These Planning and Administering Microsoft Azure for SAP Workloads (AZ-120) exam questions are available in PDF, desktop practice test software, and web-based practice exam.

## How to study the AZ-120:Planning and Administering Microsoft Azure for SAP Workloads Exam

Preparation of certification exams could be covered with two resource types . The first one are the study guides, reference books and study forums that are elaborated and appropriate for building information from ground up. Apart from them video tutorials and lectures are a good option to ease the pain of through study and are relatively make the study process more interesting nonetheless these demand time and concentration from the learner. Smart candidates who wish to create a solid foundation altogether examination topics and connected technologies typically mix video lectures with study guides to reap the advantages of each but practice exams or practice exam engines is one important study tool which goes typically unnoted by most candidates. Practice exams are designed with our experts to make exam prospects test their knowledge on skills attained in course, as well as prospects become comfortable and familiar with the real exam environment. Statistics have indicated exam anxiety plays much bigger role of students failure in exam than the fear of the unknown. RealValidExam expert team recommends preparing some notes on these topics along with it don't forget to practice **AZ-120 exam dumps** which had been written by our expert team, each of these can assist you loads to clear this exam with excellent marks.

### Microsoft Planning and Administering Microsoft Azure for SAP Workloads Sample Questions (Q294-Q299):

#### NEW QUESTION # 294

You have an Azure subscription that contains a resource group named RG1. The role assignments for RG1 are shown in the following exhibit.

Use the drop-down menus to select the answer choice that completes each statement based on the information presented in the graphic.

NOTE: Each correct selection is worth one point.

#### Answer:

Explanation:

Explanation:

Box 1: User2

Note:

Backup Contributor - This role has all permissions to create and manage backup except deleting Recovery Services vault and giving access to others. Imagine this role as admin of backup management who can do every backup management operation.

Box 2: User3

The User Access Administrator role lets you manage user access to Azure resources.

Reference:

<https://docs.microsoft.com/en-us/azure/backup/backup-rbac-rs-vault>

<https://docs.microsoft.com/en-us/azure/role-based-access-control/built-in-roles>

#### NEW QUESTION # 295

You deploy an SAP environment on Azure.

You need to ensure that incoming requests are distributed evenly across the application servers.

What should you use?

- A. Azure Monitor
- B. SAP Solution Manager
- C. SAP Control
- **D. SAP Web Dispatcher**

#### Answer: D

Explanation:

Explanation

The SAP Web Dispatcher (SWD) component is used as a load balancer for SAP traffic among the SAP application servers.

<https://docs.microsoft.com/en-us/azure/architecture/reference-architectures/sap/sap-netweaver>

### NEW QUESTION # 296

#### HOTSPOT

Your on-premises network contains SAP and non-SAP applications.

You have JAVA-based SAP systems that use SPNEGO for single-sign on (SSO) authentication.

Your external portal uses multi-factor authentication (MFA) to authenticate users.

You plan to extend the on-premises authentication features to Azure and to migrate the SAP applications to Azure.

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Hot Area:

☐

#### Answer:

Explanation:

☐

Explanation:

Box 1: No

Need AD FS for MFA. See box 3.

Note: Azure Active Directory (Azure AD) Pass-through Authentication allows your users to sign in to both on-premises and cloud-based applications using the same passwords. This feature is an alternative to Azure AD Password Hash Synchronization (see Box 2).

Box 2: Yes

Password hash synchronization is one of the sign-in methods used to accomplish hybrid identity. Azure AD Connect synchronizes a hash, of the hash, of a user's password from an on-premises Active Directory instance to a cloud-based Azure AD instance.

Password hash synchronization is an extension to the directory synchronization feature implemented by Azure AD Connect sync.

You can use this feature to sign in to Azure AD services like Office 365. You sign in to the service by using the same password you use to sign in to your on-premises Active Directory instance.

Box 3: Yes

If your organization is federated with Azure AD, you can use Azure Multi-Factor Authentication to secure AD FS resources, both on-premises and in the cloud. Azure MFA enables you to eliminate passwords and provide a more secure way to authenticate.

<https://docs.microsoft.com/en-us/windows-server/identity/ad-fs/operations/configure-ad-fs-and-azure-mfa>

### NEW QUESTION # 297

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

☐

#### Answer:

Explanation:

☐

### NEW QUESTION # 298

You have an Azure Active Directory (Azure AD) tenant and an SAP Cloud Platform tenant.

You need to ensure that users sign in automatically by using their Azure AD accounts when they connect to SAP Cloud Platform.

Which four actions should you perform in sequence? To answer, move all actions from the list of actions to the answer area and arrange them in the correct order.

☐

#### Answer:

Explanation:

☐
