Valid ANVE Latest Test Discount Help You Clear Your ANVE: Axis Network Video Exam Exam Surely

Our ANVE study guide has become a brand for our candidates to get help for their exams. Because our ANVE learning materials contain not only the newest questions appeared in real exams in these years, but the most classic knowledge to master. Besides, it is unavoidable that you may baffle by some question points during review process of the ANVE Exam Questions, so there are clear analysis under some necessary questions.

Axis Network Video Exam Sample Questions (Q24-Q29):

NEW QUESTION # 24

Which three are types of field of view?

- A. Telephoto, wide-angle, normal
- B. Normal, zoom, telephoto
- C. Wide-angle, normal, zoom

- D. Wide-angle, varifocal, normal

Answer: A

Explanation:

The three types of field of view are telephoto, wide-angle, and normal. A wide-angle lens provides a broader view, a normal lens offers a standard view comparable to the human eye, and a telephoto lens allows for a narrower field of view with greater magnification. Axis Communications' technical resources detail these field of view options for different camera lenses.

NEW QUESTION # 25

Which is a benefit of using VLANs and IP subnets?

- A. Network surveillance video can be kept separate from other network traffic, reducing the risk that malicious users will intercept it
- B. The network will only allow access from authorized devices, eliminating the risk that malicious users disconnect cameras to intercept network traffic
- C. The network provides end-to-end encryption to prevent malicious users from intercepting network traffic
- D. An encrypted communication link is established over the internet, allowing surveillance video to be securely viewed off-site

Answer: A

NEW QUESTION # 26

Color temperature is measured in

- A. Lumen.
- B. Lux.
- C. Celsius.
- D. Kelvin.

Answer: D

Explanation:

Color temperature is measured in Kelvin (K). This unit of measurement describes the hue of a specific type of light source, ranging from warm (yellow/red) to cool (blue). Understanding color temperature is crucial for setting up cameras in varying lighting conditions to ensure accurate color reproduction. Axis provides detailed guidance on configuring cameras for optimal performance based on color temperature in their user manuals and technical documentation.

NEW QUESTION # 27

Match each function to the correct video surveillance system component. Drag each gray box from the left column to the matching blue box in the right column.

□

Answer:

Explanation:

□

Explanation:

□

NEW QUESTION # 28

Which of the following causes the image to get black corners?

- A. The lens is intended for a smaller image sensor
- B. The lens is intended for a larger image sensor
- C. WDR is disabled and image is overexposed
- D. WDR is disabled and image is underexposed

Answer: A

"When a lens intended for a larger sensor is used on a smaller sensor camera, the projected image circle does not fully cover the sensor area, causing vignetting or black corners in the image."

- Axis Lens Guide White Paper

"Black corners or vignetting often result from a mismatch between lens and sensor size."

- Axis Communications Academy, Network Video Fundamentals, 2022
