

GH-100 Reliable Exam Camp - Reliable GH-100 Exam Camp

P.S. Free & New GH-100 dumps are available on Google Drive shared by PracticeTorrent: https://drive.google.com/open?id=19hH_mcJhN5C_-avF9uxqgnleZGZ_1wg0

If you are busing with your work or study, and have little time for preparation of your exam, our GH-100 questions and answers will be your best choice. With experienced experts to compile and verify, GH-100 exam dumps contain most of the knowledge points for the exam, and you just need to spend about 48 to 72 hours on study, you can pass the exam just one time. In addition, you can try free demo before buying GH-100 Materials, so that you can have a better understanding of what you are going to buy. You can get downloading link and password within ten minutes after payment, so that you can start your learning right away.

Microsoft GH-100 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">• Manage access and permissions based on membership: This section of the exam measures skills of DevOps Engineers and reviews how to manage organizations, teams, and repository permissions. It includes default permission settings, team synchronization through AD, scripting across multiple organizations, and aligning enterprise policies with trust requirements. It also contrasts roles such as organization members, owners, collaborators, and billing managers.
Topic 2	<ul style="list-style-type: none">• Manage GitHub Packages: This section of the exam measures skills of GitHub Enterprise Administrators and focuses on managing GitHub Packages, their use in workflows, and how they differ from releases. It involves accessing, writing, and sharing packages across teams while ensuring integration into CI• CD pipelines.
Topic 3	<ul style="list-style-type: none">• Manage user identities and GitHub authentication: This section of the exam measures skills of DevOps Engineers and focuses on managing authentication and identity across organizations using SAML SSO, SCIM, and team synchronization. Candidates need to understand identity providers, user membership implications, authorization models, and enforcing security measures such as two-factor authentication.
Topic 4	<ul style="list-style-type: none">• Support GitHub Enterprise for users and key stakeholders: This section of the exam measures skills of GitHub Enterprise Administrators and covers supporting users, identifying issues that can be resolved internally versus those needing GitHub Support, and generating support bundles and diagnostics. It also involves recognizing underutilized features, managing workflows like branching and pull requests, understanding CI• CD strategies, recommending tooling, and extending capabilities through APIs or Marketplace apps.

Topic 5	<ul style="list-style-type: none"> • Manage GitHub Actions: This section of the exam measures skills of DevOps Engineers and emphasizes managing workflows, reusable actions, and distribution strategies within the enterprise. It explains configuring organization-level policies, managing self-hosted and GitHub-hosted runners, controlling access through IP allow lists, handling encrypted secrets, and integrating third-party vaults for workflow security.

Reliable GH-100 Exam Camp | New APP GH-100 Simulations

The loss of personal information in the information society is indeed very serious, but GH-100 guide materials can assure you that we will absolutely protect the privacy of every user. Our GH-100 study braindumps users are all over the world, is a very international product, our GH-100 Exam Questions are also very good in privacy protection. And we offer good services on our GH-100 learning guide to make sure that every detail is perfect.

Microsoft GitHub Administration Sample Questions (Q39-Q44):

NEW QUESTION # 39

What is the effect of enforcing a policy that restricts GitHub Actions to only those created by the enterprise?

- A. Marketplace actions are allowed only with SSO enabled
- B. All public actions are allowed
- **C. Only actions created within the enterprise are allowed**
- D. Actions can only be triggered by organization members

Answer: C

Explanation:

When you enforce the "Allow enterprise actions and reusable workflows" policy, GitHub will block all workflows from using actions or reusable workflows that aren't defined in a repository within your enterprise - so only actions created inside your enterprise are allowed.

NEW QUESTION # 40

Which of the following correctly describes the difference between controlling actions at the enterprise level versus the organization level in GitHub?

- A. Enterprise policies can block specific actions, while organization policies can only enable or disable actions entirely.
- **B. Enterprise policies configure mandatory settings for organizations.**
- C. Enterprise policies apply only to public repositories, while organization policies apply to public, internal, and private repositories.
- D. Enterprise policies and organization policies are independent, with organization policies taking precedence for repositories within the organization.

Answer: B

Explanation:

Enterprise policies let you define and enforce mandatory settings across all member organizations - organization-level policies then operate within the options that the enterprise policy exposes.

NEW QUESTION # 41

Which THREE of the following accurately describe how the SCIM protocol enhances user management in GitHub Enterprise Cloud? (Choose three.)

- A. SCIM automatically deletes organization repositories when administrators are removed.
- B. SCIM configures repository permissions based on user roles within the organization.
- **C. SCIM deactivates GitHub accounts when users are deleted from the identity provider.**

- D. SCIM automates user provisioning when new users are added to the identity provider.
- E. SCIM generates authentication tokens for accessing GitHub's REST API.
- F. SCIM synchronizes changes to user attributes from the identity provider to GitHub.

Answer: C,F

Explanation:

SCIM automatically updates a user's account on GitHub whenever their profile attributes change in the identity provider.

When a user is removed or deactivated in the IdP, SCIM deactivates (soft-deprovisions) their GitHub account and disables access.

SCIM provisions new GitHub Enterprise Cloud accounts automatically when users are added in the identity provider.

NEW QUESTION # 42

Which of the following is true about outside collaborators in a GitHub organization?

- A. They have access to all private repositories by default.
- B. They are granted explicit access to specific repositories.
- C. They inherit organization-wide policies, such as SSO requirements.
- D. They appear in the organization's internal member list.

Answer: B

Explanation:

Outside collaborators aren't organization members; instead, they're granted explicit access - at read, write, or admin level - to only the repositories you choose.

NEW QUESTION # 43

What makes GitHub Apps a more secure choice for automation over OAuth Apps?

- A. GitHub Apps always require two-factor authentication.
- B. GitHub Apps authenticate as an app with fine-grained permissions, not as a user.
- C. GitHub Apps are limited to read-only access and cannot write to repositories.
- D. GitHub Apps can only be installed by organization owners.

Answer: B

Explanation:

GitHub Apps authenticate as themselves with fine-grained, installation-scoped permissions and short-lived tokens - rather than inheriting a user's broad OAuth scopes - minimizing blast radius and aligning with least-privilege principles.

NEW QUESTION # 44

.....

If the user fails in the GH-100 exam questions for any reason, we will refund the money after this process. In addition, we provide free updates to users for one year long. If the user finds anything unclear in the GH-100 practice materials exam, we will send email to fix it, and our team will answer all of your questions related to the GH-100 Guide prep. What is more, we provide the free demos of our GH-100 study prep for our customers to download before purchase.
