Pegasystems Certified Pega Lead System Architecture (LSA) Exam 23

Sample Questions (Q27-Q32):

NEW QUESTION # 27
A financial institution uses a Pega application to manage customer data, including sensitive personal information. Under regulations such as the General Data Protection Regulation, customers have the right to access, modify, or delete their personal data. The institution implements client-based access control (CBAC) in Pega Platform to comply with these regulations. Which statement best describes CBAC?

- A. CBAC influences authorization considerations for lead system architects during Pega application design.
- B. CBAC helps to ensure data encryption for sensitive personal information in the Pega database.
- C. CBAC automates user authentication and login processes in Pega applications.
- D. CBAC focuses on tracking and processing requests to view, update, or remove personal customer data across applications.

Answer: D

Explanation:
Comprehensive and Detailed Explanation From Exact Extract:
Pega's Client-Based Access Control (CBAC), as outlined in Pega Academy'sSecurity Missionand thePega Certified Lead System Architect Study Guide, is designed to comply with data privacy regulations like GDPR by managing customer requests for data access, modification, or deletion. It focuses on processing these requests efficiently and securely.
* Option A (Incorrect): CBAC does not automate user authentication or login processes. Authentication is handled by mechanisms like SSO or LDAP, per theAuthenticationmodule.
* Option B (Incorrect): CBAC does not ensure data encryption, which is managed by Pega's database and infrastructure security features (e.g., encryption at rest), as noted in theData Securityguidelines.
* Option C (Correct): CBAC tracks and processes customer requests to view, update, or delete personal data, ensuring compliance with regulations like GDPR. This is its primary function, as documented in theClient-Based Access Controlsection of Pega Community.
* Option D (Incorrect): While CBAC may influence authorization design, its primary role is processing data requests, not defining authorization policies, per theAccess Controlmodule.
:
Pega Academy:Security Mission(covers CBAC and GDPR compliance).
Pega Community:Client-Based Access Control(details on data request processing).
Pega Certified Lead System Architect Study Guide (v23): Section onSecurity Design(emphasizes CBAC for data privacy).

NEW QUESTION # 28
In a complex SQL query, what is the purpose of using a "GROUP BY" clause?

- A. To group rows with the same values into summary rows.
- B. To filter the results based on specified conditions.
- C. To sort the results in ascending or descending order.
- D. To perform calculations on numeric columns.

Answer: A

NEW QUESTION # 29
