Many job-hunters want to gain the competition advantages in the labor market and become the hottest people which the companies rush to get. But if they want to realize that they must boost some valuable NSE8\_812 certificate. The NSE8\_812 certificate enjoys a high reputation among the labor market circle and is widely recognized as the proof of excellent talents and if you are one of them and you want to pass the NSE8\_812 test smoothly you can choose our NSE8\_812 practice questions.

The NSE8\_812 exam is an eight-hour, open-book exam that consists of 60 multiple-choice questions. NSE8\_812 exam covers a wide range of topics, including network design, security protocols, VPN technologies, firewall policies, and advanced threat protection. To pass the exam, candidates must score at least 70% on each section of the exam. In addition, candidates must have at least five years of experience in the network security field and hold the Fortinet NSE 7 certification.

Fortinet NSE8\_812 is an important exam that tests one's ability in network security. It is known as Fortinet NSE 8 Written Exam (NSE8\_812). By taking NSE8\_812 exam, the primary goal is to assess the candidate's knowledge of network security design, analysis, troubleshooting, and management. Additionally, the exam validates that the candidates are experts in Fortinet devices and have a deep understanding of the company's security services and solutions.

## **NSE8\_812 Reliable Exam Questions - NSE8\_812 Valid Exam Voucher**

NSE8\_812 questions & answers cover all the key points of the real test. With the NSE8\_812 training pdf, you can get the knowledge you want in the actual test, so you do not need any other study material. If the NSE8\_812 exam is coming and the time is tense, it is better to choose our NSE8\_812 Test Engine dumps. NSE8\_812 test engine can simulate the actual test during the preparation and record the wrong questions for our reviewing. You just need 20-30 hours for preparation and feel confident to face the NSE8\_812 actual test.

Fortinet NSE8\_812 exam, also known as the Fortinet NSE 8 - Written Exam, is a certification exam that is designed to validate the knowledge and skills of advanced network security professionals. NSE8\_812 exam is targeted towards professionals who are responsible for designing, implementing, and managing complex Fortinet security solutions. NSE8\_812 Exam covers a wide range of topics, including network security design, secure wireless LAN, advanced threat protection, and more.

## **Fortinet NSE 8 - Written Exam (NSE8\_812) Sample Questions (Q22-Q27):**

**NEW QUESTION # 22**

Refer to the exhibits.

The exhibits show the configuration and debug output from a FortiGate Public SDN Connector.

What is a possible reason for this dynamic address object to be empty?

- A. The Client secret is incorrect.
- B. The resource group NSE8-Lab does not exist.
- C. The Application ID is incorrect.
- D. **The App registration does not have a role with necessary read permissions on the resource group.**

**Answer: D**

#### NEW QUESTION # 23

Which two methods are supported for importing user defined Lookup Table Data into the FortiSIEM?

(Choose two.)

- A. SCP
- B. **Report**
- C. FTP
- D. **API**

**Answer: B,D**

Explanation:

FortiSIEM supports two methods for importing user defined Lookup Table Data:

\* Report: You can import lookup table data from a report. This is the most common method for importing lookup table data.

\* API: You can also import lookup table data using the FortiSIEM API. This is a more advanced method that allows you to import lookup table data programmatically.

FTP, SCP, and other file transfer protocols are not supported for importing lookup table data into FortiSIEM.

#### NEW QUESTION # 24

Refer to the exhibit showing an SD-WAN configuration.

According to the exhibit, if an internal user pings 10.1.100.2 and 10.1.100.22 from subnet 172.16.205.0/24, which outgoing interfaces will be used?

- A. port1 and port1
- B. port16 and port15
- C. port16 and port1
- D. **port1 and port15**

**Answer: D**

Explanation:

<https://docs.fortinet.com/document/fortigate/7.2.8/administration-guide/686587/ecmp-support-for-the-longest- match-in-sd-wan- rule-matching>

#### NEW QUESTION # 25

Review the VPN configuration shown in the exhibit.

What is the Forward Error Correction behavior if the SD-WAN network traffic download is 500 Mbps and has 8% of packet loss in the environment?

- A. 2 redundant packet for every 8 base packets
- B. 3 redundant packet for every 5 base packets
- C. **1 redundant packet for every 10 base packets**
- D. 3 redundant packet for every 9 base packets

**Answer: C**

#### Explanation:

The FEC configuration in the exhibit specifies that if the packet loss is greater than 10%, then the FEC mapping will be 8 base packets and 2 redundant packets. The download bandwidth of 500 Mbps is not greater than 950 Mbps, so the FEC mapping is not overridden by the bandwidth setting. Therefore, the FEC behavior will be 2 redundant packets for every 8 base packets.

Here is the explanation of the FEC mappings in the exhibit:

\* Packet loss greater than 10%: 8 base packets and 2 redundant packets.

\* Upload bandwidth greater than 950 Mbps: 9 base packets and 3 redundant packets.

The mappings are matched from top to bottom, so the first mapping that matches the conditions will be used.

In this case, the first mapping matches because the packet loss is greater than 10%. Therefore, the FEC behavior will be 2 redundant packets for every 8 base packets.

#### NEW QUESTION # 26

Refer to the exhibit.

You have deployed a security fabric with three FortiGate devices as shown in the exhibit. FGT\_2 has the following configuration:

FGT\_1 and FGT\_3 are configured with the default setting. Which statement is true for the synchronization of fabric-objects?

- A. Objects from the root FortiGate will not be synchronized to any downstream FortiGate.
- **B. Objects from the root FortiGate will only be synchronized to FGT\_3.**
- C. Objects from the FortiGate FGT\_2 will be synchronized to the upstream FortiGate.
- D. Objects from the root FortiGate will only be synchronized to FGT\_2.

#### Answer: B

Explanation:

<https://docs.fortinet.com/document/fortigate/6.4.0/new-features/520820/improvements-to-synchronizing-objects-across-the-security-fabric-6-4-4>
