No one can be responsible for you except yourself. So you must carefully plan your life and future career development. Our C-THR92-2505 training quiz might offer you some good guidance. Maybe you never find out your real interest in the past. Now, everything is different. So you still have the chance to change. Once you are determined to learn our C-THR92-2505 Study Materials, you will become positive and take your life seriously. Through the preparation of the exam, you will study much C-THR92-2505 practical knowledge. Of course, passing the C-THR92-2505 exam and get the certificate is just a piece of cake.

SAP Certified Associate - SAP SuccessFactors People Analytics: Reporting Sample Questions (Q64-Q69):

NEW QUESTION # 64

When constructing an expression for a calculated column in Query Designer, which syntax should you use to enter a date?

- A. #MMM-DD-YYYY#
- B. #YYYY-MM-DD#
- C. #DD-MM-YYYY#
- D. #MM-DD-YYYY#

Answer: B

NEW QUESTION # 65

Which tool can you use to upload a report from the test instance to the production instance? Note: There are 2 correct answers to this question.

- A. SFTP Configuration
- B. Report Transfer
- C. Report Distributor
- D. Report Center

Answer: B,D

Explanation:

* Report Transfer (A):

* The Report Transfer tool is specifically designed to move reports from one instance (test) to another (production).

- * Report Center (D):
- * Reports can also be exported and imported manually using the Report Center if the report type supports it.

NEW QUESTION # 66

When you format a list report component, which actions can you perform? Note: There are 3 correct answers to this question.

- A. Change column headers.
- B. Change the order of columns.
- C. Save formats to a template.
- D. Adjust column widths.
- E. Change column types.

Answer: A,B,D

Explanation:

* List Report Formatting Overview List report components in SAP SuccessFactors allow detailed data visualization in a tabular format. Formatting enhances usability and readability.

* Formatting Options

* Change the Order of Columns: Columns in a list report can be rearranged to prioritize specific data.

* Adjust Column Widths: Column widths can be resized to fit content or optimize display space.

* Change Column Headers: Column headers can be renamed or updated to improve clarity and alignment with report requirements.

* Explanation of Correct Answers

* Option A: Correct, as reordering columns is a standard customization feature.

* Option C: Correct, because column width adjustment is supported for better layout and content display.

* Option D: Correct, since column headers can be edited to reflect data labels better.

* Explanation of Incorrect Options

* Option B: Incorrect, because column types (e.g., text to numeric) cannot be changed directly in a list report component.

* Option E: Incorrect, as list report formatting changes cannot be saved as templates for reuse.

NEW QUESTION # 67

In Query Designer, you are trying to create a conditional expression to relabel a field. You create the following expression: IF([User#Basic User Information#Gender] = "M" , "Male" : "Female") You received an error message saying the formula could NOT be computed. Which symbol in your expression is causing the error?

- A. :
- B. ,
- C. "
- D. #

Answer: A

Explanation:

* Understanding the Query Designer Expression Syntax In SAP SuccessFactors People Analytics Query Designer, conditional expressions are used to transform or relabel fields based on logical conditions.

These expressions rely on specific syntax that must be adhered to strictly. The issue in this scenario arises from the use of an incorrect separator in the conditional statement.

* Analyzing the Given Expression The expression provided:

IF([User#Basic User Information#Gender] = "M" , "Male" : "Female")

contains a colon (:) as the separator between "Male" and "Female". However, the correct syntax requires the use of a comma (,) instead of the colon.

* Correct Syntax Format for Conditional Expressions The correct format for conditional expressions in SAP SuccessFactors People Analytics IF(Condition, Value_if_True, Value_if_False) Applying this to the provided example, the correct expression should be:

IF([User#Basic User Information#Gender] = "M", "Male", "Female")

* Root Cause of the Error The colon (:) is not recognized as a valid syntax separator in the Query Designer's conditional expression format. As a result, the formula cannot be computed, and an error is generated.

* Resolving the Issue Replace the colon (:) with a comma (,), ensuring the conditional expression adheres to the correct syntax. The updated expression would look like this:

```
IF([User#Basic User Information#Gender] = "M", "Male", "Female")
```

* Validation Once corrected, the expression can be tested in Query Designer to confirm it computes without errors and provides the expected output.

References and Documentation

* SAP SuccessFactors People Analytics Reporting Guide: SAP Help Portal

* Conditional Expressions in People Analytics: Official documentation and training materials available on openSAP

* Query Designer Syntax Guidelines: Found in the SAP SuccessFactors People Analytics Query Designer User Guide.

Make sure to consult the above documentation for additional examples and syntax rules.

NEW QUESTION # 68

The drill-down list of a tile contains more entries than the values displayed in a chart (see attached image).

How do you make the outputs match?

- A. Configure a filter to remove the duplicate column.
- B. Change the metric calculation from Count to Count (Distinct).
- C. Remove the category assignment field.
- **D. Remove the column that would generate multiple entries per metric.**

Answer: D

Explanation:

* Mismatch Between Drill-Down and Chart Values:

* The mismatch occurs because the chart aggregates data, while the drill-down includes all entries (even duplicates).

* Resolution:

* Identify and remove the column in the drill-down configuration that causes multiple rows per metric (e.g., user-specific fields like title or ID).

* Why Other Options Are Incorrect:

* A: Filtering does not eliminate duplicates inherent in the column structure.

* B: Removing the category assignment field alters the chart structure and is unnecessary.

* C: Changing to Count (Distinct) affects the chart calculation but does not resolve the drill-down mismatch.

* SAP SuccessFactors Dashboard Configuration Guide
