Quiz Microsoft - MB-335 - Microsoft Dynamics 365 Supply Chain Management Functional Consultant Expert –Reliable Practice Exam Pdf

If you are craving for getting promotion in your company, you must master some special skills which no one can surpass you. To suit your demands, our company has launched the Microsoft MB-335 exam materials especially for office workers. For on one hand, they are busy with their work, they have to get the Microsoft MB-335 Certification by the little spread time.

Microsoft Dynamics 365 Supply Chain Management Functional Consultant Expert Sample Questions (Q67-Q72):

NEW QUESTION # 67

A company produces rubber hose. Discrete orders accounts for raw material scrap. The scrap is reported through inventory movement journals.

The company has noticed that most of the scrap that is recorded is due to start up that feeds the hose to the finishing process. In addition, the amount of scrap that is recorded is consistent regardless of the amount of hose being produced.

You need to account for material lost during startup.

What should you do?

- A. Do a case study for the scrap items and enter The average amount of scrap as a separate line items on the Bill of materials.
- B. Enter the amount of scrap that is consumed as variable scrap in the Bill of materials.
- C. Enter the amount of scrap that is consumed as constant scrap in the Bill of materials
- D. Enter the consumption amount on the line to match the actual amount used.

Answer: C

NEW QUESTION # 68

You need to configure the solution for the two issues the production manager reported.

How should you complete the configurations? To answer, move the appropriate configurations to the correct issues. You may use each configuration once, more than once, or not at all. You may need to move the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

The screenshot shows the 'Production resource configurations' window. On the left, under 'Configurations', there are four items: 'Assign a maintenance worker.', 'Assign a capability to a resource.', 'Create a working calendar.', and 'Define the capability priority.'. On the right, under 'Configuration', there are two issues: 'Issue 1' and 'Issue 2'. The 'Issue 1' configuration box is empty, and the 'Issue 2' configuration box is empty.

Answer:

Explanation:

The screenshot shows the 'Production resource configurations' window with the configurations assigned to the issues. Under 'Issue 1', the configuration 'Create a working calendar.' is assigned. Under 'Issue 2', the configuration 'Define the capability priority.' is assigned.

Explanation:

The screenshot shows the 'Production resource configurations' window with the configurations assigned to the issues. Under 'Issue 1', the configuration 'Create a working calendar.' is assigned. Under 'Issue 2', the configuration 'Define the capability priority.' is assigned.

Topic 6, Adatum Corporation Adatum Corporation is a multi-entity corporation located in Seattle, Washington in the United States. The company is a leading producer of specialty cakes and cookies. The company also manufactures specialty chocolates that use ethically sourced ingredients from around the world. The company plans to

launch a new product line of organic chocolates later this year.

Adatum plans to implement Dynamics 365 Finance and Dynamics 365 Supply Chain Management to manage financials, inventory, and manufacturing capabilities across the entire organization.

- * Manufactured products are stored at the distribution warehouses until they are shipped to customers.

- * Individually branded pre-packaged cake and cookie mixes are supplied to specialty cafes and restaurants.

The mixes are shipped directly to the cafes and restaurants from the production factories.

- * The company maintains a fleet of trucks and also subcontracts shipments between the factories and warehouses to outside vendors.

- * The mixes and specialty chocolates are based on standard recipes that use precise ingredient ratios. There are strict rules around ingredient substitutions.

- * All mixes use one of three base recipes as their foundation: BaseA, BaseB, and BaseC. Additional ingredients, spices, and flavorings are then added to make the final product.

- * BaseA and BaseB are made in large batches and stored until they are used in the other mixes.

- * Mixes with BaseA have a shelf life of six months due to the type of flour it uses.

- * Specialty chocolates are manufactured only during the holiday season.

- * Specialty desserts are offered during the holiday season. This year, customers may specify additional icing colors and cake layers when placing orders. Depending on the popularity of two of the new colors, they may be offered the next year.

- * Cocoa oil that is extracted during the production of some of the specialty chocolates is used in the BaseB foundation mix.

- * Cleaning and setup of machinery between products has been causing delays in production.

- * Prices of raw ingredients such as sugar can fluctuate greatly depending on seasonal and worldwide demand.

- * To properly record profitability, all raw materials use the first in, first out (FIFO) costing method, while finished products are recorded at standard costs.

- * Large fluctuations have been occurring at month end in costs reported due to the inability to track production runs that span from month-to-month.

- * Leftover flour and sugar from production runs are collected, packaged, and donated to local food banks if the amount is too small to use in other runs.

- * To maintain Adatum's certification as a manufacturer of ethically sourced ingredients, the traceability of every ingredient in all products to their source must be tracked.

- * All products must be randomly tested for adherence to quality standards for ingredient makeup and weight.

- * Similar recipes must be able to be produced in succession to limit machinery cleaning and setup times.

- * All costs must be tracked for each production run and be able to be reconciled at the end of the monthly accounting cycle, including any work in process (WIP) costs and donations.

- * The organic chocolate line must be set up. The ingredients cannot be mixed with non-organic ingredients in inventory.

- * Mixes are generally stored and sold in 16-ounce bags. Some quantities are sold and distributed in 5, 10, and 20-gallon containers to large restaurants.

- * Each mix has a single unique item number and is tracked per batch produced.

- * Specialty chocolate products must be stored in climate-controlled areas of the warehouse.

- * QA TesterA discovers during a random test that the batch of a mix does not contain the necessary amount of IngredientB.

- * VendorZ, who transports finished goods from PlantA to Warehouses, is consistently late picking up product.

- * OperatorA must consolidate partial mix batch group runs into saleable package quantities.

- * UserB must set up the mix items.

- * UserC learns that mixes containing BaseA have been stamped with a batch date from the flour vendor and is not being calculated from the mix manufacturing date. The mixes from the past month that might be impacted need to be identified and the calculation needs to be corrected.

- * UserD must update the costs of finished goods. Accounting wants labor calculated in WIP based on how much time an individual spends performing the operation, as well as the finished goods to post to a specific different ledger account.

- * UserE must set up and maintain the cost of sugar.

- * UserF must decrease downtime for the machinery.

- * UserG must plan the specialty desserts for the current holiday season.

NEW QUESTION # 69

You need to determine the batch values on the combined mix batches for OperatorA.

Which values should you use? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer Area

Field	Merged result
Batch Number	Based on batch group Manually entered Based on batch group Lowest Highest
Expiration Date	Manually entered Based on batch dates group Manually entered Lowest Highest
Lot/Serial Control Number	All are retained All are retained Manually entered Lowest Highest

Microsoft

Answer:

NEW QUESTION # 71

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

A company implements Dynamics 365 Supply Chain Management and configures the system to support process manufacturing. The company manufactures pain-relieving lotions. Several of the primary ingredients are delivered at different concentrations depending on the ingredient and vendor. IngredientA is the primary active ingredient in the lotion. IngredientB is used as a compensating ingredient. You need to ensure that the system is set up to support the manufacturing process.

Solution: Create a formula version for each concentration level.

Does the solution meet the goal?

- A. No
- B. Yes

Answer: A
