BONUS!!! Download part of Actual4test FCP\_FML\_AD-7.4 dumps for free: <https://drive.google.com/open?id=18jtMTVnBubvXe3JTnLfb1DCnPMUpgdhk>

The customer is God. FCP\_FML\_AD-7.4 learning dumps provide all customers with high quality after-sales service. After your payment is successful, we will dispatch a dedicated IT staff to provide online remote assistance for you to solve problems in the process of download and installation. During your studies, FCP\_FML\_AD-7.4 study tool will provide you with efficient 24-hour online services. You can email us anytime, anywhere to ask any questions you have about our FCP\_FML\_AD-7.4 Study Tool. At the same time, our industry experts will continue to update and supplement FCP\_FML\_AD-7.4 test question according to changes in the exam outline, so that you can concentrate on completing the review of all exam content without having to pay attention to changes in the outside world.

## Fortinet FCP\_FML\_AD-7.4 Exam Syllabus Topics:

| Topic   | Details   |
|---------|---|
| Topic 1 | <ul style="list-style-type: none"> <li>Server Mode and Transparent Mode: This section of the exam measures skills of a Network Security Administrator and explains how to deploy and manage FortiMail in different operation modes. It includes configuring server mode to handle mail directly and deploying FortiMail in transparent mode where it acts as a gateway to filter email traffic without altering the existing mail infrastructure.</li> </ul>                                    |
| Topic 2 | <ul style="list-style-type: none"> <li>Email Security: This section of the exam measures skills of a Network Security Administrator and deals with implementing security controls to filter and manage email threats. Candidates must configure session-based filtering, spam detection methods, malware protection, APT mitigation, and content filtering. The section also includes email archiving configurations for compliance and storage.</li> </ul>                                     |
| Topic 3 | <ul style="list-style-type: none"> <li>Initial Deployment and Basic Configuration: This section of the exam measures skills of a Network Security Administrator and covers the foundational setup of FortiMail. It includes understanding SMTP and email flow, performing initial configurations such as selecting operation mode, system settings, and defining protected domains. It also involves deploying FortiMail in high-availability clusters to ensure service continuity.</li> </ul> |
| Topic 4 | <ul style="list-style-type: none"> <li>Email Flow and Authentication: This section of the exam measures skills of a Messaging Security Engineer and focuses on configuring FortiMail to handle email flow securely. It includes enabling and matching authentication protocols, setting up secure MTA features, and implementing access control, IP policies, and recipient-based policies to control mail delivery and security.</li> </ul>  |

|         |  |
|---------|--|
| Topic 5 | <ul style="list-style-type: none"> <li>• Encryption: This section of the exam measures skills of a Messaging Security Engineer and addresses the implementation of encryption methods in FortiMail. It covers traditional SMTP encryption and identity-based encryption (IBE). Candidates are expected to configure these technologies and manage IBE users for secure email communication.</li> </ul> |
|---------|--|

## Excellent Latest FCP\_FML\_AD-7.4 Test Question – Find Shortcut to Pass FCP\_FML\_AD-7.4 Exam

Our Actual4test aims at helping you reward your efforts on preparing for FCP\_FML\_AD-7.4 exam. If you don't believe it, you can try our product demo first; after you download and check our FCP\_FML\_AD-7.4 free demo, you will find how careful and professional our Research and Development teams are. If you are still preparing for other IT certification exams except FCP\_FML\_AD-7.4 Exam, you can also find the related exam dumps you want in our huge dumps and study materials.

### Fortinet FCP - FortiMail 7.4 Administrator Sample Questions (Q53-Q58):

#### NEW QUESTION # 53

When the domain keys identified mail (DKIM) feature is used, where is the public key stored?

- A. The public key is distributed during the SMTP session establishment
- **B. The public key is stored in a DNS server as a TXT record**
- C. The public key is stored in the local FortiMail flash memory
- D. The public key is stored in a DNS server as a PTR record

**Answer: B**

Explanation:

DKIM uses a public key published in DNS as a TXT record so receiving servers can verify message signatures.

#### NEW QUESTION # 54

Refer to the exhibit, which displays a list of IBE users on a FortiMail device.

| Enabled                             | Email                 | First Name | Last Name | Status         | Creation Time | Last Access |
|-------------------------------------|-----------------------|------------|-----------|----------------|---------------|-------------|
| <input checked="" type="checkbox"/> | extuser@external.lab  | Mail       | User      | Activated      |               |             |
| <input checked="" type="checkbox"/> | extuser2@external.lab |            |           | Pre-registered |               |             |

Which statement describes the pre-registered status of the IBE user extuser2@external.lab?

- A. The user was registered by an administrator in anticipation of IBE participation.
- B. The user account has been de-activated, and the user must register again the next time they receive an IBE email.
- **C. The user has received an IBE notification email, but has not accessed the HTTPS URL or attachment yet.**
- D. The user has completed the IBE registration process, but has not yet accessed their IBE email.

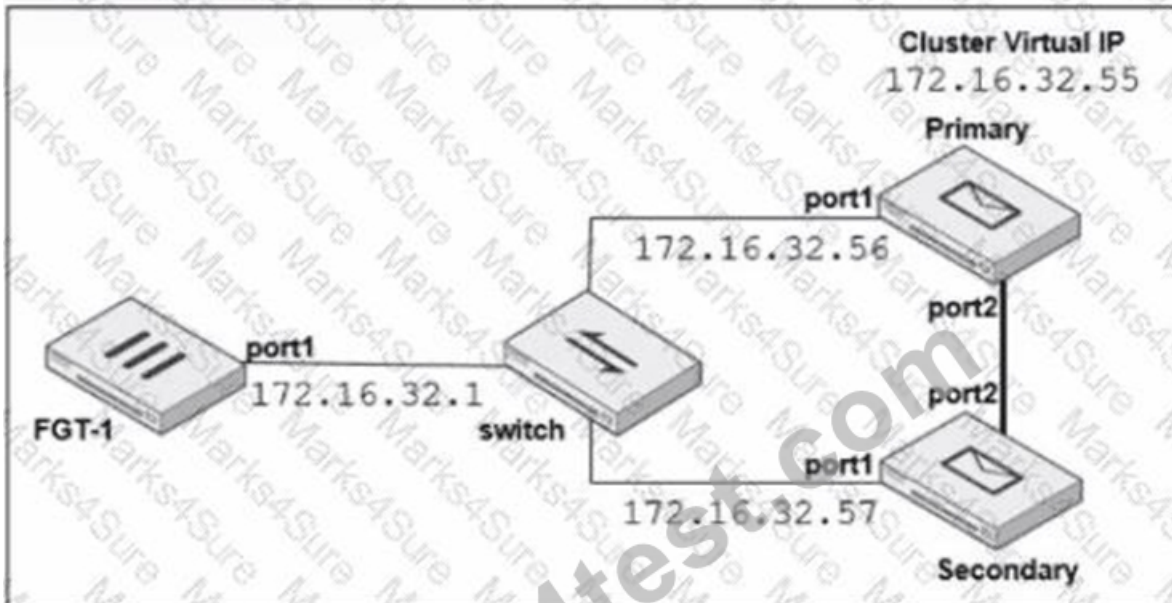

**Answer: C**

#### NEW QUESTION # 55

Refer to the exhibits.

## Topology

FORTINET

## HA Interface Configuration

| HA Interface         |                          |
|----------------------|--------------------------|
| Port                 | port1                    |
| Enable port monitor  | <input type="checkbox"/> |
| Heartbeat status     | Disable                  |
| Peer IP address:     | 0.0.0.0                  |
| Peer IPv6 address:   | ::                       |
| Virtual IP action    | Ignore                   |
| Virtual IP address   | 0.0.0.0                  |
| Virtual IPv6 address | ::                       |

The exhibits display a topology diagram of a FortiMail cluster (Topology) and the primary HA interface configuration of the Primary FortiMail (HA Interface Configuration) Which three actions are recommended when configuring the primary FortiMail HA interface? (Choose three.)

- A. In the Peer IP address field, type 172.16.32.57
- B. In the Virtual IP address field, type 172.16.32.55/24
- C. Disable Enable port monitor
- D. In the Heartbeat status drop-down list, select Primary
- E. In the Virtual IP action drop-down list, select Use

Answer: A,B,E

## NEW QUESTION # 56

Which two types of remote authentication are supported for FortiMail administrator accounts? (Choose two.)

- A. RADIUS
- B. Single Sign-on
- C. TACACS
