

300-420 Latest Study Notes, Exam 300-420 Tutorials

Latest & Reliable Cisco 300-420 Exam Dumps for 2025 – Pass with P2PCerts

Are you preparing for the Cisco 300-420 ENSLD exam and searching for the best study materials? Earning the Cisco Certified Specialist – Enterprise Network Design certification requires expertise in designing scalable, resilient, and secure enterprise networks. With P2PCerts, you get the most authentic and updated [Cisco 300-420 exam dumps](#), ensuring you pass on your first attempt! Our study materials include real exam questions that help you gain the knowledge needed for success.

Cisco 300-420 ENSLD Exam Overview

The Cisco 300-420 ENSLD (Designing Cisco Enterprise Networks) exam tests your ability to create advanced enterprise network designs. Key topics include:

- ★ **Enterprise Network Design Principles** – Hierarchical design models, modularity, and scalability.
- ★ **Advanced Routing & High Availability** – EIGRP, OSPF, BGP, and routing protocol tuning.
- ★ **VPN & Security Considerations** – DMVPN, SD-WAN, and secure network architectures.
- ★ **SD-WAN & Network Automation** – Intent-based networking, automation tools, and programmable infrastructure.
- ★ **Wireless & Data Center Integration** – WLAN design and integration with data center solutions.

Why Choose P2PCerts for Cisco 300-420 Exam Preparation?

P2PCerts is a **trusted platform** for IT certification exams, offering expert-verified study materials. Here's why we stand out:

BTW, DOWNLOAD part of ValidTorrent 300-420 dumps from Cloud Storage: <https://drive.google.com/open?id=1t7gkbv8Km6EamTKUAtGNNJMlyOcr27U1>

As far as our 300-420 practice test is concerned, the PDF version brings you much convenience with regard to the following two aspects. On the one hand, the PDF version contains demo where a part of questions selected from the entire version of our 300-420 Test Torrent is contained. On the other hand, our 300-420 preparation materials can be printed so that you can study for the exams with papers and PDF version. With such benefits, why don't you have a try?

Cisco 300-420 certification exam is an excellent opportunity for IT professionals who are interested in pursuing a career in network design. 300-420 exam covers a range of topics related to enterprise network design, and candidates who pass the exam are awarded the Cisco Certified Design Professional (CCDP) certification. With its high value in the industry, the 300-420 certification is a great way to advance your career in network design.

Cisco 300-420 exam is designed to assess the knowledge and skills required to design enterprise networks. 300-420 Exam is aimed at network professionals who are responsible for designing, implementing, and managing networks in an enterprise environment. 300-420 exam tests the candidates' ability to design scalable and reliable networks that meet the business requirements of an organization.

Know about the cost of Cisco 300-420 Exam

- The cost of the Cisco 300-420 Exam is \$300.

Exam 300-420 Tutorials - 300-420 Mock Exam

300-420 training materials are famous for high quality, and we have received many good feedbacks from our customers. 300-420 exam materials are compiled by skilled professionals, and they possess the professional knowledge for the exam, therefore, you can use them at ease. In addition, 300-420 training materials contain both questions and answers, and it's convenient for you to have a check after practicing. You can receive download link and password within ten minutes after paying for 300-420 Exam Braindumps, it's convenient. If you don't receive, you can contact us, and we will solve this problem for you as quickly as possible.

Cisco Designing Cisco Enterprise Networks Sample Questions (Q158-Q163):

NEW QUESTION # 158

Refer to the exhibit.

An architect must design a solution that uses the direct link between R1 and R2 for traffic from 10.10.10.0/24 toward network 10.10.20.0/24. Which solution should the architect include in the design?

- A. Configure the link to provide multiarea adjacency.
- B. Lower the Administrative Distance for OSPF area 0.
- C. Place the link into area 2 and install a new link between R1 and R2 in area 0.
- D. Configure the OSPF cost of the link to a value lower than 30.

Answer: D

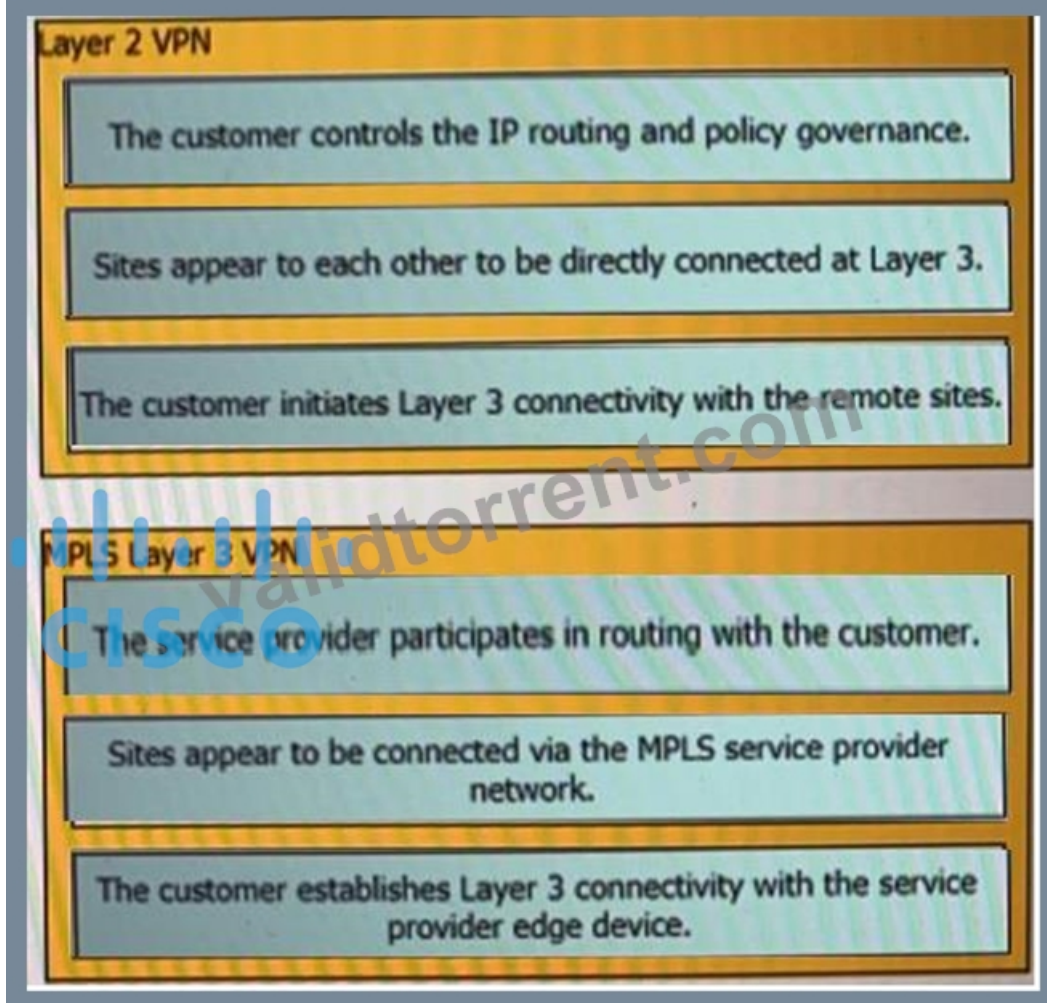

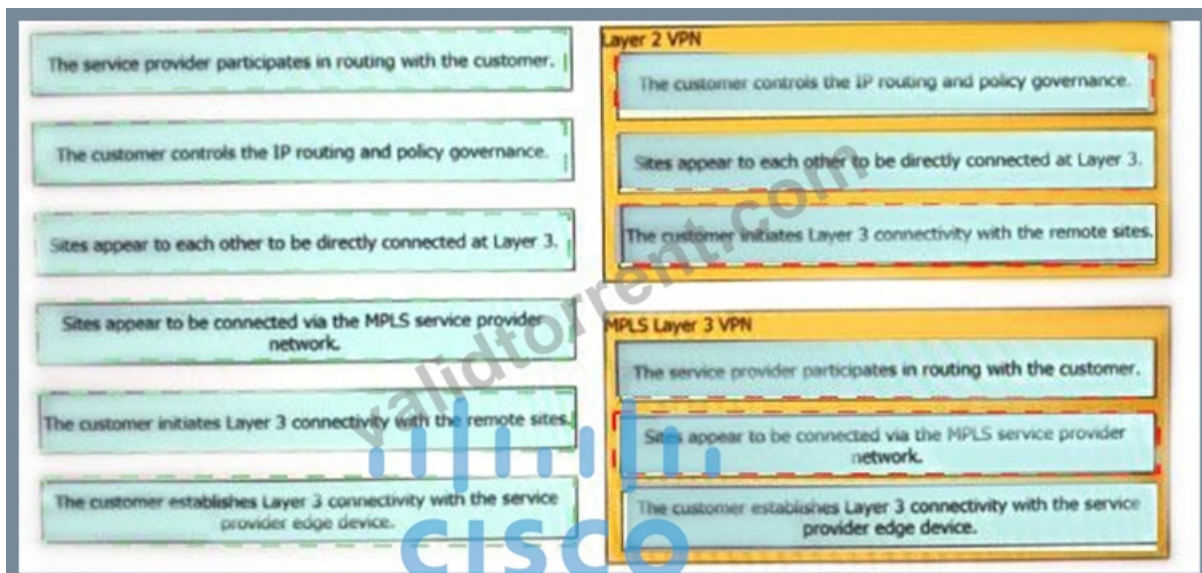

NEW QUESTION # 159

Drag and drop the descriptions from the left onto the corresponding VPN types on the right.

The service provider participates in routing with the customer.	Layer 2 VPN
The customer controls the IP routing and policy governance.	
Sites appear to each other to be directly connected at Layer 3.	
Sites appear to be connected via the MPLS service provider network.	MPLS Layer 3 VPN
The customer initiates Layer 3 connectivity with the remote sites.	
The customer establishes Layer 3 connectivity with the service provider edge device.	

Answer:

Explanation:

NEW QUESTION # 160

An architect must create a QoS solution for a customer to ensure that a 40 Mbps Internet connection is shared between four subnets based on these requirements:

- * Each subnet must receive no less than 10 Mbps of download bandwidth during peak traffic times.
- * A subnet can use up to 40 Mbps during nonpeak traffic times if the other subnets are idle.
- * Download traffic must never experience a delay.

Which solution must the architect choose?

- A. shaping and policing

- B. rate-limiting and shaping
- C. bandwidth percentage and policing
- D. bandwidth percentage and rate-limiting

Answer: C

Explanation:

Selected answer: B

"Download traffic must never experience a delay."

This means we shouldn't be using Shaping at any point (since that puts packets into a buffer and sends them out later on when congestion has been reduced) Also: "Rate-limiting" is a bigger term and under it we have 2 things: "Policing" and "Shaping"

NEW QUESTION # 161

How is sub-second failure of a transport link detected in a Cisco SD-WAN network?

- A. BGP is used between WAN Edge routers and the vSmart controller.
- B. Link state change messages are sent between vSmart controllers.
- C. BFD runs on the IPsec tunnels between WAN Edge routers.
- D. Hellos are sent between the WAN Edge routers and the vSmart controller.

Answer: C

NEW QUESTION # 162

An engineer uses Postman and YANG to configure a router with:

* OSPF process ID 200

* network 172.16.10.128/26 enabled for Area 0

Which get-config reply verifies that the model set was designed correctly?

- A. Text, letter Description automatically generated

```
<rpc-reply message-id="urn:uuid:1b3d05cd-8118-3e6a-6c05-021345678aaf" xmlns="urn:ietf:params:xml:ns:netconf:base:1.0" xmlns:nc="urn:ietf:params:xml:ns:netconf:base:1.0">
