Salesforce PDI Valid Dumps Sheet - PDI Valid Test Simulator

No study materials can boost so high efficiency and passing rate like our PDI exam reference when preparing the test PDI certification. Our PDI exam practice questions provide the most reliable exam information resources and the most authorized expert verification. Our test bank includes all the possible questions and answers which may appear in the real exam and the quintessence and summary of the exam papers in the past. We strive to use the simplest language to make the learners understand our PDI Exam Reference and passed the PDI exam.

Salesforce Platform Developer I (PDI) Sample Questions (Q138-Q143):

NEW QUESTION # 138
How many Accounts will be inserted by the following block of code?

- A. 0
- B. 1
- C. 2
- D. 3

Answer: A

NEW QUESTION # 139
When the code executes, a DML exception is thrown.
How should a developer modify the code to ensure exceptions are handled gracefully?

- A. Remove null items from the list of Accounts.
- B. Implement Change Data Capture.
- C. Implement a try/catch block for the DML.
- D. Implement the upset DML statement.

Answer: C

Explanation:
* Why a try/catch block is required:
* In Salesforce, DML operations such as insert, update, delete, and upsert can throw exceptions due to issues like validation rule violations, field constraints, or sharing rule restrictions.
* Using a try/catch block ensures that these exceptions are caught and handled gracefully, preventing the entire transaction from failing.
* How to modify the code:
* The update statement in the code can be wrapped in a try/catch block to catch and handle any exceptions that occur. For example:
apex
Copy code

```
public static void insertAccounts(List<Account> theseAccounts) {
try {
for (Account thisAccount : theseAccounts) {
if (thisAccount.website == null) {
thisAccount.website = 'https://www.demo.com';
}
}
update theseAccounts;
} catch (DmlException e) {
System.debug('DML Exception: ' + e.getMessage());
}
}
```

* Why not the other options?
* A. Implement the upsert DML statement:
* upsert is used to either insert or update records based on an external ID or primary key. It does not inherently handle exceptions.
* B. Implement Change Data Capture:
* Change Data Capture (CDC) is used for tracking changes to data in real time and is unrelated to handling DML exceptions.
* D. Remove null items from the list of Accounts:
* While cleaning the input data is a good practice, it does not address the need for exception handling during DML operations.

NEW QUESTION # 140
A developer working on a time management application wants to make total hours for each timecard available to application users.
A timecard entry has a Master-Detail relationship to a timecard.
Which approach should the developer use to accomplish this declaratively?

- A. An Apex trigger that uses an Aggregate Query to calculate the hours for a given timecard and stores it in a custom field

- B. A Process Builder process that updates a field on the timecard when a timecard entry is created
- C. A Roll-Up Summary field on the Timecard Object that calculates the total hours from timecard entries for that timecard
- D. A Visualforce page that calculates the total number of hours for a timecard and displays it on the page

Answer: C

NEW QUESTION # 141

A developer needs to have records with specific field values in order to test a new Apex class.
What should the developer do to ensure the data is available to the test?

- A. Use Anonymous Apex to create the required data.
- B. Use SOQL to query the org for the required data.
- C. Use Test. loadData() and reference a JSON file in Documents.
- D. Use Test.loadData() and reference a CSV file in a static resource.

Answer: D

Explanation:
WhyTest.loadData()?
Simplifies test data creation by loading data from a CSV file stored as a static resource.
Ideal for testing specific field values in bulk.
Why Not Other Options?
A: Querying data from the org violates test isolation principles.
C: Anonymous Apex cannot be used within test classes.
D: JSON files in Documents are not supported byTest.loadData().

NEW QUESTION # 142

A sales manager wants to make sure that whenever an opportunity stage is changed to 'Closed Won', a new case will be of created for the support team to collect necessary information from the customer. How should a developer accomplish this?

- A. Create a workflow rule to create the new case.
- B. Create a Process Builder to create the new case.
- C. Create a lookup field to the Case object on the opportunity object.
- D. Set up a validation rule on the Opportunity Stage.

Answer: B

NEW QUESTION # 143

......

Nowadays the knowledge capabilities and mental labor are more valuable than the manual labor because knowledge can create more wealth than the mental labor. If you boost professional knowledge capabilities in some area you are bound to create a lot of values and can get a good job with high income. Passing the test of PDI Certification can help you achieve that, and our PDI study materials are the best study materials for you to prepare for the test.
