With the growing demand for Cisco SD-WAN solutions, the Cisco 300-415 Exam provides a competitive advantage for those who possess this certification.

Cisco Implementing Cisco SD-WAN Solutions Sample Questions (Q455-Q460):

NEW QUESTION # 455

An engineer must apply the configuration for certificate installation to vBond Orchestrator and vSmart Controller. Which

configuration accomplishes this task?

- A. ☐
- B. ☐
- C. ☐
- D. ☒

Answer: D

NEW QUESTION # 456

An enterprise needs DIA on some of its branches with a common location ID: A041:B70C:D78E::18 Which WAN Edge configuration meets the requirement?

- A) ☐
- B) ☐
- C) ☐
- D) ☐

- A. Option C
- B. Option D
- C. Option A
- D. Option B

Answer: A

NEW QUESTION # 457

What is the next step when the WAN Edge device boots up and resolves the domain in the ZTP process for WAN Edge deployment?

- A. The WAN Edge device learns the vBond and organization name from the configuration and initiates a secure control connection to the vBond orchestrator.
- B. The WAN Edge router authenticates to the vBond orchestrator with the chassis serial number and root certificate.
- C. The WAN Edge device establishes secure connections with the vManage and vSmart and downloads the configuration using NETCONF.
- D. The WAN Edge device establishes secure control plane connections with the controllers and secure data plane connections in the SD-WAN overlay network.

Answer: B

Explanation:

During the Cisco SD-WAN ZTP (Zero Touch Provisioning) process, after the WAN Edge device resolves the domain, the next step is to authenticate with the vBond orchestrator using the chassis serial number and the root certificate. This authentication ensures that the WAN Edge device is authorized to join the SD-WAN fabric before proceeding to establish control plane connections with other controllers like vManage and vSmart.

NEW QUESTION # 458

Which issue triggers the Cisco Umbrella resolver to forward DNS requests to the intelligent proxy?
Which issue triggers the Cisco Umbrella resolver to forward DNS requests to the intelligent proxy?

- A. A domain is nonexistent.
- B. A domain is grey-listed.
- C. A domain is locally reachable.
- D. A domain is block-listed.

Answer: B
