ABPMP International Certified Business Process Associate (CBPA) Exam Sample Questions (Q29-Q34):

NEW QUESTION # 29

In most cases, how is an indicator of process performance quality expressed?

- A. As a cost that expresses the value lost due to the loss of customers
- B. As a score between 1 and 6 (1 = very good and 6 = insufficient)
- **C. As a percentage between the actual and the maximum possible process quality**
- D. By the roles of ISO certification

Answer: C

Explanation:

Quality indicators are typically expressed as percentages representing the level of conformance, accuracy, or completeness. This enables straightforward comparisons and trend tracking over time.

Examples:

- * % of error-free transactions
- * % of on-time deliveries
- * % of completed tasks without rework

"Quality indicators are often expressed as percentages or ratios comparing actual performance to the ideal or standard threshold."

- ABPMP CBOK, Chapter 6 - Process Performance Management

This approach provides:

- * Clarity for non-technical audiences
- * Standardization across processes
- * Actionable performance insights

NEW QUESTION # 30

What team should be created for process design?

- **A. Stakeholders, subject matter experts, and individuals who interact with the process**
- B. Executive management, process owners, external consultants, and clients who believe in process
- C. Notation specialists, programmers, designers, and others involved with the project
- D. Stakeholders representing a cross-functional team

Answer: A

Explanation:

An effective process design team should include:

- * Stakeholders (to align with business needs)
- * Subject Matter Experts (SMEs) (for technical accuracy)
- * Frontline users and participants (for practical execution insights)

This ensures that the process is not only technically sound but also usable and adopted by those who execute it.

"Successful process design requires the collaboration of stakeholders, SMEs, and those involved in day-to-day operations. Their combined input ensures the process meets business objectives and operational practicality."
