질문 # 113

You have a Microsoft 365 subscription that contains the users shown in the following table.

Name	Assigned license
User1	Microsoft 365 E3
User2	Microsoft 365 F3
User3	Microsoft 365 E5

You review the audit retention period of each user.

Which users' audit logs are retained for nine months?

- A. User1, User2, and User3
- B. User3 only

- C. User2 and User3
- D. User1 and User3

정답: B

질문 # 114

You have a Microsoft 365 E5 subscription.

You need to create a sensitivity label named Label1. The solution must ensure that users can use Microsoft 365 Copilot to summarize files that have Label1 applied.

Which permission should you select for Label1?

- A. Export content(EXPORT)
- **B. Copy and extract content(EXTRACT)**
- C. View rights(VIEW)
- D. Edit content(DOCEDIT)

정답: B

설명:

To allow Microsoft 365 Copilot to summarize files that have Label1 applied, the label must grant permission to extract content from the document. The correct permission for this is Copy and extract content (EXTRACT).

Microsoft 365 Copilot requires access to read and process content in documents to generate summaries. The EXTRACT permission allows users (and AI tools like Copilot) to copy and extract content for processing while still maintaining the protection applied by the sensitivity label.

질문 # 115

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

You implement Microsoft 365 Endpoint data loss prevention (Endpoint DLP).

You have computers that run Windows 11 and have Microsoft 365 Apps installed. The computers are joined to a Microsoft Entra tenant.

You need to ensure that Endpoint DLP policies can protect content on the computers.

Solution: You deploy the Endpoint DLP configuration package to the computers.

Does this meet the goal?

- **A. Yes**
- B. No

정답: A

설명:

Correct:

* You deploy the Endpoint DLP configuration package to the computers.

* You onboard the computers to Microsoft Defender for Endpoint.

Incorrect:

* You deploy the unified labeling client to the computers.

* You enroll the computers in Microsoft Intune.

* You deploy the Microsoft Purview Information Protection client to the computers.
