100% Pass High-quality CDCS-001 - Reliable Certified Data Centre Specialist (CDCS) Dumps Files

With all CDCS-001 practice materials being brisk in the international market, our CDCS-001 practice materials are quite catches with top-ranking quality. But we do not stop the pace of making advancement by following the questions closely according to exam. So our experts make new update as supplementary updates. During your transitional phrase to the ultimate aim, our CDCS-001 practice materials as well as these updates are referential. Those materials can secede you from tremendous materials with least time and quickest pace based on your own drive and practice to win. Those updates will be sent to you accordingly for one year freely.

GAQM CDCS-001 (Certified Data Centre Specialist) Certification Exam is a globally recognized certification program designed to validate the knowledge and skills of professionals working in the data center industry. Certified Data Centre Specialist (CDCS) certification program is developed by the Global Association for Quality Management (GAQM) and is designed to help professionals enhance their expertise in managing data center operations, infrastructure, and security.

The CDCS exam is ideal for IT professionals who are responsible for managing data centres or are involved in the design and implementation of data centre solutions. The program is also suitable for professionals who are seeking to enhance their skills and knowledge in the area of data centre management.

GAQM Certified Data Centre Specialist (CDCS) Sample Questions (Q61-Q66):

NEW QUESTION # 61

For which one of these processes is Direct Current essential, and will not work with alternating current?

- A. Turning a motor
- B. Heating
- C. Lighting
- D. Electrolysis

Answer: D

Explanation:

Direct Current (DC) is essential for the process of electrolysis. Electrolysis is the process of breaking down a compound using an electric current. The electric current causes ions to move, which results in a chemical reaction that breaks down the compound. In order for electrolysis to work, a direct current is required, as the ions must flow in one direction. Alternating Current (AC) changes direction and would not provide a consistent flow of ions.

Heating, lighting, and turning a motor can be done by either DC or AC. Heating can be done by passing an electric current through a heating element, which can be powered by either DC or AC. Lighting can be done by passing an electric current through a light bulb, which can be powered by either DC or AC. A motor can be powered by either DC or AC, but the type of motor and the application will determine which type of current is more suitable.

NEW QUESTION # 62

Which one of the following is an advantage of using Natural Gas?

- A. More exhaust able
- B. Maximum carbon build up
- C. Minimum carbon build up
- D. Tends to cost more

Answer: C

Explanation:

Explanation

The main advantage of using natural gas is that it tends to produce fewer carbon emissions than other fossil fuels, such as coal or oil. Natural gas combustion produces less carbon dioxide and other pollutants than other fuels, making it a cleaner and more renewable source of energy. Additionally, natural gas costs less than other fuels, making it a more cost-effective option.

NEW QUESTION # 63

Which one of the following is an advantage of Glycol Cooled System?

- A. No additional cost is required
- B. Can be used in big data centers

- C. Glycol pipes can run long distances and can service several CRAC units
- D. No maintenance of glycol

Answer: C

Explanation:

Explanation

Glycol cooled systems are advantageous because they are efficient and can service large data centers with multiple racks. Furthermore, glycol pipes can run long distances, allowing a single system to service several CRAC units. This eliminates the need for multiple systems, resulting in cost savings and reduced maintenance.

NEW QUESTION # 64

True or False: The availability of fuel typically determines the type of standby generator chosen.

- A. True
- B. False

Answer: A

NEW QUESTION # 65

What is a Data Center?

- A. A building or a portion of a building where debugging takes place
- B. A building or portion of a building whose primary function is to research new data.
- C. A room in a building dedicated to monitoring data and information.
- D. A building or a portion of a building whose primary function is to house a computer room and its related support areas

Answer: D

Explanation:

A building or a portion of a building whose primary function is to house a computer room and its related support areas. A Data Center is a secure, temperature-controlled environment that houses computer systems, equipment, and associated components. It is typically used to store, process, and distribute large amounts of data and information. Data Centers typically include server racks, storage arrays, network switches, firewalls, and other components necessary for the operation of computer systems.
