Real Salesforce Data-Architect Exam Questions with Accurate Answers

Salesforce Certified Data Architect Sample Questions (Q184-Q189):

NEW QUESTION # 184
UC has one SF org (Org A) and recently acquired a secondary company with its own Salesforce org (Org B).
UC has decided to keep the orgs running separately but would like to bidirectionally share opportunities between the orgs in near-real time.
Which 3 options should a data architect recommend to share data between Org A and Org B?
Choose 3 answers.

- A. Use Salesforce Connect and the cross-org adapter to visualize Opportunities into external objects
- B. Leverage middleware tools to bidirectionally send Opportunity data across orgs.
- C. Develop an Apex class that pushes opportunity data between orgs daily via the Apex schedule.
- D. Install a 3rd party AppExchange tool to handle the data sharing
- E. Leverage Heroku Connect and Heroku Postgres to bidirectionally sync Opportunities.

Answer: A,B,E

Explanation:
Leveraging Heroku Connect and Heroku Postgres, middleware tools, or Salesforce Connect and the cross-org adapter are all viable options to share data between Org A and Org B in near-real time3. Installing a 3rd party AppExchange tool may not provide bidirectional sync or may have additional costs. Developing an Apex class that pushes opportunity data between orgs daily via the Apex schedule may not meet the near-real time requirement.

NEW QUESTION # 185
Northern trail Outfitters (NTO) uses Sales Cloud and service Cloud to manage sales and support processes.
Some of NTOs team are complaining they see new fields on their page unsure of which values need be input.
NTO is concerned about lack of governance in making changes to Salesforce.
Which governance measure should a data architect recommend to solve this issue?

- A. Add description fields to explain why the field is used, and mark the field as required.
- B. Create reports to identify which users are leaving blank, and use external data sources o agreement the missing data.
- C. Create validation rules with error messages to explain why the fields is used
- D. Create and manage a data dictionary and ups a governance process for changes made to common objects.

Answer: D

Explanation:
To solve the issue of lack of governance in making changes to Salesforce, a data architect should recommend creating and managing a data dictionary and setting up a governance process for changes made to common objects. A data dictionary is a document that defines the metadata, structure, and relationship of each object and field in Salesforce. A governance process is a set of rules and procedures that govern how changes are proposed, reviewed, approved, and deployed in Salesforce. These measures will help

NTO to maintain consistency, quality, and clarity of their data model and avoid confusion and errors among users. Option A is incorrect because adding description fields to explain why the field is used, and marking the field as required will not prevent unauthorized or unnecessary changes to Salesforce. Option C is incorrect because creating reports to identify which users are leaving blank, and using external data sources to augment the missing data will not address the root cause of the issue, which is the lack of governance in making changes to Salesforce.

Option D is incorrect because creating validation rules with error messages to explain why the fields are used will not stop users from seeing new fields on their page that they are unsure of.

NEW QUESTION # 186

Universal Containers (UC) is transitioning from Classic to Lightning Experience.

What does UC need to do to ensure users have access to its notices and attachments in Lightning Experience?

- A. Add Notes and Attachments Related List to page Layout in Lighting Experience.
- B. Manually upload Notes in Lighting Experience.
- C. Migrate Notes and Attachment to Enhanced Notes and Files a migration tool
- D. Manually upload Attachments in Lighting Experience.

Answer: C

Explanation:

The correct answer is C, migrate Notes and Attachment to Enhanced Notes and Files using a migration tool.

Enhanced Notes and Files are the new features in Lightning Experience that replace the classic Notes and Attachments. They offer more functionality and security than the classic version. To access them in Lightning Experience, you need to migrate your existing Notes and Attachments using a migration tool provided by Salesforce. Adding Notes and Attachments Related List, manually uploading Notes or Attachments, or doing nothing are not valid solutions, as they will not enable you to use the enhanced features in Lightning Experience.

NEW QUESTION # 187

What 2 data management policies does the data classification feature allow customers to classify in salesforce? Choose 2 answers:

- A. Compliance categorization policy.
- B. Data governance policy.
- C. Data sensitivity level
- D. Reference data policy.

Answer: A,C

NEW QUESTION # 188

UC is rolling out Sales App globally to bring sales teams together on one platform. UC expects millions of opportunities and accounts to be creates and is concerned about the performance of the application.

Which 3 recommendations should the data architect make to avoid the data skew? Choose 3 answers.

- A. Limit assigning one user 10000 records ownership.
- B. Limit associating 10000 records looking up to same records.
- C. Use picklist fields rather than lookup to custom object.
- D. Limit associating 10000 opportunities to one account.
- E. Assign 10000 opportunities to one account.

Answer: A,D

NEW QUESTION # 189
