You can set time to test your study efficiency, so that you can accomplish your test within the given time when you are in the Real C_SIGDA_2403 Exam. You will be confident if you have more experience on the C_SIGDA_2403 exam questions!

SAP Certified Associate - Process Data Analyst - SAP Signavio Sample

Questions (Q38-Q43):

NEW QUESTION # 38

How would you explain process transparency in the context of Business Process Management?

- A. Start an investigation to grasp all relevant data at a glance
- B. Highlight departmental boundaries in larger process models
- C. Structure all processes and provide drill-down navigation from the value-chain level to the actual process
- D. Automate processes into the company process structure

Answer: C

Explanation:

Process transparency in Business Process Management ensures stakeholders have clear visibility into process structures and performance. The SAP Signavio Process Transformation Suite Documentation explains:

* Exact Extract: "Process transparency in BPM is achieved by structuring all processes hierarchically and providing drill-down navigation from high-level value chains to detailed process models, enabling stakeholders to understand process flows and performance at various levels." (SAP Signavio Process Transformation Suite Overview, section on "Process Transparency").

* Explanation:

* Option B (Structure all processes and provide drill-down navigation from the value-chain level to the actual process): This is correct as process transparency involves organizing processes in a hierarchical structure (e.g., value chains to subprocesses) and enabling users to navigate from high-level overviews to detailed models, as supported by SAP Signavio Process Manager and Collaboration Hub.

* Option A (Highlight departmental boundaries in larger process models) is incorrect as transparency focuses on process clarity, not emphasizing departmental divisions, which may be a modeling choice but not the definition.

* Option C (Automate processes into the company process structure) is incorrect because automation is a separate BPM activity, not a component of transparency.

* Option D (Start an investigation to grasp all relevant data at a glance) is incorrect as investigations are specific to Process Intelligence analysis, not the broader concept of BPM transparency.

Reference: SAP Signavio Process Transformation Suite Overview, section on "Process Transparency"; SAP Certified Associate - Process Data Analyst Study Guide, Chapter 2: BPM Concepts.

NEW QUESTION # 39
