And our NSE6\_FSR-7.3 training questions are popular in the market. We believe you will make the right choice.

## Fortinet NSE 6 - FortiSOAR 7.3 Administrator Sample Questions (Q39-Q44):

### NEW QUESTION # 39

Which two ports must be open between FortiSOAR HA nodes?\* (Choose two.)

- A. Port 5432
- B. Port 25
- C. Port 9200
- D. Port 6380

**Answer: A,C**

Explanation:

In a FortiSOAR HA configuration, certain ports must be open for communication between nodes. Port 5432 is required for PostgreSQL database communication, which is essential for data replication between HA nodes.

Port 9200 is used by Elasticsearch, which FortiSOAR leverages for indexing and search functions across the nodes. These ports must be accessible between nodes to ensure seamless operation and data consistency within the cluster.

### NEW QUESTION # 40

Which three actions can be performed from within the war room? (Choose three)

- A. Use the Task Manager tab to create, manage, assign, and track tasks.
- B. Integrate a third-party instant messenger directly into the collaboration workspace.
- C. Change the room's status to Escalated to enforce hourly updates.
- D. Investigate issues by tagging results as evidence.
- E. View graphical representation of all records linked to an incident in the Artifacts lab

**Answer: A,D,E**

Explanation:

In FortiSOAR's War Room, users can perform several actions to manage incidents effectively. They can view a graphical representation of records linked to an incident in the Artifacts lab, which helps visualize connections and dependencies. Additionally, the War Room supports tagging investigation results as evidence, allowing for a structured approach to incident documentation. Users can also manage tasks via the Task Manager tab, facilitating task creation, assignment, and tracking within the incident response workflow.

### NEW QUESTION # 41

On FortiSOAR, which default role is used to assign privileges to other teams and is recommended to not be removed?

- A. Application Administrator
- B. Playbook Administrator
- C. Full App Permissions
- D. Security Administrator

**Answer: A**

Explanation:

In FortiSOAR, the "Application Administrator" role is a default role that holds broad privileges, including the ability to assign permissions to other teams. This role is fundamental to system administration and is recommended not to be removed as it provides crucial administrative capabilities. Removing or modifying this role could impact FortiSOAR's ability to manage user roles and permissions effectively, which could hinder system operations and user management.

### NEW QUESTION # 42

Which log file contains license synchronization logs on FortiSOAR?

- A. beat.log
- B. celery.log
- C. fdn.log
- D. falcon.log

**Answer: C**

Explanation:

The fdn.log file in FortiSOAR contains logs related to license synchronization activities. This log file records events and errors associated with license checks and synchronization with Fortinet's licensing servers, ensuring that the FortiSOAR instance remains compliant with licensing requirements. Monitoring fdn.log can help administrators troubleshoot issues related to license synchronization and ensure the system operates within the licensed limits.

### NEW QUESTION # 43

For which two modules on FortiSOAR can you create SLA templates? (Choose two.)

- A. Alerts
- B. Tasks
- C. Indicators
- D. Incidents

**Answer: A,C**

Explanation:

In FortiSOAR, SLA (Service Level Agreement) templates can be created for specific modules, including Alerts and Indicators. These templates are essential for tracking response and resolution times, ensuring compliance with defined service levels. By configuring SLAs on the Alerts and Indicators modules, organizations can monitor the time taken to address these items, which is critical in maintaining efficient incident response and management practices. The SLA templates can be customized according to specific business requirements and are applied to records within these modules to enforce timely actions.

### NEW QUESTION # 44

.....
