Exam Dumps Palo Alto Networks PSE-Strata-Pro-24 Free | PSE-Strata-Pro-24 Free Updates

2025 Latest PracticeMaterial PSE-Strata-Pro-24 PDF Dumps and PSE-Strata-Pro-24 Exam Engine Free Share:
https://drive.google.com/open?id=1G5eZ2pz9rJ_QLYtIs_VL3z8hLReubkNh

It doesn't matter if it's your first time to attend PSE-Strata-Pro-24 practice test or if you are freshman in the IT certification test, our latest PSE-Strata-Pro-24 dumps guide will boost you confidence to face the challenge. Our dumps collection will save you much time and ensure you get high mark in PSE-Strata-Pro-24 Actual Test with less effort. Come and check the free demo in our website you won't regret it.

Palo Alto Networks PSE-Strata-Pro-24 Exam Syllabus Topics:

Topic	Details
Topic 1	• Deployment and Evaluation: This section of the exam measures the skills of Deployment Engineers and focuses on identifying the capabilities of Palo Alto Networks NGFWs. Candidates will evaluate features that protect against both known and unknown threats. They will also explain identity management from a deployment perspective and describe the proof of value (PoV) process, which includes assessing the effectiveness of NGFW solutions.
Topic 2	• Architecture and Planning: This section of the exam measures the skills of Network Architects and emphasizes understanding customer requirements and designing suitable deployment architectures. Candidates must explain Palo Alto Networks' platform networking capabilities in detail and evaluate their suitability for various environments. Handling aspects like system sizing and fine-tuning is also a critical skill assessed in this domain.
Topic 3	• Network Security Strategy and Best Practices: This section of the exam measures the skills of Security Strategy Specialists and highlights the importance of the Palo Alto Networks five-step Zero Trust methodology. Candidates must understand how to approach and apply the Zero Trust model effectively while emphasizing best practices to ensure robust network security.
Topic 4	• Business Value and Competitive Differentiators: This section of the exam measures the skills of Technical Business Value Analysts and focuses on identifying the value proposition of Palo Alto Networks Next-Generation Firewalls (NGFWs). Candidates will assess the technical business benefits of tools like Panorama and SCM. They will also recognize customer-relevant topics and align them with Palo Alto Networks' best solutions. Additionally, understanding Strata's unique differentiators is a key component of this domain.

PSE-Strata-Pro-24 Free Updates, PSE-Strata-Pro-24 Updated Demo

This helps you save your money and time as the actual Palo Alto Networks Systems Engineer Professional - Hardware Firewall PSE-Strata-Pro-24 certification exam costs a high fee. Palo Alto Networks also offers 365 days free updates if the PSE-Strata-Pro-24 certification exam content changes after the purchase of the Palo Alto Networks PSE-Strata-Pro-24 Exam Dumps. We guarantee our valued customers that you will qualify for your Palo Alto Networks PSE-Strata-Pro-24 exam, hence this saves you time and money.

Palo Alto Networks Systems Engineer Professional - Hardware Firewall Sample Questions (Q55-Q60):

NEW QUESTION # 55
Which two compliance frameworks are included with the Premium version of Strata Cloud Manager (SCM)? (Choose two)

- A. Health Insurance Portability and Accountability Act (HIPAA)
- B. Payment Card Industry (PCI)
- C. National Institute of Standards and Technology (NIST)
- D. Center for Internet Security (CIS)

Answer: B,C

Explanation:
Step 1: Understanding Strata Cloud Manager (SCM) Premium
Strata Cloud Manager is a unified management interface for Strata NGFWs, Prisma Access, and other Palo Alto Networks solutions. The Premium version (subscription-based) includes advanced features like:
* AIOps Premium: Predictive analytics, capacity planning, and compliance reporting.
* Compliance Posture Management: Pre-built dashboards and reports for specific regulatory frameworks.
Compliance frameworks in SCM Premium provide visibility into adherence to standards like PCI DSS and NIST, generating actionable insights and audit-ready reports based on firewall configurations, logs, and traffic data.
Reference: Strata Cloud Manager Documentation
"SCM Premium delivers compliance reporting for industry standards, integrating with NGFW telemetry to ensure regulatory alignment." Step 2: Evaluating the Compliance Frameworks Option A: Payment Card Industry (PCI) Analysis: The Payment Card Industry Data Security Standard (PCI DSS) is a mandatory framework for organizations handling cardholder data. SCM Premium includes a PCI DSS Compliance Dashboard that maps NGFW configurations (e.g., security policies, decryption, Threat Prevention) to PCI DSS requirements (e.g., Requirement 1: Firewall protection, Requirement 6: Vulnerability protection). It tracks compliance with controls like network segmentation, encryption, and monitoring, critical for Strata NGFW deployments in payment environments.
Evidence: Palo Alto Networks emphasizes PCI DSS support in SCM Premium for retail, financial, and e- commerce customers, providing pre-configured reports for audits.
Conclusion: Included in SCM Premium.
Reference: Strata Cloud Manager Premium Features Overview
"PCI DSS compliance reporting ensures cardholder data protection with automated insights." Option B: National Institute of Standards and Technology (NIST) Analysis: NIST frameworks, notably the NIST Cybersecurity Framework (CSF) and NIST SP 800-53, are widely adopted for cybersecurity risk management, especially in government and critical infrastructure sectors. SCM Premium offers a NIST Compliance Dashboard, aligning NGFW settings (e.g., App-ID, User- ID, logging) with NIST controls (e.g., Identify, Protect, Detect, Respond, Recover). This is key for Strata customers needing federal compliance or a risk-based approach.
Evidence: Palo Alto Networks documentation highlights NIST CSF and 800-53 mapping in SCM Premium, reflecting its broad applicability.
Conclusion: Included in SCM Premium.
Reference: Strata Cloud Manager AIOps Premium Datasheet
"NIST compliance reporting supports risk management and regulatory adherence." Option C: Center for Internet Security (CIS) Analysis: The CIS Controls and Benchmarks provide practical cybersecurity guidelines (e.g., CIS Controls v8, CIS Benchmarks for OS hardening). While Palo Alto Networks supports CIS principles (e.g., via Best Practice Assessments), SCM Premium documentation does not explicitly list a dedicated CIS Compliance Dashboard. CIS alignment is often manual or supplementary, not a pre-built feature like PCI or NIST.
Evidence: No direct evidence in SCM Premium feature sets confirms CIS as a standard inclusion; it's more commonly referenced in

standalone tools like CIS-CAT or Expedition.

Conclusion: Not included in SCM Premium.

Reference: PAN-OS Administrator's Guide (11.1) - Best Practices

"CIS alignment is supported but not a native SCM Premium framework."

Option D: Health Insurance Portability and Accountability Act (HIPAA)

Analysis: HIPAA governs protected health information (PHI) security in healthcare. While Strata NGFWs can enforce HIPAA-compliant policies (e.g., encryption, access control), SCM Premium does not feature a dedicated HIPAA Compliance Dashboard. HIPAA compliance is typically achieved through custom configurations and external audits, not a pre-configured SCM framework.

Evidence: Palo Alto Networks documentation lacks mention of HIPAA as a standard SCM Premium offering, unlike PCI and NIST.

Conclusion: Not included in SCM Premium.

Reference: Strata Cloud Manager Documentation

"HIPAA compliance is supported via NGFW capabilities, not SCM Premium dashboards." Step 3: Why A and B Are Correct A (PCI): Directly addresses a common Strata NGFW use case (payment security) with a tailored dashboard, reflecting SCM Premium's focus on industry-specific compliance.

B (NIST): Provides a flexible, widely adopted framework for cybersecurity, integrated into SCM Premium for broad applicability across sectors.

Exclusion of C and D: CIS and HIPAA, while relevant to NGFW deployments, lack dedicated, pre-built compliance reporting in SCM Premium, making them supplementary rather than core inclusions.

Step 4: Verification Against SCM Premium Features

SCM Premium's compliance posture management explicitly lists PCI DSS and NIST (e.g., CSF, 800-53) as supported frameworks, leveraging NGFW telemetry (e.g., Monitor > Logs > Traffic) and AIOps analytics.

This aligns with Palo Alto Networks' focus on high-demand regulations as of PAN-OS 11.1 and SCM updates through March 08, 2025.

Reference: Strata Cloud Manager Release Notes (March 2025)

"Premium version includes PCI DSS and NIST compliance dashboards for automated reporting." Conclusion The two compliance frameworks included with the Premium version of Strata Cloud Manager are A.

Payment Card Industry (PCI) and B. National Institute of Standards and Technology (NIST). These are verified by SCM Premium's documented capabilities, ensuring Strata NGFW customers can meet regulatory requirements efficiently.

NEW QUESTION # 56

A systems engineer (SE) successfully demonstrates NGFW managed by Strata Cloud Manager (SCM) to a company. In the resulting planning phase of the proof of value (POV), the CISO requests a test that shows how the security policies are either meeting, or are progressing toward meeting, industry standards such as Critical Security Controls (CSC), and how the company can verify that it is effectively utilizing the functionality purchased.

During the POV testing timeline, how should the SE verify that the POV will meet the CISO's request?

- A. At the beginning, work with the customer to create custom dashboards and reports for any information required, so reports can be pulled as needed by the customer.
- B. Near the end, the customer pulls information from these SCM dashboards: Best Practices, CDSS Adoption, and NGFW Feature Adoption.
- C. At the beginning, use PANhandler golden images that are designed to align to compliance and to turning on the features for the CDSS subscription being tested.
- D. Near the end, pull a Security Lifecycle Review (SLR) in the POV and create a report for the customer.

Answer: A

Explanation:

The SE has demonstrated an NGFW managed by SCM, and the CISO now wants the POV to show progress toward industry standards (e.g., CSC) and verify effective use of purchased features (e.g., CDSS subscriptions like Advanced Threat Prevention). The SE must ensure the POV delivers measurable evidence during the testing timeline. Let's evaluate the options.

Step 1: Understand the CISO's Request

* Industry Standards (e.g., CSC): The Center for Internet Security's Critical Security Controls (e.g., CSC 1: Inventory of Devices, CSC 4: Secure Configuration) require visibility, threat prevention, and policy enforcement, which NGFW and SCM can address.

* Feature Utilization: Confirm that licensed functionalities (e.g., App-ID, Threat Prevention, URL Filtering) are active and effective.

* POV Goal: Provide verifiable progress and utilization metrics within the testing timeline.

NEW QUESTION # 57

Which two compliance frameworks are included with the Premium version of Strata Cloud Manager (SCM)? (Choose two)

- A. Health Insurance Portability and Accountability Act (HIPAA)
- B. Payment Card Industry (PCI)
- C. National Institute of Standards and Technology (NIST)
- D. Center for Internet Security (CIS)

Answer: B,C

Explanation:
Step 1: Understanding Strata Cloud Manager (SCM) Premium
Strata Cloud Manager is a unified management interface for Strata NGFWs, Prisma Access, and other Palo Alto Networks solutions. ThePremium version(subscription-based) includes advanced features like:
* AIOps Premium: Predictive analytics, capacity planning, and compliance reporting.
* Compliance Posture Management: Pre-built dashboards and reports for specific regulatory frameworks.
Compliance frameworks in SCM Premium provide visibility into adherence to standards like PCI DSS and NIST, generating actionable insights and audit-ready reports based on firewall configurations, logs, and traffic data.

NEW QUESTION # 58
A company with a large Active Directory (AD) of over 20,000 groups has user roles based on group membership in the directory. Up to 1,000 groups may be used in Security policies. The company has limited operations personnel and wants to reduce the administrative overhead of managing the synchronization of the groups with their firewalls.
What is the recommended architecture to synchronize the company's AD with Palo Alto Networks firewalls?

- A. Configure a group mapping profile with an include group list.
- B. Configure NGFWs to synchronize with the AD after deploying the Cloud Identity Engine (CIE) and agents.
- C. Configure a group mapping profile with custom filters for LDAP attributes that are mapped to the user roles.
- D. Configure a group mapping profile, without a filter, to synchronize all groups.

Answer: A

Explanation:
Synchronizing a large Active Directory (AD) with over 20,000 groups can introduce significant overhead if all groups are synchronized, especially when only a subset of groups (e.g., 1,000 groups) are required for Security policies. The most efficient approach is to configure agroupmapping profile with an include group listto minimize unnecessary synchronization and reduce administrative overhead.
* Why "Configure a group mapping profile with an include group list" (Correct Answer C)?Using a group mapping profile with aninclude group listensures that only the required 1,000 groups are synchronized with the firewall. This approach:
* Reduces the load on the firewall's User-ID process by limiting the number of synchronized groups.
* Simplifies management by focusing on the specific groups relevant to Security policies.
* Avoids synchronizing the entire directory (20,000 groups), which would be inefficient and resource-intensive.
* Why not "Configure a group mapping profile, without a filter, to synchronize all groups" (Option B)?Synchronizing all 20,000 groups would unnecessarily increase administrative and resource overhead. This approach contradicts the requirement to reduce administrative burden.
* Why not "Configure a group mapping profile with custom filters for LDAP attributes that are mapped to the user roles" (Option A)?While filtering LDAP attributes can be useful, this approach is more complex to implement and manage compared to an include group list. It does not directly address the problem of limiting synchronization to a specific subset of groups.
* Why not "Configure NGFWs to synchronize with the AD after deploying the Cloud Identity Engine (CIE) and agents" (Option D)?
While the Cloud Identity Engine (CIE) is a modern solution for user and group mapping, it is unnecessary in this scenario. A traditional group mapping profile with an include list is sufficient and simpler to implement. CIE is typically used for complex hybrid or cloud environments.

NEW QUESTION # 59
Which three use cases are specific to Policy Optimizer? (Choose three.)

- A. Discovering 5-tuple attributes that can be simplified to 4-tuple attributes
- B. Enabling migration from port-based rules to application-based rules
- C. Converting broad rules based on application filters into narrow rules based on application groups
- D. Automating the tagging of rules based on historical log data

- E. Discovering applications on the network and transitions to application-based policy over time

Answer: B,D,E

Explanation:
The question asks for three use cases specific to Policy Optimizer, a feature in PAN-OS designed to enhance security policy management on Palo Alto Networks Strata Hardware Firewalls. Policy Optimizer helps administrators refine firewall rules by leveraging App-ID technology, transitioning from legacy port-based policies to application-based policies, and optimizing rule efficiency. Below is a detailed explanation of why options A, C, and E are the correct use cases, verified against official Palo Alto Networks documentation.
Step 1: Understanding Policy Optimizer in PAN-OS
Policy Optimizer is a tool introduced in PAN-OS 9.0 and enhanced in subsequent versions (e.g., 11.1), accessible under Policies > Policy Optimizer in the web interface. It analyzes traffic logs to:
* Identify applications traversing the network.
* Suggest refinements to security rules (e.g., replacing ports with App-IDs).
* Provide insights into rule usage and optimization opportunities.
Its primary goal is to align policies with Palo Alto Networks' application-centric approach, improving security and manageability on Strata NGFWs.

NEW QUESTION # 60

......

If you are one of such frustrated candidates, don't get panic. PracticeMaterial declares its services in providing the real PSE-Strata-Pro-24 PDF Questions. It ensures that you would qualify for the Palo Alto Networks Systems Engineer Professional - Hardware Firewall (PSE-Strata-Pro-24) certification exam on the maiden strive with brilliant grades. PracticeMaterial has formulated the Palo Alto Networks Systems Engineer Professional - Hardware Firewall (PSE-Strata-Pro-24) product in three versions. You will find their specifications below to understand them better.
