NEW QUESTION # 59

Which four standard objects can you configure to include business specific attributes by using Application Composer for Project Execution Management? (Choose four.)

- A. Project Resource Request
- B. Project Deliverables
- C. Project Milestones
- D. Project Resource Assignment
- E. Project Gates
- F. Project Issues

Answer: B,C,E,F

Explanation:

Application Composer is a tool that allows you to configure standard objects or create custom objects to include business specific attributes for Project Execution Management. Four of the standard objects that you can configure using Application Composer are:

* Project Gates: These are checkpoints that mark the completion of a phase or stage in a project lifecycle.

* Project Issues: These are problems or risks that affect the progress or outcome of a project.

* Project Milestones: These are significant events or achievements that indicate the status or completion of a project or task.

* Project Deliverables: These are products or services that are produced or provided as part of a project or task. Project Resource Request and Project Resource Assignment are not standard objects that you can configure using Application Composer. These are features that allow you to request and assign resources for projects and tasks based on various criteria such as availability, qualifications, preferences, etc. Reference: <https://docs.oracle.com/en/cloud/saas/project-portfolio-management/20c/oapfm/manage-project-execution.html#OAPFM2356201>

NEW QUESTION # 60

Using Oracle Time and Labor, your client wants to put in a validation process that allows only a certain number of maximum hours an employee can charge in a day, and a minimum of hours he or she can report in a week.

What feature would you use to meet this requirement? (Choose the best answer.)

- A. time calculation rules
- B. time audit rules
- C. project time validation rules
- D. time entry rules

Answer: D

Explanation:

To put in a validation process that allows only a certain number of maximum hours an employee can charge in a day, and a minimum of hours he or she can report in a week, you need to use time entry rules. Time entry rules allow you to define the conditions and actions for validating time entries based on various attributes such as hours, dates, projects, tasks, etc. You can also specify the error messages and severity levels for the time entry rules.
