Cisco Implementing Cisco Collaboration Cloud and Edge Solutions Sample Questions (Q190-Q195):

NEW QUESTION # 190

Refer to the exhibit.

An Expressway-C and Expressway-E are configured for B2B calling and the Expressway- E zone is set to TLS Verify Currently, calls do not reach the Expressway-C. The Traversal Client zone on the Expressway-C for B2B reports the information in the exhibit for the Peer 1 address.

Which action resolves this error?

- A. Add an intermediate certificate to the Expressway-C that is signed by a certificate authority.
- B. Add a server certificate to the Expressway-C that is signed by a certificate authority.

- C. Configure the Expressway-C Traversal Client zone transport protocol with TCP.
- D. Configure the Expressway-C Traversal Client zone Peer 1 address with the fully qualified domain name of the Expressway-E.

Answer: A

NEW QUESTION # 191

A Webex engineer is configuring SSO in Control Hub with Active Directory Federation Services. The engineer wants to authenticate users for all the applications that they are given rights to. The engineer also wants to eliminate further prompts when users switch applications during a particular session. Which action tells ADFS the fields to map to Webex to identify a user?

- A. Send LDAP attributes as claims.
- B. Add a relying party trust to the ADFS.
- C. Create claim rules for Webex authentication
- D. Map the E-mail-addresses LDAP attribute to the uid outgoing claim type.

Answer: D

NEW QUESTION # 192

An engineer wants to configure a zone on the Expressway-E to receive communications from the Expressway-C in order to allow inbound and outbound calls.

How is the peer address configured on the Expressway-C when Expressway-E has only one NIC enabled and is using static NAT mode?

- A. Cisco UCM FQDN
- B. Expressway-E DHCP
- C. Expressway-E FQDN
- D. Cisco UCM DHCP

Answer: C

Explanation:

NEW QUESTION # 193

An engineer is supporting an existing Cisco Collaboration deployment that has internal and external home users using the solution without VPN. Business usage also includes B2B calling for voice and video. Suddenly the engineer receives a report that one of the home office users cannot use the Cisco Jabber client, and shortly after, a few more reports come in for the same error. What must the engineer check first to resolve this issue?

- A. alarms on the Cisco UCM Cluster
- B. client logs of the users
- C. alarms on the Cisco Expressways
- D. real-time monitoring toll logs for problems

Answer: C

NEW QUESTION # 194

Which two items are configured when deploying a B2B collaboration solution? (Choose two.)

- A. traversal client on a Cisco Expressway-E
- B. SIP trunk between Cisco Unified Communications Manager and Cisco Expressway-E
- C. search rules in Cisco Expressway-E
- D. DNS zone on a Cisco Expressway-C
- E. SIP trunk between Cisco Unified Communications Manager and Cisco Expressway-C
