Topic 6	<ul style="list-style-type: none"> Introduction to TOGAF Business Architecture Foundation: This topic gives aspiring TOGAF business architects basic knowledge about the Business Architecture Foundation.

The Open Group TOGAF Business Architecture Foundation Exam Sample Questions (Q108-Q113):

NEW QUESTION # 108

Consider the following output from Phase A:
What is this an example of?

- A. Organization Map
- B. Capability Map
- C. Value Stream Map
- D. Process Map

Answer: B

Explanation:

The diagram provided illustrates a Capability Map. Here's why:

Focus on "what" the organization does: The diagram depicts various functions and activities that the organization performs, such as "Program/Human Resource Matching," "Employee Supply and Demand Mgmt," "Benefits Management," etc. These represent the capabilities of the organization, or what it is able to do.

Hierarchical structure: The capabilities are organized hierarchically, with broader functions like "HR Mgmt." encompassing more specific capabilities like "Position Advertising" and "Skills Assessment." This shows how different capabilities relate to each other and contribute to higher-level functions.

No specific process flow: Unlike a process map or value stream map, this diagram doesn't show a sequence of steps or flow of activities. It focuses on the capabilities themselves, not how they are executed.

NEW QUESTION # 109

Consider the following extract of a model showing relationships between Business Architecture concepts:

- A. Receives

- B. Consists of
- C. Creates
- D. Enables

Answer: B

Explanation:

In the context of TOGAF and Business Architecture, the diagram depicts the relationship between a Value Stream, Value Stage, and Value.

Value Stream: Represents the end-to-end set of activities that create and deliver value to a stakeholder.

Value Stage: A distinct step or phase within the Value Stream.

Value: The benefit delivered to the stakeholder.

The relationship "X" indicates that a Value Stream is composed of multiple Value Stages.

Think of it like a journey (Value Stream) with multiple stops along the way (Value Stages). Each stage contributes to the overall value delivered at the end of the journey.

NEW QUESTION # 110

Consider the diagram.

What are the items labelled A, B and C?

- A. A-Enterprise Continuum, B-Architecture Continuum, C-Solutions Continuum
- B. A-Architecture Vision, B-Business Architecture, C-Information Systems Architecture
- C. A-Enterprise Strategic Architecture, B-Segment Architecture, C-Solutions Architecture
- D. A-Enterprise Architecture, B-Architecture Building Blocks, C-Solutions Building Blocks

Answer: A

Explanation:

The diagram shows the Enterprise Continuum, which is a view of the Architecture Repository that provides methods for classifying architecture and solution artifacts as they evolve from generic Foundation Architectures to Organization-Specific Architectures⁴. The Enterprise Continuum comprises two complementary concepts: the Architecture Continuum and the Solutions Continuum. The Architecture Continuum shows the relationships among foundational frameworks, common system architectures, industry architectures, and enterprise architectures⁴. The Solutions Continuum shows the relationships among foundational solutions, common system solutions, industry solutions, and enterprise solutions⁴.

NEW QUESTION # 111

Consider the following graphic illustrating a method supporting the TOGAF ADM.

□ What does the method help identify?

- A. Business Scenarios
- B. Solution Building Blocks
- C. Alternative Target Architectures
- D. Architecture Solutions

Answer: C

Explanation:

The graphic illustrates a method for developing alternative target architectures in Phase E of the TOGAF ADM¹. The method involves identifying and evaluating candidate architectures based on criteria such as business value, cost, risk, and feasibility¹. The method helps to identify the most suitable architecture solution for the enterprise.

NEW QUESTION # 112

Consider the following Business Capability Example:

□ Which of the following are A and C?

- A. Organization. Data.
- B. Who. What.

- C. Roles, Information.
- D. Actors, Actions.

Answer: C

Explanation:

According to the TOGAF Business Capabilities Guide V2, a business capability is defined as "the expression or the articulation of the capacity, materials, and expertise an organization needs in order to perform core functions"⁵. A business capability can be decomposed into four elements: roles, information, processes, and technology⁵. In the given example, A represents roles and C represents information.

In the context provided in the image, 'A' refers to the roles involved in the recruitment management process, which in this case is the 'User: Recruiter' and the 'Stakeholders: Manager, Candidate Employee'. 'C' refers to the information or data aspects of the process, which includes 'Candidate/Applicant Details', 'Position Descriptions', 'Recruitment Agency Data', and 'Industry Standard Role Definitions'. Thus, 'A' corresponds to 'Roles' and 'C' to 'Information'.
