The MS-721 exam is a beta exam designed for IT professionals who want to validate their skills in configuring and managing communication and collaboration solutions in the Microsoft environment. MS-721 exam covers various topics such as Skype for Business and Microsoft Teams, and candidates who pass the exam will demonstrate their proficiency in these solutions. To prepare for the exam, candidates should have a good understanding of Microsoft communication and collaboration solutions and take the official training course.

Passing the MS-721 Exam can lead to the Microsoft Certified: Collaboration Communications Systems Engineer certification, which validates the candidate's expertise in designing, deploying, and managing Microsoft collaboration and communication systems. Collaboration Communications Systems Engineer certification can help professionals advance their careers in IT, as it demonstrates their proficiency in a critical area of Microsoft technology.

Get Help from Real and Experts Verified TestPassed MS-721 Exam Dumps

As you know, your company will introduce new talent each year. In the face of their excellent resume, you must improve your strength to keep your position! Our MS-721 study questions may be able to give you some help. What you need may be an internationally-recognized MS-721 certificate, perhaps using the time available to complete more tasks. With our MS-721 study materials, you will pass the exam in the shortest possible time.

The MS-721 Exam is a beta exam, which means it is still in development and undergoing testing. Microsoft offers beta exams to allow candidates to provide feedback on the exam questions and to help shape the final exam. Beta exams are usually offered at a discounted price, and candidates who pass the beta exam will receive the certification just like those who take the final exam. However, beta exams may have a longer waiting time for results and may have a higher level of difficulty than the final exam.

Microsoft Collaboration Communications Systems Engineer Sample Questions (Q163-Q168):

NEW QUESTION # 163

You have a Microsoft Teams Phone deployment.

You need to recommend a Teams integration solution that meets the following requirements:

- * Announces the queue position of waiting callers
- * Integrates Teams Graph APIs and Cloud Communications APIs for Teams without Direct Routing

These are the selections for the first missing value.

New-CsOnlineLisLocation
New-CsTenantNetworkSite
New-CsTenantNetworkSubnet
New-CsTenantTrustedIPAddress

-IPAddress
-SiteAddress
-SubnetID

"10.10.0.0" -MaskBits "22" -NetworkSiteID "OH1"

Answer:

Explanation:

NEW QUESTION # 165

Your company has offices in Seattle.

You deploy Microsoft Teams Phone. You have three Session Border Controller (SBCs) named SBC1, SBC2, and SBC3.

You need to configure voice routing to meet the following requirements:

All calls to area codes 425 and 206 must attempt to go to SBC1, and if SBC1 is unavailable, fail over to SBC2.

All other calls to the United States and Canada must go out through SBC2.

International calls must go out through SBC2 or SBC3.

How should you complete the PowerShell script? To answer, drag the appropriate values to the correct targets. Each value may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Values	Answer Area
'sbc1.contoso.com'	New-CsOnlineVoiceRoute -Identity 'Redmond' -NumberPattern '^+1(425 206)(\d{7})\$' -OnlinePstnGatewayList
'sbc2.contoso.com'	New-CsOnlineVoiceRoute -Identity 'US and Canada' -NumberPattern '^+1(\d{10})\$' -OnlinePstnGatewayList
'sbc3.contoso.com'	New-CsOnlineVoiceRoute -Identity 'All other calls' -NumberPattern '^+(?!1)\d+' -OnlinePstnGatewayList
'sbc1.contoso.com', 'sbc2.contoso.com'	
'sbc2.contoso.com', 'sbc3.contoso.com'	
'sbc1.contoso.com', 'sbc3.contoso.com'	

Answer:

Explanation:

Values	Answer Area
'sbc1.contoso.com'	New-CsOnlineVoiceRoute -Identity 'Redmond' -NumberPattern '^+1(425 206)(\d{7})\$' -OnlinePstnGatewayList
'sbc2.contoso.com'	New-CsOnlineVoiceRoute -Identity 'US and Canada' -NumberPattern '^+1(\d{10})\$' -OnlinePstnGatewayList
'sbc3.contoso.com'	New-CsOnlineVoiceRoute -Identity 'All other calls' -NumberPattern '^+(?!1)\d+' -OnlinePstnGatewayList
'sbc1.contoso.com', 'sbc2.contoso.com'	
'sbc2.contoso.com', 'sbc3.contoso.com'	
'sbc1.contoso.com', 'sbc3.contoso.com'

NEW QUESTION # 166

Hotspot Question

Your company has a Microsoft Teams Phone deployment and the following departments:

- Sales
- Research

You have the users shown in the following table.

You need to meet the following requirements:

- User2 must be able to receive and make calls on behalf of User1.
- User4 and User5 must not hear a ring tone and must see only a banner in the Teams client when User3 receives a call.

What should you configure to meet each requirement? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

NEW QUESTION # 167

Hotspot Question

You have a Microsoft Teams Phone deployment.

You need to enable a user named User1 to use the Shared Calling feature.

How should you complete the PowerShell command? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

□ Explanation:

```
New-CsTeamsSharedCallingRoutingPolicy -Identity User1 -
```

Enterprise Voice Enabled \$true

Command: `New-CsTeamsSharedCallingRoutingPolicy`

Parameters: -Identity User1 -EnterpriseVoiceEnabled \$true

New-CsTeamsSharedCallingRoutingPolicy: This command creates a new shared calling routing policy, which is required to enable Shared Calling.

-EnterpriseVoiceEnabled \$true: Enables Enterprise Voice, which is necessary for making and receiving PSTN calls.
