If you are the first time to take part in the exam. We strongly advise you to buy our SAFe-SPC training materials. One of the most advantages is that our SAFe-SPC study braindumps are simulating the real exam environment. Many candidates usually feel nervous in the real exam. If you purchase our SAFe-SPC Guide questions, you do not need to worry about making mistakes when you take the real exam. In addition, you have plenty of time to practice on our SAFe-SPC exam prep.

Scaled Agile SAFe-SPC Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">Accelerating to Business Agility: This section of the exam measures skills of the Organizational Development Specialist and presents the key practices that accelerate Business Agility. It explains how to establish organizational agility and create a continuous learning culture. This final section helps learners understand how enterprises sustain improvement and adapt to future challenges.
Topic 2	<ul style="list-style-type: none">Becoming a Lean Agile Leader: This section of the exam measures skills of the Team Leader and focuses on the mindset required to lead with Lean Agile values. It explains the Lean Agile mindset, reviews SAFe core values, and presents SAFe principles in simple and practical terms. Lesson 2 helps leaders understand how their actions influence team culture and continuous improvement.
Topic 3	<ul style="list-style-type: none">Building Solutions with Agile Product Delivery: This section of the exam measures skills of the Product Owner and focuses on delivering customer centric value. It explains design thinking, backlog prioritization, and program increment planning in a clear manner. It also covers developing on cadence and releasing on demand, followed by an overview of the continuous delivery pipeline with DevOps. Lesson 4 guides learners on building solutions that align with user needs.

Topic 4	<ul style="list-style-type: none"> • Reaching the SAFe Tipping Point: This section of the exam measures skills of the Transformation Champion and addresses the earliest stages of change. It explains how to establish a clear vision for change and how to build a strong guiding coalition. Lesson 8 highlights the importance of commitment and sponsorship at the start of a transformation journey.
Topic 5	<ul style="list-style-type: none"> • Establishing Team and Technical Agility: This section of the exam measures skills of the Agile Practitioner and introduces the characteristics of cross functional Agile teams. It explains the importance of built in quality and describes how Agile Release Trains are organized around the flow of value. Lesson 3 emphasizes the ability of teams to deliver reliable outcomes through technical discipline.
Topic 6	<ul style="list-style-type: none"> • Enhancing the Portfolio: This section of the exam measures skills of the Enterprise Architect and addresses the scaling of value delivery. It discusses launching additional ARTs and value streams, strengthening enterprise solution delivery, and improving portfolio operations. It also reviews Lean governance and the ongoing work of LPM implementation. Lesson 12 focuses on expanding organizational capability.
Topic 7	<ul style="list-style-type: none"> • Leading the Change: This section of the exam measures skills of the Change Leader and focuses on guiding transformation. It reviews how to lead by example, how to lead organizational change, and how to apply the SAFe implementation roadmap. Lesson 6 provides a simple view of the leadership behaviors needed to support enterprise level change.
Topic 8	<ul style="list-style-type: none"> • Thriving in the Digital Age and Business Agility: This section of the exam measures skills of the Agile Team Member and covers the foundations of thriving in a digital environment. It introduces how SAFe functions as an operating system for Business Agility and highlights the essential core competencies needed for modern enterprises. Lesson 1 guides learners on how organizations adapt, innovate, and remain competitive in fast changing markets.
Topic 9	<ul style="list-style-type: none"> • Launching an Agile Release Train: This section of the exam measures skills of the Scrum Master and focuses on the activities required to launch an Agile Release Train. It explains the preparation work, the training of teams, and the launch activities that bring the ART to life. Lesson 10 emphasizes readiness and alignment between teams.
Topic 10	<ul style="list-style-type: none"> • Designing the Implementation: This section of the exam measures skills of the Release Train Engineer and covers the steps for designing a SAFe implementation. It introduces the identification of value streams and Agile Release Trains and describes how to create an implementation plan. Lesson 9 shows how structure and planning support a smooth transformation process.

Maybe you want to get the SAFe-SPC certification, but daily work and long-time traffic make you busier to improve yourself. There is a piece of good news for you. Thanks to our SAFe-SPC Training Materials, you can learn for your SAFe-SPC certification anytime, everywhere. With our SAFe-SPC study materials, you will easily pass the SAFe-SPC examination and gain more confidence. Now let's see our products together.

Scaled Agile SAFe Practice Consultant SPC (6.0) Sample Questions (Q79-Q84):

NEW QUESTION # 79

Typically, SAFe prioritizes Capabilities based on which of the following?

- A. Capacity allocation according to budget
- B. CoD (Cost of Delay)
- C. WSJF (Weighted Shortest Job First)
- D. Business value

Answer: C

Explanation:

SAFe recommends prioritizing Features and Capabilities using the Weighted Shortest Job First (WSJF) method. WSJF incorporates business value, time criticality, risk reduction, opportunity enablement, and job size to determine the most economically valuable items to work on next.

"WSJF is the recommended method for prioritizing Features and Capabilities in the Program and Solution Backlogs." (Source: SAFe 6.0 Framework: WSJF; SPC 6.0 Guide, "Building Solutions with Agile Product Delivery")

NEW QUESTION # 80

What is NOT the responsibility of the Enterprise Architect?

- A. Define the Solution design for Agile Release Trains.
- B. Drive the strategy for maintaining the Enterprise's architecture.
- C. Facilitate reuse of ideas and proven design patterns.
- D. Synchronize the technology stack and infrastructure across Value Streams.

Answer: A

Explanation:

Enterprise Architects focus on cross-ART and cross-Value Stream strategy and technical alignment. Defining Solution design for Agile Release Trains (C) is the responsibility of Solution/System Architects at the ART or Solution Train level, not Enterprise Architects.

"Enterprise Architects define and communicate a shared technical and architectural vision for the enterprise.

Solution and System Architects design at the ART/Solution Train level." (Source: SAFe 6.0 Framework: Enterprise Architect, Solution Architect)

NEW QUESTION # 81

In SAFe, Dunbar's number provides guidance for:

- A. The percent utilization that enables a sustainable pace.
- B. The number of members on a self-managing, self-organizing ART.
- C. The maximum number of tasks in a Program Increment for optimal predictability.
- D. The number of Stories created during PI Planning to enable commitment.

Answer: B

Explanation:

Dunbar's number suggests a limit to the size of a cohesive, collaborative group, typically cited as 125-150 people. SAFe references Dunbar's number when suggesting the optimal size of an Agile Release Train (ART).

"Dunbar's number-around 125 people-provides a guideline for the maximum size of an ART." (Source: SAFe 6.0 Framework: Agile Release Train, Dunbar's Number)

NEW QUESTION # 82

Multiple ARTs in a Value Stream typically require coordination at the Value Stream Level.

- A. True
- B. False

Answer: A

Explanation:

In SAFe, when a solution requires more capacity than a single ART (Agile Release Train) can provide, multiple ARTs are grouped into a Solution Train. These ARTs work together within a Value Stream. The Value Stream level provides coordination, additional roles, and artifacts to align the multiple ARTs toward delivering larger, complex solutions.

"When multiple ARTs collaborate to build a solution, coordination at the Value Stream level is required. The Solution Train roles and events support alignment and integration of the work across ARTs and Suppliers." References:

SAFe 6.0 Framework: Solution Train and Value Stream Level

NEW QUESTION # 83

(Select 3) Enablers can be used for any activities that are necessary to support upcoming business features, but generally they fall in one of 3 categories:

- A. Vertical slice of a feature
- **B. Architecture**
- C. Team tasks
- **D. Exploration**
- **E. Infrastructure**

Answer: B,D,E

NEW QUESTION # 84

.....
