Only if you receive the certificate the companies require you can have the opportunities for raising-salary and promotion. Thousands of companies think highly of this certification. You will be popular if you pass exam with C-S4CPB-2502 Latest Test Cram sheet.

SAP C-S4CPB-2502 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"> • System Landscapes and Identity Access Management: This section of the exam measures skills of SAP Cloud ERP Consultant and involves understanding SAP's system landscape in the cloud, including tenants and environments. It also focuses on identity and access management, covering how user roles, permissions, and security are managed across the cloud ecosystem.
Topic 2	<ul style="list-style-type: none"> • Configuration and the SAP Fiori Launchpad: This section of the exam measures skills of SAP Cloud ERP Consultant and focuses on setting up system configurations in SAP Cloud ERP and understanding how to manage user navigation and interface personalization through the SAP Fiori Launchpad. It tests the consultant's ability to configure and align user experience with business roles.
Topic 3	<ul style="list-style-type: none"> • Introduction to Cloud Computing and SAP Cloud ERP Basics: This section of the exam measures skills of ERP Implementation Project Manager and assesses foundational knowledge of cloud computing principles and SAP Cloud ERP structure. It ensures understanding of key differences from on-premise ERP, cloud deployment benefits, and basic navigation of cloud ERP systems.
Topic 4	<ul style="list-style-type: none"> • Data Migration and Business Process Testing: This section of the exam measures skills of SAP Cloud ERP Consultant and evaluates the ability to plan and execute data migration strategies and validate business processes through structured testing. Candidates are expected to be familiar with tools and methods for importing legacy data and confirming its integrity post-migration.
Topic 5	<ul style="list-style-type: none"> • Extensibility and Integration: This section of the exam measures skills of SAP Cloud ERP Consultant and deals with the capabilities of extending SAP applications to meet custom business requirements and integrating with other systems or services. The focus is on knowing when to extend standard functionality and how to ensure smooth system integration in a cloud context.

SAP Certified Associate - Implementation Consultant - SAP S/4HANA Cloud Public Edition Sample Questions (Q39-Q44):

NEW QUESTION # 39

Which solution is designed to help customers understand their environmental, social, and governance (ESG) data?

- A. SAP Responsible Design and Production
- B. SAP Green Token
- C. SAP Sustainability Footprint Management
- **D. SAP Sustainability Control Tower**

Answer: D

NEW QUESTION # 40

Which activities does the consultant do before the first Fit-to-Standard workshop? Note: There are 2 correct answers to this question.

- A. Upload customer master data in the Starter system using migration templates.
- **B. Deactivate scope items that are NOT part of the Statement of Work/Digital Discovery Assessment.**
- C. Evaluate the L2 Business-Driven Configuration Questionnaire responses.
- **D. Review the integration requirements collected from the Digital Discovery Assessment.**

Answer: B,D

Explanation:

Before the first Fit-to-Standard workshop, the consultant should do the following activities:

* Deactivate scope items that are NOT part of the Statement of Work/Digital Discovery Assessment. This is to ensure that the Starter system reflects the agreed scope of the project and does not include any unnecessary or out-of-scope items. The consultant can use the Scope Item Management app to deactivate scope items.

* Review the integration requirements collected from the Digital Discovery Assessment. This is to understand the customer's integration needs and prepare for the integration topics that will be discussed in the Fit-to-Standard workshop. The consultant can

use the Integration Solution Advisor tool to review the integration requirements and the recommended integration scenarios².

The consultant should NOT do the following activities before the first Fit-to-Standard workshop:

* Upload customer master data in the Starter system using migration templates. This is not required before the first Fit-to-Standard workshop, as the customer master data is not relevant for the process validation. The consultant should upload the customer master data in the Quality system after the Fit-to-Standard workshop, using the SAP S/4HANA Migration Cockpit³.

* Evaluate the L2 Business-Driven Configuration Questionnaire responses. This is not required before the first Fit-to-Standard workshop, as the L2 Business-Driven Configuration Questionnaire is not available at this stage. The consultant should evaluate the L2 Business-Driven Configuration Questionnaire responses after the Fit-to-Standard workshop, using the SAP Activate Methodology.

NEW QUESTION # 41

What can you do with the SAP for me mobile app? Note: There are 2 correct answers to this question.

- A. Access the SAP ONE Support Launchpad
- **B. Interact with SAP easily**
- C. Download learning content from SAP Learning Hub
- **D. Get full transparency into your SAP product portfolio**

Answer: B,D

NEW QUESTION # 42

Which of the following requirements need to be documented in SAP Cloud ALM during the Fit-to-Standard workshops? Note: There are 2 correct answers to this question.

- A. A business role restriction
- **B. A process flow diagram**
- **C. A configuration value**
- D. An SAP Fiori app customization

Answer: B,C

NEW QUESTION # 43

Who should be identified and assigned the role of the IT Contact immediately when the implementation begins?

- A. Customer project manager
- **B. Customer system admin**
- C. Partner lead configuration expert
- D. Partner project manager

Answer: B

Explanation:

The IT Contact is the person who is responsible for setting up the initial system access, provisioning users, and managing authentication for the SAP S/4HANA Cloud Public Edition project. The IT Contact should be identified and assigned immediately when the implementation begins, as they will receive all the SAP communications and notifications related to the system setup and configuration. The IT Contact should also be available and accessible throughout the project, and collaborate with the project team and the business stakeholders¹.

The IT Contact should be someone who is a hands-on system administrator, not an executive. They should have the skills and experience to perform the system administration tasks, such as creating users, assigning roles, configuring identity providers, and troubleshooting issues. They should also be committed and engaged with the project, and provide feedback and participate in testing and training activities¹.

Therefore, the correct answer is C, as the customer system admin is the most suitable person to be the IT Contact for the SAP
