Certified Implementation Specialist - Discovery has introduced practice test (desktop and web-based) for the students so they can practice anytime in an easy way. The Certified Implementation Specialist - Discovery (CIS-Discovery) practice tests are customizable which means the students can set the time and questions according to their needs. The CIS-Discovery Practice Tests have unlimited tries so that the users don't make extra mistakes when giving it the next time. Candidates can access the previously given tries from the history and avoid making mistakes in the final examination.

ServiceNow is a leading provider of cloud-based solutions for IT service management, IT operations management, and IT business management. With its comprehensive suite of products, ServiceNow has become the go-to choice for organizations looking to improve their IT infrastructure and streamline their operations. One of the key offerings in the ServiceNow portfolio is the CIS-Discovery certification, which is designed to help individuals gain expertise in implementing and administering the ServiceNow Discovery application.

The CIS-Discovery Certification Exam is a challenging exam that requires a deep understanding of ServiceNow's Discovery application. To pass the exam, professionals must have hands-on experience with ServiceNow Discovery and a solid understanding of the application's architecture, data sources, and data collection strategies. CIS-Discovery exam also requires candidates to have a good understanding of IT asset management and configuration management best practices.

Enhance Your Confidence with the Online ServiceNow CIS-Discovery Practice Test Engine

As we all know, in the highly competitive world, we have no choice but improve our software power, such as international CIS-Discovery certification, working experience, educational background and so forth. Therefore, it is of great significance to have a CIS-Discovery certificate in hand to highlight your resume, thus helping you achieve success in your workplace. So with our CIS-Discovery Preparation materials, you are able to pass the exam more easily in the most efficient and productive way and learn how to study with dedication and enthusiasm. There are many advantages of our CIS-Discovery guide torrent.

ServiceNow is a popular cloud-based platform that offers a suite of IT management applications. The platform is widely used by organizations globally to streamline their IT operations and deliver better services. One of the most important modules in the ServiceNow platform is the Discovery module, which is used to map and discover IT assets and applications in an organization's

network. To become a certified expert in implementing the ServiceNow Discovery module, the ServiceNow CIS-Discovery (Certified Implementation Specialist - Discovery) certification exam is designed.

ServiceNow Certified Implementation Specialist - Discovery Sample Questions (Q45-Q50):

NEW QUESTION # 45

File-based Discovery is triggered during the .

- A. Identification Phase
- B. Classify Phase
- C. Pattern Phase
- **D. Exploration Phase**
- E. Scan Phase

Answer: D

NEW QUESTION # 46

What pattern operation allows the transfer of a file from the MID Server to a target?

- A. Manage Attachments
- B. Parse file
- C. Create Connection
- **D. Put file**

Answer: D

Explanation:

The Put file operation allows the transfer of a file from the MID Server to a target¹. This operation can be used to copy files from the MID Server to a target device, such as configuration files, scripts, or binaries². The Put file operation requires the file path on the MID Server and the file path on the target as inputs².

* 1: Put file

* 2: Define discovery steps

NEW QUESTION # 47

Which choice represents the three best ways of extending Discovery?

- **A. Classifiers, Probes & Sensors, Discovery Patterns**
- B. Orchestration, Classifiers, Probes & Sensors
- C. Orchestration, Classifiers, Discovery Patterns
- D. Classifiers, Fingerprinting, Probes & Sensors
- E. Fingerprinting, Classifiers, Discovery Patterns

Answer: A

Explanation:

ServiceNow Discovery can be extended in three main ways: Classifiers, Probes & Sensors, and Discovery Patterns. Classifiers are used to identify the type of device or application that is being discovered, based on the information returned by a probe. Probes are commands or scripts that are executed on the target device or application to collect data. Sensors are scripts that process the data collected by probes and create or update configuration items (CIs) in the CMDB. Discovery Patterns are graphical representations of the discovery process that can be customized or created to discover specific types of devices or applications, using classifiers, probes, and sensors as building blocks.

NEW QUESTION # 48

What role is required for a midserver user to communicate with ServiceNow.

Response:

- A. soap
- **B. mid server**
- C. rest

Answer: B

NEW QUESTION # 49

Which of the following choices must be installed on a MID Server to run Credential-less Discovery?

- A. Credential-less Extension
- **B. Nmap**
- C. Advanced IP Scanner
- D. Defender

Answer: B

Explanation:

Credential-less Discovery is a feature of ServiceNow Discovery that allows the instance to identify configuration items (CIs) without using credentials. Credential-less Discovery uses Network Mapper (Nmap), a free and open-source network scanner, to collect information about the CIs by sending packets and analyzing the responses. Nmap must be installed on the MID Server that runs Credential-less Discovery. Credential-less Discovery can be used as a fallback option when credential-based probes fail, or as a primary option for scanning certain types of devices, such as network devices, printers, or IoT devices¹².
