

Staff from the inbound have informed their manager that about 30% of parcels either do not have barcodes, or the barcodes are obscured. The team currently resolves this issue manually. But they are concerned that the new automated system will be able to do this. The staff members are also worried the system will make their roles redundant.

Using a holistic approach, which element of the POPIT model needs further investigation in order to address the team's concerns?

- A. People and organisation
- B. Process and technology
- C. Information and technology
- **D. People and process**

Answer: D

Explanation:

The elements of the POPIT model that need further investigation are people and process. This is because the staff members have raised concerns about the compatibility of the new automated system with the current process of handling parcels without barcodes or with obscured barcodes, as well as the impact of the system on their job security. These concerns relate to the people element, which covers the roles, skills, attitudes, and behaviors of the staff, and the process element, which covers the activities, tasks, and procedures involved in delivering a service or product. Option C is the correct answer.

NEW QUESTION # 65

George and Laura are responsible for the marketing strategy in a company that sells vinyl records and cassette tapes online.

George feels that the company should focus its marketing solely on people aged over 50, who are nostalgic for these older recording media. He also feels that the company should outsource all marketing activity.

Laura believes that the business should continue with its target of people aged 30-60. As this age group are particularly enthusiastic about vinyl records. She believes that marketing is one of their internal strengths and should remain in-house. Which specific areas of CATWOE are they considering?

- A. Actor and Transformation
- **B. Customer and Owner.**
- C. Customer and Actor
- D. Transformation and Environment

Answer: B

Explanation:

CATWOE is a technique for exploring stakeholder business perspectives by identifying six elements: Customer, Actor, Transformation, Worldview, Owner and Environment. It helps to understand how different stakeholders perceive a business situation or problem and what they expect from a solution. Therefore, option A is the correct answer, as it identifies which specific areas of CATWOE are they considering respectively. Customer is the element that describes who benefits from or is affected by a business situation or problem or its solution. It helps to identify who are the recipients or users of value or satisfaction from a business situation or problem or its solution. George and Laura are considering customer, as they have different views on who should be the target market for their products (people aged over 50 vs people aged 30-60). Owner is the element that describes who has the authority or power to start or stop a business situation or problem or its solution. It helps to identify who are the decision makers or influencers of a business situation or problem or its solution. George and Laura are considering owner, as they have different views on who should be responsible for marketing activities (outsourced vs in-house). Option B is not a correct answer, as it does not identify which specific areas of CATWOE are they considering respectively. Actor is the element that describes who carries out or performs a business situation or problem or its solution. It helps to identify who are responsible for implementing or delivering a business situation or problem or its solution. George and Laura are not considering actor, as they have no views on who carries out their products (although this may be related to owner). Transformation is the element that describes what changes or processes take place in a business situation or problem or its solution. It helps to identify what inputs are converted into outputs in a business situation or problem or its solution. George and Laura are not considering transformation, as they have no views on what changes or processes take place in their products (although this may be related to customer). Option C is not a correct answer, as it does not identify which specific areas of CATWOE are they considering respectively. Transformation is the element that describes what changes or processes take place in a business situation or problem or its solution. It helps to identify what inputs are converted into outputs in a business situation or problem or its solution. George and Laura are not considering transformation, as they have no views on what changes or processes take place in their products (although this may be related to customer). Environment is the element that describes the external factors or constraints that affect a stakeholder's perspective or limit their options. It helps to explain what factors or constraints are beyond the stakeholder's control or influence. George and Laura are not considering environment, as they have no views on what external factors or constraints affect their products (although this may be related to customer). Option D is not a correct answer, as it does not identify which specific areas of CATWOE are they considering respectively. Customer is the element that describes who benefits from or is affected by a business situation or problem or its solution. It helps to identify who are the recipients or users of value or satisfaction from a business situation or problem or its solution. George and Laura are considering customer, as they have different views on who should be the target market for their products (people aged over 50 vs people aged 30-60). Actor is the element that describes who carries out or performs a business situation or problem or its solution. It helps to identify who are responsible for implementing or delivering a business situation or problem or its solution. George and Laura are not considering actor, as they have no views on who carries out their products (although this may be related to owner).
