ISACA COBIT 2019 Design and Implementation Sample Questions (Q111-Q116):

NEW QUESTION # 111

Which implementation lifecycle phase is MOST concerned with sustaining the improvements achieved?

- A. Phase 4-What needs to be done?

- B. Phase 5-How do we get there?
- C. Phase 6-Did we get there?
- **D. Phase 7-How do we keep the momentum going?**

Answer: D

Explanation:

Phase 7 reviews the overall success of the initiative, identifies further governance requirements, and reinforces new behaviors so that improvements become embedded and sustained.

NEW QUESTION # 112

Which of the following is the PRIMARY benefit or output derived from setting targeted capability levels and performing a capability-level gap analysis for selected processes?

- **A. Identification of process improvement opportunities**
- B. Development of enterprise goals that align to established targets
- C. Development of a business case outline
- D. Identification and mitigation of all identified risks

Answer: A

Explanation:

"Comparing current and target capability levels reveals gaps that highlight opportunities for process improvement, helping organizations plan targeted enhancements." This analysis is fundamental to improvement planning.

NEW QUESTION # 113

Which of the following functions would be responsible for executing a contract that retains independent legal consultants to review the level of regulatory compliance of a proposed IT solution?

- **A. Legal office**
- B. Procurement office
- C. I&T security
- D. Executive leadership team

Answer: A

Explanation:

The function responsible for executing a contract that retains independent legal consultants to review the level of regulatory compliance of a proposed IT solution is the Legal Office. This function ensures that all legal aspects, including compliance with regulations, are thoroughly reviewed and addressed.

NEW QUESTION # 114

An enterprise achieves maturity level 3 for a focus area. What does this indicate?

- A. The enterprise has documented but not implemented the processes
- B. Only the most critical process has reached level 3
- C. The average capability score across processes is 3
- **D. All processes in the focus area have reached at least capability level 3**

Answer: D

Explanation:

Maturity levels apply to focus areas and are achieved only when all processes contained within that focus area have reached the corresponding capability level. This makes maturity a stricter, aggregate measure.

NEW QUESTION # 115

Which of the following is a KEY consideration when determining the initial scope of a governance system?

- A. The size of the enterprise
- B. The role of IT within the enterprise
- **C. Current I&T-related issues of the enterprise**
- D. Compliance requirements faced by the enterprise

Answer: C

Explanation:

When determining the initial scope of a governance system, one of the key considerations is the current I&T-related issues of the enterprise. Understanding and addressing these issues ensures that the governance system is relevant and focused on the areas that need the most attention and improvement. This approach aligns with the practical and contextual nature of COBIT 2019, which emphasizes tailoring governance solutions to the specific needs and circumstances of the enterprise.

NEW QUESTION # 116

.....

The education level of the country has been continuously improved. At present, there are more and more people receiving higher education, and even many college graduates still choose to continue studying in school. Getting the test COBIT-2019-Design-and-Implementation certification maybe they need to achieve the goal of the learning process, have been working for the workers, have more qualifications can they provide wider space for development. The COBIT-2019-Design-and-Implementation Study Materials can provide them with efficient and convenient learning platform so that they can get the certification as soon as possible in the shortest possible time.
