The Best Analytics-Con-301 Latest Braindumps & Leader in Certification Exams Materials & Fantastic Analytics-Con-301 Detail Explanation

2026 Latest ExamBoosts Analytics-Con-301 PDF Dumps and Analytics-Con-301 Exam Engine Free Share:
https://drive.google.com/open?id=1Tkm2xcV_ouhX8Yvt9z2Z0oZpRoWjpCZc

Compared with other education platform on the market, ExamBoosts is more reliable and highly efficiently. It provide candidates who want to pass the Analytics-Con-301 exam with high pass rate study materials, all customers have passed the exam in their first attempt. They all need 20-30 hours to learn on our website can pass the exam. Analytics-Con-301 Exam Dump is really a high efficiently exam tool that can help you save much time and energy to do other things.

Once you establish your grip on our Analytics-Con-301 exam materials, the real exam questions will be a piece of cake for you. There are three different versions of our Analytics-Con-301 study questions for you to choose: the PDF, Software and APP online. Though the displays are totally different, the content of the Analytics-Con-301 Practice Guide is the same. You can pass the exam with no matter whice version you want to buy.

Salesforce Analytics-Con-301 Detail Explanation & New Analytics-Con-301 Exam Sample

Even we have engaged in this area over ten years, professional experts never blunder in their handling of the Analytics-Con-301 exam torrents. By compiling our Analytics-Con-301 prepare torrents with meticulous attitude, the accuracy and proficiency of them is nearly perfect. As the leading elites in this area, our Analytics-Con-301 prepare torrents are in concord with syllabus of the exam. They are professional backup to this fraught exam. So by using our Analytics-Con-301 Exam torrents made by excellent experts, the learning process can be speeded up to one week. They have taken the different situation of customers into consideration and designed practical Analytics-Con-301 test braindumps for helping customers save time. As elites in this area they are far more proficient than normal practice materials' editors, you can trust them totally.

Salesforce Certified Tableau Consultant Sample Questions (Q26-Q31):

NEW QUESTION # 26
From the desktop, open the CC workbook. Use the US Population Estimates data source.
You need to shape the data in US Population Estimates by using Tableau Desktop. The data must be formatted as shown in the following table.
Open the Population worksheet. Enter the total number of records contained in the data set into the Total Records parameter.
From the File menu in Tableau Desktop, click Save.

Answer:

Explanation:
See the complete Steps below in Explanation:
Explanation:
To shape the data in the "US Population Estimates" data source and enter the total number of records into the
"Total Records" parameter in Tableau Desktop, follow these steps:

* Open the CC Workbook and Access the Worksheet:
* From the desktop, double-click on the CC workbook to open it in Tableau Desktop.
* Navigate to the Population worksheet by selecting its tab at the bottom of the window.
* Format and Shape the Data:
* Ensure the data types match those specified in the requirements: Sex, Origin, Race as strings; Year, Age, Population as whole numbers.
* To verify or change the data type, click on the dropdown arrow next to each field name in the Data pane and select "Change Data Type" if necessary.
* Calculate Total Number of Records:
* Create a new calculated field named "Total Records". To do this, right-click in the Data pane and select "Create Calculated Field".
* Enter the formula COUNT([Record ID]) or SUM([Number of Records]) depending on how the data source identifies each row uniquely.
* Drag this new calculated field onto the worksheet to display the total number of records.
* Enter the Value into the Total Records Parameter:
* Locate the "Total Records" parameter in the Data pane. Right-click on the parameter and select
"Edit".
* Manually enter the number displayed from the calculated field into the parameter, ensuring accuracy to meet the data shaping requirement.
* Save Your Changes:
* From the File menu, click 'Save' to ensure all your changes are stored.
References:
Tableau Desktop Guide: Provides detailed instructions on managing data types, creating calculated fields, and updating parameters.
Tableau Data Shaping Techniques: Outlines effective methods for manipulating and structuring data for analysis.
This process will ensure the data in the "US Population Estimates" is accurately shaped according to the specified format and that the total number of records is correctly calculated and entered into the designated parameter. This thorough approach ensures data integrity and accuracy in reporting.

NEW QUESTION # 27
A client notices that while creating calculated fields, occasionally the new fields are created as strings, integers, or Booleans. The client asks a consultant if there is a performance difference among these three data types.
What should the consultant tell the customer?

- A. Strings are fastest, followed by integers, and then Booleans.
- B. Booleans are fastest, followed by integers, and then strings.
- C. Strings, integers, and Booleans all perform the same.
- D. Integers are fastest, followed by Booleans, and then strings.

Answer: D

Explanation:
In Tableau, the performance of calculated fields can vary based on the data type used. Calculations involving integers and Booleans are generally faster than those involving strings. This is because numerical operations are typically more efficient for a computer to process than string operations, which can be more complex and time-consuming. Therefore, when performance is a consideration, it is advisable to use integers or Booleans over strings whenever possible.
References: The performance hierarchy of data types in Tableau calculations is documented in resources that discuss best practices for optimizing Tableau performance1.

NEW QUESTION # 28
A consultant is designing a dashboard that will be consumed on desktops, tablets, and phones. The consultant needs to implement a dashboard design that provides the best user experience across all the platforms.
Which approach should the consultant take to achieve these results?

- A. Build one dashboard and set the size to Automatic.
- B. Build one dashboard for each type of device and fix the size of the layouts.
- C. Build one dashboard and fix the size of the dashboard.
- D. Build one dashboard that has desktop, tablet, and phone layouts, and fix the size of the layouts.

Answer: D

Explanation:
For a consultant designing a dashboard to be consumed across multiple device types, the best approach is:
* Multi-device Layout: Tableau provides the capability to design device-specific layouts within a single dashboard. This feature allows the dashboard to adapt its layout to best fit the screen size and orientation of desktops, tablets, and phones.
* Fixed Size Layouts: By fixing the size of each layout, the consultant can ensure that the dashboard appears consistent and maintains the intended design elements and user experience across devices.
Fixed sizes prevent components from resizing in ways that could disrupt the dashboard's readability or functionality.
* Implementation: In Tableau, you can create these layouts by selecting 'Device Preview' and adding custom layouts for each device type. Here, you define the dimensions and the positioning of sheets and controls tailored to each device's typical viewing mode.
References
This approach leverages Tableau's device designer capabilities, which are specifically designed to optimize dashboards for multiple viewing environments, ensuring a seamless user experience regardless of the device used. This functionality is well documented in Tableau's official guides on creating and managing device- specific dashboards.

NEW QUESTION # 29
A data analyst sets up a calculation to filter a dashboard so that it displays only the users' information. The dashboard will then be published to Tableau Cloud.
The data analyst plans to use the following calculation to filter the data: USERNAME() = [Correct Answer] Which column in the table below should the data analyst reference in the calculation?

- A. Abbreviated Name
- B. Email
- C. Lower case Name

Answer: B

Explanation:
When dashboards are published to Tableau Cloud, the function USERNAME() returns the user's Tableau Cloud username, which is the email address associated with their Tableau Cloud account.
Tableau documentation states:
* On Tableau Cloud, the value returned by USERNAME() is always the user's email address.
* Row-Level Security (RLS) is typically implemented using a comparison of USERNAME() to an email field in the data source.
* For secure filtering, the field compared to USERNAME() must match the authentication identity exactly.
Looking at the provided table:
* "Abbreviated Name" contains short custom codes like "SMiller," which do not match Tableau Cloud usernames.
* "Lower Case Name" contains names like "sean miller," which also do not match Tableau Cloud usernames.
* "Email" contains the full email address for each user, such as "Sean.Miller@superstore.com," which is the only field that corresponds to what USERNAME() returns in Tableau Cloud.
Therefore, the correct field to reference is Email.
* Tableau Cloud authentication documentation stating USERNAME() returns the user's email address.
* Row-Level Security setup guidance recommending the comparison USERNAME() = [Email Field].
* Tableau security practices indicating only the email column will match USERNAME() values on Tableau Cloud.

NEW QUESTION # 30
A client wants to provide sales users with the ability to perform the following tasks:
* Access published visualizations and published data sources outside the company network.
* Edit existing visualizations.
* Create new visualizations based on published data sources.
. Minimize licensing costs.
Which site role should the client assign to the sales users?

- A. Viewer
- B. Explorer (can publish)
- C. Creator
- D. Site Administrator

Answer: B

Explanation:

The Explorer (can publish) site role in Tableau is designed for users who need to access, edit, and create visualizations based on published data sources, even when they are outside the company network. This role allows users to perform web editing and save their work, making it suitable for sales users who need these capabilities. It is also a cost-effective option as it does not require the full capabilities and associated costs of the Creator license.

References: The information about the Explorer (can publish) role and its capabilities can be found in the official Tableau documentation on site roles and permissions12. This role is appropriate for users who need to interact with published content and create new visualizations without the need for full site administration or advanced content creation tools that come with the Creator role3.

NEW QUESTION # 31

......

We have free demo for Analytics-Con-301 learning materials, we recommend you to have a try before buying, so that you can have a deeper understanding of what you are going to buy. In addition, Analytics-Con-301 exam dumps contain both questions and answers, they will be enough for you to pass your exam and get the certificate successfully. In order to build up your confidence for Analytics-Con-301 Learning Materials, we are pass guarantee and money back guarantee if you fail to pass the exam, and the money will be returned to your payment account.
