4A0-D01 Quiz Torrent: Nokia Data Center Fabric Fundamentals Exam - 4A0-D01 Exam Guide & 4A0-D01 Test Bootcamp

ExamcollectionPass Nokia 4A0-D01 practice test software is another great way to reduce your stress level when preparing for the 4A0-D01. With our software, you can practice your excellence and improve your competence on the Nokia 4A0-D01 exam dumps. Each Nokia 4A0-D01 Practice Exam, composed of numerous skills, can be measured by the same model used by real examiners. ExamcollectionPass Nokia 4A0-D01 practice test has real Nokia 4A0-D01 exam questions.

Nokia 4A0-D01 Exam Syllabus Topics:

Topic	Details
Topic 1	• SR Linux Configuration and Routing: This section of the exam measures skills of a Network Automation Specialist and focuses on configuring and managing SR Linux systems. It examines the YANG-driven CLI, JSON output, environment variables, and static and dynamic routing. Learners also explore BGP, ECMP, IP-VRF, MAC-VRF, and the use of VXLAN with EVPN to implement both Layer 2 and Layer 3 overlays, including symmetric and asymmetric models.
Topic 2	• This section of the exam measures skills of a Network Automation Specialist and introduces the principles of Event Driven Automation in SR Linux environments. It covers integration with Kubernetes and explores core use cases such as intent-based automation for fabrics and services, as well as enhanced network observability.
Topic 3	• SR Linux Logging, Monitoring, and Filtering: This section of the exam measures skills of a Data Center Network Engineer and addresses how to implement logging, monitoring, and traffic filtering in SR Linux. It explains log file usage, ACL types, CPM filtering, and packet capture filters. Configuration tasks involve applying ACLs and monitoring network activity using capture tools.

Topic 4	• SR Linux User and System Management: This section of the exam measures skills of a Network Automation Specialist and includes managing user roles, TLS configurations for secure communication, and automation features like Zero-Touch Provisioning (ZTP). It covers ZTP setup, configuration processes, and common issues that may arise during deployment.

4A0-D01 New Dumps Sheet & 4A0-D01 Test Cram Review

Thanks to modern technology, learning online gives people access to a wider range of knowledge, and people have got used to convenience of electronic equipment. As you can see, we are selling our 4A0-D01 learning guide in the international market, thus there are three different versions of our 4A0-D01 exam materials which are prepared to cater the different demands of various people. We can guarantee that our 4A0-D01 Exam Materials are the best reviewing material. Concentrated all our energies on the study 4A0-D01 learning guide we never change the goal of helping candidates pass the exam. Our 4A0-D01 test questions' quality is guaranteed by our experts' hard work. So what are you waiting for? Just choose our 4A0-D01 exam materials, and you won't be regret.

Nokia Data Center Fabric Fundamentals Exam Sample Questions (Q21-Q26):

NEW QUESTION # 21
Which of the following is NOT one of the user types supported in Nokia SR Linux?

- A. Regular Linux OS users
- B. Remote users
- C. SR Linux users
- D. Container users

Answer: B

Explanation:
Nokia SR Linux supports SR Linux users, regular Linux OS users, and container users. "Remote users" is not a defined user type within SR Linux user management.

NEW QUESTION # 22
Which of the following is NOT one of the characteristics of Nokia's SR Linux?

- A. It uses an unmodified Linux kernel that simplifies the use of third party applications.
- B. It uses a modular, state-driven architecture that gives applications efficient access to system information.
- C. It includes a NetOgs development kit that supports the integration of third-party applications.
- D. It uses mature and stable SNMP protocol to access the command line interface.

Answer: D

Explanation:
Nokia's SR Linux does not rely on the SNMP protocol for accessing the command line interface; instead, it uses modern, programmable interfaces aligned with its modular architecture.

NEW QUESTION # 23
Which of the following statements about the data center's leaf-spine topology (clos network) is FALSE?

- A. Each leaf router is connected to all the spine routers in the cluster.
- B. It uses the spanning tree protocol to avoid forwarding loops.
- C. It provides a consistent path for east-west traffic.
- D. It uses ECMP to distribute traffic across duplicate links.

Answer: B

Explanation:
The leaf-spine (Clos) topology does not use the spanning tree protocol because it relies on equal-cost multipath (ECMP) routing to prevent loops and efficiently utilize all available paths. Spanning tree is typically avoided in modern data center fabrics to enable full bandwidth utilization.

NEW QUESTION # 24
Based on the exhibit output, which of the following is NOT the reason the user runs the "baseline diff" command?

```
user admin

A:dc-leaf-1# enter candidate private
--{ + candidate private private-admin }--[  ]--
A:dc-leaf-1# interface lo1 subinterface 0 ipv4 address 200.1.1.1/32
--{ +* candidate private private-admin }--[ interface lo1 subinterface 0 ipv4 address
200.1.1.1/32 ]--
A:dc-leaf-1#
--{ +! candidate private private-admin }--[  ]--
A:dc-leaf-1# baseline diff
     interface ethernet-1/1 {
-        admin-state disable
     }
```

- A. User admin is not able to commit their changes.
- B. Another user has committed changes.
- C. User admin notices that "!" appears in the CLI prompt.
- D. User admin wants to check if there are differences between the current running config and their baseline datastore.

Answer: A

Explanation:
The "baseline diff" command is used to compare the candidate configuration against the baseline datastore to see changes or conflicts, especially when multiple users are involved or to verify differences. It does not indicate that the user is unable to commit changes.

NEW QUESTION # 25
How does Nokia's Fabric Services System use a fabric intent to build the DC switch fabric?

- A. It uses a digital sandbox to build the configuration files for the DC fabric.
- B. It uses a digital sandbox to connect workloads to the DC fabric.
- C. It uses a YAML file that defines the intended configuration state of the DC fabric.
- D. It uses telemetry data to build the configuration files for the DC fabric.

Answer: C

Explanation:
Nokia's Fabric Services System uses a fabric intent defined in a declarative YAML file to specify the desired state of the data center fabric, which is then used to build and configure the fabric accordingly.

NEW QUESTION # 26
......

God wants me to be a person who have strength, rather than a good-looking doll. When I chose the IT industry I have proven to God my strength. But God forced me to keep moving. Nokia 4A0-D01 exam is a major challenge in my life, so I am desperately trying to learn. But it does not matter, because I purchased ExamcollectionPass's Nokia 4A0-D01 Exam Training materials. With it, I can pass the Nokia 4A0-D01 exam easily. Road is under our feet, only you can decide its direction. To choose

ExamcollectionPass's Nokia 4A0-D01 exam training materials, and it is equivalent to have a better future.
