ISQI IREB Certified Professional for Requirements Engineering, Foundation Level Sample Questions (Q77-Q82):

NEW QUESTION # 77

Requirements elicitation: Your company has received a customer contract to develop a system for the scheduling of the customer's delivery vans.

It is your task to identify the requirements for this scheduling system. You have arranged appointments for interviews with three key members of the customer's staff, and are now preparing interview questions.

Which of the questions below are appropriate interview questions for the requirements elicitation? (2 Points)

- A. If the delivery deadline is not met, is a contract penalty to be paid?
- B. What are the most important technical terms for the application and how are they defined?
- C. What data quantities / data rates are to be processed?
- D. When is the installation of the completed system to be started?

Answer: C

NEW QUESTION # 78

Evaluate the following guidelines as to whether they should or should not be adhered to when writing a requirements specification: (2 Points)

Adhere to	Not adhere to	
A	B	Minimize the number of headers in order to reduce the size of the document.
C	D	Only one requirement per sentence, no nesting of requirements.
E	F	Highlight legally binding requirements in italics
G	H	Use of a consistent terminology
I	J	Interesting and diverse style of writing
K	L	Use of sentence-templates for requirements formulation
M	N	Use of short sentences and paragraphs
O	P	Unknown terms furnished with references to Wikipedia

Answer:

Explanation:

B, C, F, G, J, K, M, P

NEW QUESTION # 79

The following sentences apply to requirements models, EXCEPT:

- A. Requirement models are less flexible than requirements written with natural language.
- B. The focus on a single aspect makes it easy to understand the requirements modeled.
- C. Requirement models have a lacking focus on quality requirements and constraints.
- **D. Requirements models do not have to be accompanied by natural language.**

Answer: D

Explanation:

Comprehensive and Detailed Explanation From Exact Extract:

Models—diagrams, state charts, data models, etc.—offer abstraction and focus but cannot express every nuance. The handbook recommends always combining models with natural-language descriptions to clarify intent, cover corner cases and document quality requirements or constraints that do not fit the modeling notation. Models tend to be less flexible than free text and are primarily suited for functional aspects, so B and C are accurate. Focusing on a specific aspect indeed increases comprehensibility (D). The only incorrect statement is that models "do not have to be accompanied" by natural language; they should be.

NEW QUESTION # 80

According to the Kano model, a feature that customers specifically request is called a:

- A. Must-have
- B. Critical
- **C. Satisfier**
- D. Delighter

Answer: C

Explanation:

Explanation:

NEW QUESTION # 81

Which of the following statements present a reason for prioritizing requirements?

- A. To record the estimated cost of implementing a requirement.
- **B. To determine which requirements should be included in the upcoming version of the system.**
- C. To identify requirements that may be applicable in other contexts.
- **D. To establish which requirements need to be tested first.**

Answer: B,D
