AVIXA Certified Technology Specialist Sample Questions (Q57-Q62):

NEW QUESTION # 57

Which section of the Ohm's Law chart would you use to calculate watts? Select the correct quadrant.

Answer:

Explanation:

Explanation:

To calculate watts (P) using the Ohm's Law chart, you would use the sections that involve power formulas.

These sections are:

* $P = V * I$

* $P = I^2 * R$

* $P = V^2 / R$

These formulas show the relationship between power (watts) and the other electrical quantities: voltage (V), current (I), and resistance (R).

NEW QUESTION # 58

When selling rental or staging services, which is the MOST effective way to showcase a company's services and expertise?

- A. Provide videos of a similar event for the client.
- B. Present photos and drawings of similar events.
- C. Organize brochures and data sheets for all proposed equipment.
- **D. Invite the client to a similar event.**

Answer: D

Explanation:

Inviting a client to a similar event is a highly effective method for showcasing services in the rental and staging industry. This allows the client to see the company's capabilities firsthand, understand the quality of the setup, and visualize how similar services could be applied to their own event.

The CTS study guide emphasizes hands-on demonstrations and site visits as impactful ways to build trust and provide evidence of expertise in AV solutions.

NEW QUESTION # 59

A personnel change at an AV integration company results in the assignment of a new technician to an existing facility.

What is the best FIRST step for the integrator to make the transition?

- A. Make an appointment with the client to introduce the new technician to the client.
- B. Call the client and tell them a new technician has been assigned.
- **C. Have the newly assigned technician review the project documentation.**
- D. Give the technician directions to the site.

Answer: C

Explanation:

Before visiting the site, the new technician should review the project documentation to understand the system design, past modifications, and current status. This ensures they are well-prepared and familiar with the specifics of the installation.

CTS Technology Specialist Reference According to CTS best practices, reviewing project documentation is critical for any technician assigned to an existing project to minimize errors and ensure continuity.

NEW QUESTION # 60

The color of a light wave is determined by the

- A. ambient temperature.
- B. amplitude.

- C. polarization.
- D. frequency.

Answer: D

Explanation:

The color of a light wave is determined by its frequency. Different frequencies of light waves correspond to different colors in the visible spectrum. For instance, higher frequencies correspond to blue/violet light, while lower frequencies correspond to red light. Axis Technology Specialist documentation includes explanations of light properties, emphasizing the relationship between frequency and color to ensure proper selection and use of lighting in AV installations.

NEW QUESTION # 61

What section of the color chart is used to calibrate brightness? Select the answer by clicking on the appropriate area of the chart

□

Answer:

Explanation:

□

Explanation:

The section with the grayscale bars (bottom row, from white to black)

Brightness calibration is typically done using the grayscale section of a color chart. The grayscale bars provide a range of luminance levels from white to black, allowing the calibration process to adjust the display so that each shade is distinct and accurately represented. Proper calibration ensures that the display shows details in both bright and dark areas of the image, achieving the correct overall brightness.
