

AACN CCRN-Pediatric Questions - CCRN-Pediatric PDF Dumps [2026]

CCRN Pediatric Exam Questions And Answers from AACN

To promote effective grieving in a 6-year-old sibling following the death of an infant, the nurse should:

- A) Recommend that the sibling not attend the infant's memorial service
 - B) Encourage the parents to minimize their expression of grief with the sibling
 - C) Explain to the sibling that the infant went to heaven
 - D) Explain to the sibling that thoughts and wishes did not cause the infant's death - Answer: D) Explain to the sibling that thoughts and wishes did not cause the infant's death: At age 6, children may take words literally and because of their egocentrism, they believe that thoughts are all-powerful. They may truly believe they caused the death of their sibling. A simple, honest explanation of why the sibling died is indicated. This intervention is consistent with Caring Processes.
- A) Recommend that the sibling not attend the infant's memorial service: This intervention is not a solution to the problem and will not promote effective grieving for the sibling. It is not consistent with Caring Processes.
- B) Encourage the parents to minimize their expression of grief with the sibling: This intervention will lead to ineffective grieving for the sibling and is not consistent with Caring Processes
- C) Explain to the sibling that the infant went to heaven: This intervention will not address the sibling's problem

A 5-year-old with a history of congenital hydrocephalus and VP shunt placement at four weeks of age is admitted with increased somnolence, decreased appetite, and increased complaints of headache. This morning the child vomited twice. The nurse should anticipate:

- A) The physician ordering lumbar puncture and blood and urine cultures
- B) the patient having a CT scan followed by possible shunt revision
- C) Administering mannitol or hypertonic saline
- D) Administering phenytoin (Dilantin) or fosphenytoin (Cerebyx) - Answer: B) The patient having a CT scan followed by possible shunt revision: This patient is demonstrating signs of increased intracranial pressure. The most likely etiology is malfunction of the VP shunt as a result of blockage or disconnection, which is

If you are preparing for an exam, it may spend lots of time, but don't worry, if you are preparing for the CCRN-Pediatric exam, the product of our company will help you save your time. The product of our company will list the major key points of the CCRN-Pediatric exam, and you can grasp the knowledge points as quickly as possible, therefore the time is saving. Besides, the product for CCRN-Pediatric Exam also provide specific training materials for the exam. And the PDF version is convenient to read, and support printing, while the software version stimulate the real environment of the CCRN-Pediatric exam. The APP online version is also available of the product, you can learn at any time and at any place. Choosing our product, it will help you.

AACN CCRN-Pediatric Certification Exam is a comprehensive test that covers a wide range of topics related to pediatric critical care nursing. This includes everything from basic patient assessment and diagnosis to advanced interventions and treatments for complex medical conditions. CCRN-Pediatric exam is designed to be challenging and requires a deep understanding of the subject matter, as well as the ability to apply that knowledge in real-world scenarios.

The CCRN-Pediatric Certification Exam covers a broad range of topics related to pediatric critical care nursing, including hemodynamics, cardiovascular and respiratory systems, neurology, endocrine and metabolic systems, gastrointestinal and renal systems, and infectious diseases. CCRN-Pediatric Exam consists of 150 multiple-choice questions, and test-takers have three hours to complete the exam.

The American Association of Critical-Care Nurses (AACN) is a professional organization that offers certification for registered nurses in critical care. One of the certifications offered by AACN is the CCRN-Pediatric (Critical Care Nursing) Exam. The CCRN-Pediatric certification is designed to validate the knowledge and skills of nurses who work in pediatric critical care settings.

While making revisions and modifications to the Critical Care Nursing Exam (CCRN-Pediatric) practice exam, our team takes reports from over 90,000 professionals worldwide to make the Critical Care Nursing Exam (CCRN-Pediatric) exam questions foolproof. To make you capable of preparing for the AACN CCRN-Pediatric exam smoothly, we provide actual AACN CCRN-Pediatric exam dumps.

AACN Critical Care Nursing Exam Sample Questions (Q111-Q116):

NEW QUESTION # 111

A child who nearly drowned received CPR, was resuscitated quickly, and regained consciousness. What should the nurse anticipate?

- A. Severe electrolyte imbalances may be present
- B. Ventricular arrhythmias may occur
- C. The patient does not require intensive care
- D. Life-threatening respiratory complications may develop

Answer: D

Explanation:

Even with a good initial response, delayed respiratory complications, such as acute respiratory distress syndrome (ARDS) or pulmonary edema, can develop within 24-48 hours after submersion. All pediatric near-drowning cases should be monitored in an ICU setting for at least 24 hours.

"Post-submersion patients are at high risk for delayed onset ARDS. Observation in a monitored setting is essential regardless of initial neurologic status." (Referenced from CCRN Pediatric - Direct Care: Pulmonary, Submersion Injuries and Post-Resuscitation Care)

NEW QUESTION # 112

Which of the following statements by the family of a child with asthma indicates a need for additional teaching:

- A. "He is to use bronchodilator inhaler before steroid inhaler"
- B. "We need to identify what things triggers his attacks"
- C. "he should increase his fluid intake regularly to thin secretions"
- D. "We'll make sure he avoids exercise to prevent asthma attacks"

Answer: D

Explanation:

Explanation: Asthmatic children don't have to avoid exercise. They can participate on physical activities as tolerated. Using a bronchodilator before administering steroids is correct because steroids are just anti-inflammatory and they don't have effects on the dilation of the bronchioles.

NEW QUESTION # 113

When evaluating the effectiveness of a new skin care protocol, a nurse should assess the:

- A. Presence of lesions, ulcers, or erythema
- B. Documentation of nursing interventions
- C. Change in nursing care hours
- D. Preventive measures implemented

Answer: A

Explanation:

When evaluating the effectiveness of a clinical intervention like a skin care protocol, you measure outcomes- not the process. In this context, the presence or absence of skin breakdown, including ulcers or erythema, reflects patient-centered results and effectiveness.

"The presence of pressure injuries, ulcers, or erythema is a measurable outcome used to evaluate the efficacy of skin care protocols." (Referenced from CCRN Pediatric - Direct Care: Integumentary, Skin Integrity and Prevention of Pressure Injuries)

NEW QUESTION # 114

After a cleft lip repair, it is important to preserve the integrity of suture line. What is the best position for an infant who had this type of surgery:

- A. on his abdomen
- B. side-lying
- C. on his back
- D. mother's shoulder

Answer: C

Explanation:

Explanation: This position prevents incisional contact with the mattress. This is also the best position for infants who are not able to turn.

NEW QUESTION # 115

Barbie is suspected with developmental dysplasia of the hip. During an assessment, the nurse expects that:

- A. there is shortening of one leg.
- B. there is a narrowing of the perineum
- C. there is inability to palpate movement of the femoral head.
- D. there is inability to adduct the affected leg.

Answer: A

Explanation:

Explanation: A developmental dysplasia of the hip would reveal that the affected leg appears shorter due to the femoral head being displaced upward.

NEW QUESTION # 116

.....

High efficiency service has won reputation for us among multitude of customers, so choosing our CCRN-Pediatric real study dumps we guarantee that you won't be regret of your decision. Helping our candidates to pass the CCRN-Pediatric exam and achieve their dream has always been our common ideal. We believe that your satisfactory on our CCRN-Pediatric Exam Questions is the drive force for our company. Meanwhile, we adopt a reasonable price for you, ensures people whoever is rich or poor would have the equal access to buy our useful CCRN-Pediatric real study dumps.
