Valid 300-430 Exam Duration, Exam 300-430 Training
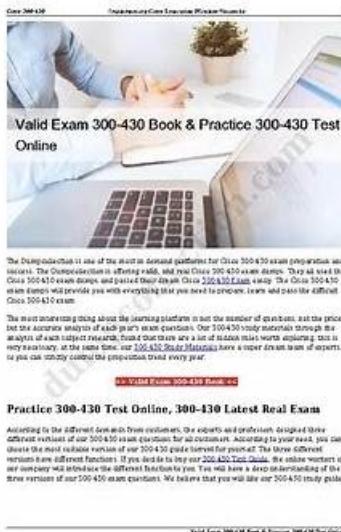

You can make your dream of passing the Cisco 300-430 exam come true with Lead1Pass updated Cisco 300-430 practice test questions. Lead1Pass offer Cisco 300-430 the latest dumps in three formats. Cisco 300-430 desktop practice test software creates a real exam environment so that you can feel like attempting the Implementing Cisco Enterprise Wireless Networks 300-430 actual exam.

Cisco 300-430 Certification Exam is a valuable credential for IT professionals looking to validate their expertise in implementing and managing wireless networks in an enterprise environment. With a range of study resources available, candidates can prepare thoroughly for the exam and gain the skills and knowledge needed to succeed in this field.

Multicast

The questions of this objective cover 10% of the entire content and are dedicated to validating the following expertise:

- Explaining how multicast affects wireless networks;
- Implementing multicast within WLAN;
- Implementing multicast direct and mDNS.
- Implementing the components of multicast;

Exam Cisco 300-430 Training & 300-430 Valid Test Pass4sure

Choosing to participate in Cisco certification 300-430 exam is a wise choice, because if you have a Cisco 300-430 authentication certificate, your salary and job position will be improved quickly and then your living standard will provide at the same time. But passing Cisco certification 300-430 exam is not very easy, it need to spend a lot of time and energy to master relevant IT professional knowledge. Lead1Pass is a professional IT training website to make the training scheme for Cisco Certification 300-430 Exam. At first you can free download part of exercises questions and answers about Cisco certification 300-430 exam on www.Lead1Pass.com as a try, so that you can check the reliability of our product. Generally, if you have tried Lead1Pass's products, you'll very confident of our products.

Cisco 300-430 certification exam, also known as Implementing Cisco Enterprise Wireless Networks, is a popular certification for IT professionals who specialize in wireless networking. 300-430 exam is designed to test your knowledge and skills in configuring, deploying, and troubleshooting complex enterprise wireless networks. The Cisco 300-430 Certification is highly valued in the industry and can help you stand out in a competitive job market.

Cisco Implementing Cisco Enterprise Wireless Networks Sample Questions (Q294-Q299):

NEW QUESTION # 294
A company has an existing Cisco wireless solution deployed to a remote branch location with centrally switched control and data traffic. A new solution is needed to locally switch client traffic when Wi-Fi is used. A new SSID that is used only for voice devices must be mapped to an onsite voice VLAN named VLAN 25. Which configuration on the switch interface that connects to the APs meets the requirement?

- A. switchport mode trunk
  switch trunk native vlan 25
- B. switchport mode access
  switchport access vlan 25
- C. switchport mode trunk
  switchport trunk allowed vlan add vlan 25
- D. switchport mode access
  switchport access vlan 25
  switchport access voice vlan 25

Answer: C

NEW QUESTION # 295
When implementing self-registration for guest/BYOD devices, what happens when an employee tries to connect four devices to the network at the same time?

- A. Purge time dictates how long a device is registered to the portal.
- B. The registration is allowed, but only one device is connected at any given time.
- C. All devices are allowed on the network simultaneously.
- D. The last device is removed and the newly added device is updated as active device.

Answer: B

Explanation:
In a self-registration setup for guest/BYOD devices, when an employee tries to connect multiple devices simultaneously, the system allows the registration of all devices. However, it restricts the active connection to only one device at a time. This ensures that network resources are not overburdened by a single user connecting multiple devices.

NEW QUESTION # 296
Refer to the exhibit. A university network administrator notices that wireless guest users consume a significant amount of uplink internet bandwidth in the library, which causes throughput issues on staff SSID. To throttle this bandwidth use, the administrator

intends to configure a QoS policy for guests that:
- remarks DSCP 46 to 34
- drops Netflix and YouTube traffic
- rate limits a host specified in an ACL to 50 Kbps
- rate limits all other traffic to 100 Kbps
Which class-map configuration must the administrator implement?

- A. □
- B. □
- C. □
- D. □

Answer: C

Explanation:
Drop YouTube/Netflix → matched in BW_Limit1_AVC_UI_CLASS.
Remark DSCP 46 (EF) to 34 (AF41) → handled in BW_Limit1_ADV_UI_CLASS with set dscp af41.
Rate-limit specific host to 50 Kbps → matched in BW_Limit2_ADV_UI_CLASS using the specifichostACL.
Rate-limit all other traffic to 100 Kbps → covered by class-default.

NEW QUESTION # 297
An engineer is implementing Cisco Identity-Based Networking on a Cisco AireOS controller. The engineer has two ACLs on the controller. The first ACL, named BASE_ACL, is applied to the corporate_clients interface on the WLC, which is used for all corporate clients. The second ACL, named HR_ACL, is referenced by ISE in the Human Resources group policy. What is the resulting ACL when a Human Resources user connects?

- A. BASE_ACL only
- B. BASE_ACL appended with HR_ACL
- C. HR_ACL appended with BASE_ACL
- D. HR_ACL only

Answer: D

Explanation:
https://www.cisco.com/c/en/us/support/docs/wireless/4400-series-wireless-lan-controllers/98590-Per-User-ACL-WLC.html#configure-acs

NEW QUESTION # 298
An engineer must provide a graphical report with summary grouped data of the total number of wireless clients on the network Which Cisco Prime Infrastructure report provides the requited data?

- A. Client Traffic Stream Metrics
- B. Client Summary
- C. Mobility Client Summary
- D. Posture Status Count

Answer: B

Explanation:
The Client dashboard (Dashboard > Overview > Client Summary) page displays the client-related dashlets. These dashlets enable you to monitor the clients on the network.
https://www.cisco.com/c/en/us/td/docs/net_mgmt/prime/infrastructure/3-9/user/guide/bk_CiscoPrimeInfrastructure_3_9_0_UserGuide/monitor_network_clients_and_user s.html#con_1418185
