

# Verified New NetSec-Architect Exam Guide | Amazing Pass Rate For NetSec-Architect Exam | Authorized NetSec-Architect: Palo Alto Networks Network Security Architect

Do you long to get the NetSec-Architect certification to improve your life? Are you worried about how to choose the NetSec-Architect learning product that is suitable for you? If your answer is yes, we are willing to tell you that you are a lucky dog, because you meet us, it is very easy for us to help you solve your problem. The NetSec-Architect latest question from our company can help people get their NetSec-Architect certification in a short time.

If you feel unconfident in self-preparation for your NetSec-Architect test and want to get professional aid of questions and answers, ExamcollectionPass NetSec-Architect test questions materials will guide you and help you to pass the certification exams in one shot. If you want to know our NetSec-Architect Test Questions materials, you can download our free demo now. Our demo is a small part of the complete charged version. Also you can ask us any questions about NetSec-Architect exam any time as you like.

## Best Palo Alto Networks NetSec-Architect Practice, NetSec-Architect Exam Course

It is believe that employers nowadays are more open to learn new knowledge, as they realize that Palo Alto Networks certification may be conducive to them in refreshing their life, especially in their career arena. A professional Palo Alto Networks certification serves as the most powerful way for you to show your professional knowledge and skills. For those who are struggling for promotion or better job, they should figure out what kind of NetSec-Architect Test Guide is most suitable for them. However, some employers are hesitating to choose. With our high-accuracy NetSec-Architect test guide, our candidates can grasp the key points, and become sophisticated with the exam content. You only need to spend 20-30 hours practicing with our Palo Alto Networks Network Security Architect learn tool, passing the exam would be a piece of cake.

## Palo Alto Networks Network Security Architect Sample Questions (Q59-Q64):

### NEW QUESTION # 59

An enterprise deploys Palo Alto NGFWs across multiple regions. They require consistent security policy enforcement and centralized management while minimizing configuration drift. Which solution should be implemented?

- A. Manual policy synchronization
- B. Local firewall configuration only
- C. Separate management per region
- **D. Panorama with device groups and templates**

**Answer: D**

Explanation:

Panorama provides centralized management of policies and configurations across multiple firewalls. Device groups allow consistent policy enforcement, while templates manage network and system settings. This reduces configuration drift and operational overhead compared to manual or decentralized approaches.

#### NEW QUESTION # 60

A global manufacturing organization with 50,000 employees spanning 35 countries designs advanced industrial equipment and owns significant intellectual property. The organization operates in a highly competitive market where protecting trade secrets is critical to maintaining market advantage.

Over the past 18 months, the CISO discovered that employees across the organization have adopted hundreds of GenAI applications to improve productivity. Engineers use AI coding assistants to accelerate product development sales teams use AI tools to generate proposals, and customer service representatives use chatbots to draft responses. While this adoption has driven innovation, it has also created significant security risks.

A security audit reveals sensitive CAD files uploaded to image-generation services, proprietary source code shared with public coding assistants, and confidential customer information used in prompts. The audit identifies over 300 different GenAI applications in use, most of which had not been formally reviewed or approved.

The customer service department has also been developing internal AI applications, including a customer service copilot built on a cloud large language model (LLM) platform, an internal knowledge management assistant, and a code review tool. These internal applications access sensitive databases, customer records and internal APIs - creating additional security concerns about exploitation or misuse.

The organization has a distributed workforce in which 60% of employees work remotely or in hybrid arrangements, accessing corporate resources and AI applications from various locations using managed and unmanaged devices. Existing network security infrastructure lacks AI-specific security capabilities.

Organization leadership wants to enable AI-driven innovation while implementing comprehensive security controls. The CISO has been tasked with developing an organization-wide GenAI governance program that protects sensitive assets without hindering productivity. The program must address both external AI applications employees are using and internal AI applications being developed by IT.

Which enforcement solution can the CISO recommend to control GenAI data exfiltration?

- A. Configure User-ID and App-ID on the perimeter NGFWs
- B. Configure Prisma AIRS to monitor for data exfiltration within the AI application prompts
- **C. Implement AI Access Security**
- D. Implement Prisma AIRS

**Answer: C**

Explanation:

AI Access Security is designed to control and govern user interactions with external GenAI applications, including inspecting prompts and responses and applying DLP policies to prevent sensitive data exfiltration. It provides inline enforcement for SaaS-based AI usage across distributed users, which directly addresses the risk of confidential data being exposed through third-party GenAI tools.

#### NEW QUESTION # 61

A retail organization wants to sanction the use of a particular third-party SaaS-based AI application for inventory management. This application will need network layer data access to the organization's internal supply chain database with confidential information highly secured in its own DMZ. The implementation is delayed because the CISO is concerned that the sanctioned third-party AI application could get compromised and then used to exfiltrate customer PII from the internal database. Which solution will address the CISO's concern?

- **A. AI Access Security with an Enterprise DLP subscription to identify and block the PII within the traffic to and from the SaaS application**
- B. AI Access Security with an App-ID Cloud Engine subscription to precisely identify and then block the inventory management application entirely
- C. Prisma AIRS with the AI agent deployed on the database server to monitor for unauthorized access attempts
- D. Prisma AIRS with AI Security content updates to inspect the model's behavior and block anomalous database queries

**Answer: A**

Explanation:

Enterprise DLP integrated with AI Access Security inspects traffic to and from the SaaS application and can detect sensitive data such as customer PII. It enforces policies to prevent exfiltration even if the application is compromised, allowing the organization to safely sanction the AI application while protecting confidential data.

#### NEW QUESTION # 62

A large organization is building a hybrid AI environment. The plan is to develop proprietary machine learning (ML) models on-premises in a VMware NSX environment and create separate, cloud-native AI applications in a Google Kubernetes Engine (GKE) cluster environment. The CISO has requested a single solution that can offer runtime protection and visibility for the two environments. Which Prisma AIRS component or form factor should a security architect recommend to this customer?

- A. AI Security Posture Management (AI-SPM) scanner to connect to both on-premises and cloud environments to scan for misconfigurations
- **B. Prisma AIRS Network Intercept deployed as security virtual appliances in both environments**
- C. Prisma AIRS SaaS platform to ingest telemetry from both environments without requiring local enforcement points
- D. AI Agent Security installed on each individual virtual machine (VM) and container across both environments to provide host-level protection

**Answer: B**

Explanation:

Network Intercept provides runtime visibility and protection by inspecting live traffic flows within both virtualized environments like VMware NSX and containerized environments such as GKE.

This allows a single, consistent control point to monitor and secure AI workloads across hybrid environments, addressing both visibility and enforcement requirements at runtime.

#### NEW QUESTION # 63

A global manufacturing organization has a strategic plan for rapid growth through mergers and acquisitions. Several components the organization has purchased are deemed large deployments with existing IP address schemas and allocations that conflict with the parent organization. The manufacturing organization needs access to the resources before a re-IP initiative can be completed.

All of the deployments include a variety of IoT devices. Leadership requires protection of vulnerable assets and identification of any known CVEs associated with the IoT devices. The governance, risk and compliance (GRC) team requires comprehensive non-repudiable logs to identify all IoT devices reporting "Critical (9 0+) CVE scores" for mandatory remediation.

Throughput needs to exceed the current 1 Gbps trending rate, and with expected growth will soon scale to 5 Gbps.

Segmentation is a mandatory requirement with enclaves based on region, device type, and function.

Which off-ramp should an architect recommend to meet the requirements of the organization?

- A. GCP Network Cloud Connector
- B. Service Connection
- **C. Colo-Connect**
- D. ZTNA Connector

**Answer: C**

Explanation:

Colo-Connect provides high-throughput, private connectivity between Prisma Access and on-premises or data center environments, supporting multi-gigabit requirements (scaling beyond 1 Gbps toward 5 Gbps). It is designed for large-scale, high-performance environments and supports segmentation and secure access without requiring immediate re-IP, making it the best fit for this scenario.

#### NEW QUESTION # 64

.....

Our NetSec-Architect study materials are very popular in the international market and enjoy wide praise by the people in and outside the circle. We have shaped our NetSec-Architect exam questions into a famous and top-ranking brand and we enjoy well-deserved reputation among the clients. Our NetSec-Architect study materials boost many outstanding and superior advantages which other same kinds of products don't have. The clients can try out and download our study materials before their purchase. They can immediately use our NetSec-Architect training guide after they pay successfully.

**Best NetSec-Architect Practice:** <https://www.examcollectionpass.com/Palo-Alto-Networks/NetSec-Architect-practice-exam-dumps.html>

So our NetSec-Architect practice braindumps contain all the information you need, Palo Alto Networks New NetSec-Architect Exam Guide In the era of informational globalization, the world has witnessed climax of science and technology development, and has enjoyed the prosperity of various scientific blooms, Which credit cards does ExamcollectionPass Best NetSec-Architect Practice accept, You can download NetSec-Architect certkingdom pdf demo for a try.

In our next episode, we'll talk about how the internet New NetSec-Architect Exam Guide opens up new kinds of marketing offering new opportunities for marketers to reach the target audiences, Secondly you could look at the free demos of our NetSec-Architect learning prep to see if the questions and the answers are valuable.

## Quiz NetSec-Architect - Palo Alto Networks Network Security Architect – Trustable New Exam Guide

So our NetSec-Architect Practice Braindumps contain all the information you need, In the era of informational globalization, the world has witnessed climax of science and technology NetSec-Architect development, and has enjoyed the prosperity of various scientific blooms.

Which credit cards does ExamcollectionPass accept, You can download NetSec-Architect certkingdom pdf demo for a try, ExamcollectionPass Network Security Generalist training material for has the edge of being most efficient and effective Network Security Generalist training Exam NetSec-Architect Experience material as the candidates get real exam questions for which are ensured to be updated at all times.
