

# Exam Topics Microsoft AZ-500 Pdf | Valid AZ-500 Exam Simulator

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.  
After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.  
You have an app named App1 that is installed on two Azure virtual machines named VM1 and VM2. Connections to App1 are managed by using an Azure Load Balancer.  
The effective network security configurations for VM2 are shown in the following exhibit.

You discover that connections to App1 from 131.107.100.50 over TCP port 443 fail. You verify that the Load Balancer rules are configured correctly. You need to ensure that connections to App1 can be established successfully from 131.107.100.50 over TCP port 443.  
Solution: You create an inbound security rule that denies all traffic from the 131.107.100.50 source and has a cost of 64999.  
Does this meet the goal?

- A. Yes
- B. No

## Three Best Formats of Microsoft AZ-500 Practice Test Questions

Everything needs a right way. The good method can bring the result with half the effort, the same different exam also needs the good test method. Our AZ-500 study questions in every year are summarized based on the test purpose, every answer is a template, there are subjective and objective exams of two parts, we have in the corresponding modules for different topic of deliberate practice. To this end, our AZ-500 Training Materials in the qualification exam summarize some problem-solving skills, and induce some generic templates. The user can scout for answer and scout for score based on the answer templates we provide, so the universal template can save a lot of precious time for the user.

Microsoft AZ-500 Exam covers a wide range of topics, including Azure security management, network security, identity and access management, and platform protection. To pass the exam, candidates must demonstrate a deep understanding of these topics, as well as their ability to apply security best practices and industry standards to real-world scenarios.

## Microsoft Azure Security Technologies Sample Questions (Q397-Q402):

### NEW QUESTION # 397

You have an Azure SQL database.

You implement Always Encrypted.

You need to ensure that application developers can retrieve and decrypt data in the database.

Which two pieces of information should you provide to the developers? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

- A. the column encryption key
- B. user credentials
- C. the column master key
- D. a stored access policy
- E. a shared access signature (SAS)

**Answer: A,C**

#### NEW QUESTION # 398

You have been tasked with applying conditional access policies for your company's current Azure Active Directory (Azure AD).

The process involves assessing the risk events and risk levels.

Which of the following is the risk level that should be configured for users that have leaked credentials?

- A. High
- B. Low
- C. None
- D. Medium

**Answer: A**

Explanation:

These six types of events are categorized in to 3 levels of risks - High, Medium & Low:

#### NEW QUESTION # 399

You have an Azure subscription that contains the virtual networks shown in the following table.

The Azure virtual machines on SpokeVNetSubnet0 can communicate with the computers on the on-premises network.

You plan to deploy an Azure firewall to HubVNet.

You create the following two routing tables:

\* RT1: Includes a user-defined route that points to the private IP address of the Azure firewall as a next hop address

\* RT2: Disables BGP route propagation and defines the private IP address of the Azure firewall as the default gateway You need to ensure that traffic between SpokeVNetSubnet0 and the on-premises network flows through the Azure firewall.

To which subnet should you associate each route table? To answer, drag the appropriate subnets to the correct route tables. Each subnet may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

**Answer:**

Explanation:

#### NEW QUESTION # 400

You have an Azure subscription that contains an Azure key vault named ContosoKey1.

You create users and assign them roles as shown in the following table.

You need to identify which users can perform the following actions:

Delegate permissions for ContosoKey1.

Configure network access to ContosoKey1.

Which users should you identify? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

**Answer:**

experiment.com, www.wetrc.dripsprinklerirrigation.pk, www.stes.tyc.edu.tw, wjhsd.instructure.com, Disposable vapes
