## Google Cloud Certified - Professional Google Workspace Administrator 認定Google-Workspace-Administrator 試験問題 (Q82-Q87):

### 質問 # 82

You are the Workspace administrator for an international organization with Enterprise Plus Workspace licensing. A third of your employees are located in the United States, another third in Europe, and the other third geographically dispersed around the world. European employees

are required to have their data stored in Europe. The current OU structure for your organization is organized by business unit, with no attention to user location. How do you configure Workspace for the fastest end user experience while also ensuring that European user data is contained in Europe?

- A. Configure a data region at the top level OU of your organization, and set the value to "Europe".
- **B. Add three additional OU structures to designate location within the current OU structure. Assign the corresponding data region to each.**
- C. Configure a configuration group for European users, and set the data region to "Europe".
- D. Configure three configuration groups within your domain. Assign the appropriate data regions to each corresponding group, but assign no preference to the users outside of the United States and Europe.

**正解: B**

解説:

- \* Assess Current OU Structure: Begin by evaluating the current organizational unit (OU) structure, which is organized by business unit.
- \* Create Location-Based OUs: Add three additional OUs under the existing structure to categorize users based on their geographical location: United States, Europe, and Other Regions.
- \* Assign Users to New OUs: Move users into the newly created location-based OUs according to their physical location.
- \* Set Data Regions: Assign the appropriate data region for each new OU. For the European OU, set the data region to "Europe" to ensure compliance with data residency requirements.
- \* Validate Configuration: Ensure that the configuration is correctly implemented and verify that European user data is being stored in Europe.
- \* Monitor Performance: Regularly monitor and optimize the system to ensure the fastest end-user experience globally.

#### 質問 # 83

On which two platforms can you push WiFi connection information with Google Workspace? (Choose two.)

- **A. Chrome OS**
- B. Linux
- C. Windows
- D. Mac OS
- **E. iOS**

**正解: A、E**

#### 質問 # 84

An end user has thousands of files stored in Google Drive. Their files are well organized with Drive labels. You need to advise the end user on how to quickly identify all files that are contracts. What should you do?

- A. Advise the user to search in Drive for files with the keyword 'contracts', and use the 'modified by me' filter.
- **B. Advise the user to search for files that are labeled as 'contracts'.**
- C. Advise the user to use the Google Drive API to search for files with the keyword 'contracts'
- D. Advise the user to use the Investigation tool to search for files with the keyword 'contracts' and updated by you.

**正解: B**

解説:

Since the files are already organized with labels in Google Drive, the most efficient way for the user to quickly identify all files that are contracts is to search for files with the "contracts" label. This will filter and display only the files labeled as contracts, making it the quickest and most straightforward method for locating the required files.
