

Right SAP C-BW4H-2505 Questions: Epic Ways to Pass Exam [2026]

www.ERPPrep.com
This SAP Certified Associate - Data Engineer - SAP BW/4HANA (C_BW4H_2505) exam guide is your strategic resource for mastering the core topics and passing the certification on your first attempt. It includes a comprehensive syllabus breakdown, key exam details, recommended study materials, and a curated set of realistic sample questions. Learn critical concepts such as SAP BW/4HANA modeling, data acquisition, query design, native HANA modeling, and analytics tools. This guide ensures you stay focused on high-impact areas, helping you earn your SAP certification with confidence.

P.S. Free 2026 SAP C-BW4H-2505 dumps are available on Google Drive shared by Prep4sureExam:

Prep4sureExam are specialized in providing our customers with the most reliable and accurate C-BW4H-2505 exam guide and help them pass their C-BW4H-2505 exams by achieve their satisfied scores. With our C-BW4H-2505 study materials, your exam will be a piece of cake. We have a lasting and sustainable cooperation with customers who are willing to purchase our C-BW4H-2505 Actual Exam. We try our best to renovate and update our C-BW4H-2505 study materials in order to help you fill the knowledge gap during your learning process, thus increasing your confidence and success rate.

SAP C-BW4H-2505 Exam Syllabus Topics:

| Topic | Details |
|---------|---|
| Topic 1 | <ul style="list-style-type: none">• SAP BW• 4HANA Modeling: This section targets the skills of Data Engineers in selecting appropriate modeling options and applying best practices like LSA++ within SAP BW• 4HANA. It focuses on designing scalable, high-performing data models. |
| Topic 2 | <ul style="list-style-type: none">• InfoObjects and InfoProviders: This section tests the knowledge of Data Engineers in working with InfoObjects and InfoProviders in SAP BW• 4HANA. It involves handling data structures used for organizing, storing, and accessing analytical data. |

| | |
|---------|---|
| Topic 3 | <ul style="list-style-type: none"> • Data Acquisition into SAP HANA: This section evaluates the capacity of SAP Consultants to integrate various data sources into SAP HANA. It assesses their ability to understand different ingestion techniques and ensure data accessibility for processing. |
| Topic 4 | <ul style="list-style-type: none"> • SAP BW • 4HANA Data Flow: This section of the exam measures the practical ability of SAP Consultants to load data within the SAP BW • 4HANA environment. It assesses familiarity with data movement and transformation processes across different layers of the system. |
| Topic 5 | <ul style="list-style-type: none"> • SAP Analytics Tools and SAP Analytics Cloud: This section evaluates the skills of SAP Consultants in using tools like SAP Analytics Cloud, Lumira, and Analysis for Office to visualize and interpret data. It focuses on the consultant's ability to apply business intelligence tools within the SAP ecosystem. |
| Topic 6 | <ul style="list-style-type: none"> • SAP BW Query Design: This section of the exam assesses the ability of Data Engineers to create and run queries using SAP BW • 4HANA. It evaluates how well candidates can work with query components to retrieve and structure data effectively for reporting and analysis. |
| Topic 7 | <ul style="list-style-type: none"> • Data Acquisition into SAP BW • 4HANA: This section tests how Data Engineers manage data integration into SAP BW • 4HANA from multiple sources. It covers essential knowledge of tools and processes used for data extraction, transformation, and loading into the SAP environment. |

Prep4sureExam provides SAP C-BW4H-2505 desktop-based practice software for you to test your knowledge and abilities. The C-BW4H-2505 desktop-based practice software has an easy-to-use interface. You will become accustomed to and familiar with the free demo for SAP C-BW4H-2505 Exam Questions. Exam self-evaluation techniques in our C-BW4H-2505 desktop-based software include randomized questions and timed tests. These tools assist you in assessing your ability and identifying areas for improvement to pass the SAP Certified Associate - Data Engineer - SAP BW/4HANA exam.

SAP Certified Associate - Data Engineer - SAP BW/4HANA Sample Questions (Q46-Q51):

NEW QUESTION # 46

What does a CompositeProvider allow you to do in SAP BW/4HANA? Note: There are 3 correct answers to this question.

- A. Create new calculated fields
- B. Integrate SAP HANA calculation views
- C. Combine InfoProviders using Joins and Unions
- D. Define new restricted key figures
- E. Join two ABAP CDS views

Answer: A,C,D

NEW QUESTION # 47

Which development object needs to be built to generate an HDI Container?

- A. Package
- B. Space
- C. HDB module
- D. SQL script procedure

Answer: C

NEW QUESTION # 48

Why do you set Read Access Type to "SAP HANA View" in a BW InfoObject?

- A. To enable parallel loading of master data texts
- B. To generate an SAP HANA calculation view, data category Dimension
- C. To use the InfoObject as an association within an Open ODS view
- **D. To report master data attributes which are defined in calculation views**

Answer: D

NEW QUESTION # 49

You have already loaded data from a non-SAP system into SAP Datasphere. You want to federate this data with data from an InfoCube of your SAP BW powered by SAP HANA.

What do you need to use to combine the data?

- A. SAP BW/4HANA Model Transfer
- B. SAP BW Shell Migration
- C. SAP BW Remote Migration
- **D. SAP ABAP Connection**

Answer: D

Explanation:

To federate data between SAP Datasphere and an InfoCube in SAP BW powered by SAP HANA, you need to establish a connection that allows SAP Datasphere to access the data stored in the InfoCube. Below is an explanation of the options:

* Explanation: This is the correct answer. An SAP ABAP Connection allows SAP Datasphere to connect to an SAP BW system and access its data objects, including InfoCubes. This connection leverages the ABAP stack to enable seamless integration between SAP Datasphere and SAP BW.

1: SAP Datasphere supports SAP BW connections via the ABAP stack, enabling federated queries and data access. This is documented in SAP's integration guides for SAP Datasphere and SAP BW.

2. SAP BW Shell Migration Explanation: This option is incorrect. SAP BW Shell Migration refers to the process of migrating SAP BW objects (e.g., InfoCubes, DataStore Objects) to SAP BW/4HANA. It is not related to federating data between SAP Datasphere and SAP BW.

Reference: Shell migration is a one-time activity focused on upgrading SAP BW systems to SAP BW/4HANA, as described in SAP's migration documentation.

3. SAP BW Remote Migration Explanation: This option is incorrect. SAP BW Remote Migration involves moving data and objects from a remote SAP BW system to SAP BW/4HANA. Like Shell Migration, it is not relevant to federating data with SAP Datasphere.

Reference: Remote migration is part of SAP's BW/4HANA transition strategy and does not address real-time data federation.

4. SAP BW/4HANA Model Transfer Explanation: This option is incorrect. SAP BW/4HANA Model Transfer refers to transferring BW models (e.g., InfoCubes, DataSources) to SAP BW/4HANA. It is unrelated to federating data between SAP Datasphere and SAP BW.

Reference: Model transfer is a migration activity, not a mechanism for real-time data integration or federation.

Conclusion To federate data from an InfoCube in SAP BW powered by SAP HANA with SAP Datasphere, you need to use an SAP ABAP Connection. This connection enables SAP Datasphere to access and query data from the InfoCube in real time, facilitating seamless integration between the two systems.

NEW QUESTION # 50

You created an Open ODS View on an SAP HANA database table to virtually consume the data in SAP BW/4HANA. Real-time reporting requirements have now changed you are asked to persist the data in SAP BW/4HANA.

Which objects are created when using the "Generate Data Flow" function in the Open ODS View editor?

Note: There are 3 correct answers to this question.

- A. CompositeProvider

- B. Data source
- C. Transformation
- D. SAP HANA calculation view
- E. DataStore object (advanced)

Answer: B,C,E

Explanation:

* Open ODS View: An Open ODS View in SAP BW/4HANA allows virtual consumption of data from external sources (e.g., SAP HANA tables). It does not persist data but provides real-time access to the underlying source.

* Generate Data Flow Function: When using the "Generate Data Flow" function in the Open ODS View editor, SAP BW/4HANA creates objects to persist the data for reporting purposes. This involves transforming the virtual data into a persistent format within the BW system.

* Generated Objects:

* DataStore Object (Advanced): Used to persist the data extracted from the Open ODS View.

* Transformation: Defines how data is transformed and loaded into the DataStore Object (Advanced).

* Data Source: Represents the source of the data being persisted.

Key Concepts: Objects Created by "Generate Data Flow": When you use the "Generate Data Flow" function in the Open ODS View editor, the following objects are created:

* DataStore Object (Advanced): This is the primary object where the data is persisted. It serves as the storage layer for the data extracted from the Open ODS View.

* Transformation: A transformation is automatically generated to map the fields from the Open ODS View to the DataStore Object (Advanced). This ensures that the data is correctly structured and transformed during the loading process.

* Data Source: A data source is created to represent the Open ODS View as the source of the data. This allows the BW system to extract data from the virtual view and load it into the DataStore Object (Advanced).

* B. SAP HANA Calculation View: While Open ODS Views may be based on SAP HANA calculation views, the "Generate Data Flow" function does not create additional calculation views. It focuses on persisting data within the BW system.

* E. CompositeProvider: A CompositeProvider is used to combine data from multiple sources for reporting. It is not automatically created by the "Generate Data Flow" function.

References: SAP BW/4HANA Documentation on Open ODS Views: The official documentation explains the

"Generate Data Flow" function and its role in persisting data.

SAP Note on Open ODS Views: Notes such as 2608998 provide details on how Open ODS Views interact with persistent storage objects.

SAP BW/4HANA Best Practices for Data Modeling: These guidelines recommend using transformations and DataStore Objects (Advanced) for persisting data from virtual sources.

By using the "Generate Data Flow" function, you can seamlessly transition from virtual data consumption to persistent storage, ensuring compliance with real-time reporting requirements.

NEW QUESTION # 51

.....

In this era, everything is on the rise. Do not you want to break you own? Double your salary, which is not impossible. Through the SAP C-BW4H-2505 Exam, you will get what you want. Prep4sureExam will provide you with the best training materials, and make you pass the exam and get the certification. It's a marvel that the pass rate can achieve 100%. This is indeed true, no doubt, do not consider, act now.
