In order not to let success pass you by, do it quickly.

## **SAP Certified Associate - Implementation Consultant - SAP S/4HANA Cloud Public Edition, Sourcing and Procurement Sample Questions (Q26-Q31):**

**NEW QUESTION # 26**

In which SAP Activate methodology phase do consultants configure business processes based on the information gathered in the Fit-to-Standard workshops?

- A. Deploy
- B. Explore
- C. Prepare
- **D. Realize**

**Answer: D**

Explanation:

In the SAP Activate methodology, the **Realize** phase is where consultants configure business processes based on the information gathered during the Fit-to-Standard workshops in the **Explore** phase. This phase focuses on implementing the solution, including configuring the system, testing, and validating business processes.

\* **Realize** (Option C): During the **Realize** phase, consultants use the insights from Fit-to-Standard workshops to configure the system according to the customer's business requirements. This includes setting up master data, organizational structures, and process-specific configurations. The SAP Activate Methodology Guide confirms this as the phase where configuration occurs.

\* **A. Prepare**: The **Prepare** phase focuses on project planning, team setup, and initial scoping.

Configuration activities are not part of this phase.

\* **B. Explore**: The **Explore** phase involves conducting Fit-to-Standard workshops to understand business requirements but does not include system configuration.

\* **D. Deploy**: The **Deploy** phase focuses on going live and post-go-live support, not on configuring business processes.

\* **SAP Activate Methodology Guide**: Explains the phases of the SAP Activate methodology, including the **Realize** phase. <https://help.sap.com>

\* **SAP S/4HANA Cloud Implementation Guide**: Provides details on how business processes are configured during the **Realize** phase.

Why Option C is Correct: Why the Other Options Are Incorrect: Key References:

## NEW QUESTION # 27

Which scope item covers the requisitioning of raw materials and goods for production?

- A. Quality Management in Procurement (1FM)
- **B. Procurement of Direct Materials (J45)**
- C. Requisitioning (18J)
- D. Consumable Purchasing (BNX)

**Answer: B**

Explanation:

The scope item "Procurement of Direct Materials (J45)" specifically covers the requisitioning of raw materials and goods for production. Here's why this is the correct answer:

\* **Procurement of Direct Materials (J45)**: This scope item focuses on the procurement of materials that are directly used in the production process. It includes functionalities such as creating purchase requisitions, managing material requirements planning (MRP), and ensuring timely availability of raw materials for production.

\* **Requisitioning (18J)**: The Requisitioning scope item is more generic and covers the creation of purchase requisitions for various purposes, including indirect materials and services. It does not specifically focus on direct materials for production.

\* **Consumable Purchasing (BNX)**: This scope item is tailored for purchasing consumable materials, such as office supplies or maintenance materials, which are not directly tied to production processes.

\* **Quality Management in Procurement (1FM)**: This scope item deals with quality inspections and assurance in procurement processes but does not address the requisitioning of raw materials for production.

## NEW QUESTION # 28

How is the KP! Contract leakage percentage defined?

- **A. Spend of purchase orders without contract reference despite existing contract**
- B. Confirmed spend of purchase orders with contract reference
- C. Quantity of purchase orders without contract reference despite existing contract

- D. Confirmed quantity of purchase orders with contract reference

**Answer: A**

#### **NEW QUESTION # 29**

Which of the following apps can you use to extend the organizational data of an already existing material/product in SAP S/4HANA Cloud Public Edition? Note: There are 2 correct answers to this question.

- A. Change Material
- B. **Manage Product Master Data**
- C. Manage Source Data Products
- D. Create Material

**Answer: B,D**

#### **NEW QUESTION # 30**

If a customer wants to develop their own custom application and integrate it with SAP S/4HANA Cloud Public Edition, what tools would you recommend to develop the app? Note: There are 2 correct answers to this question.

- A. **SAP Business Application Studio**
- B. SAP HANA Cloud
- C. **SAP Build**
- D. SAP Cloud Portal Service

**Answer: A,C**

Explanation:

To develop custom applications and integrate them with SAP S/4HANA Cloud Public Edition, SAP provides tools that cater to both professional developers and citizen developers. Below is an explanation of the correct answers:

\* SAP Business Application Studio (A): This is a professional development environment designed for building custom applications using modern technologies like SAP Cloud Application Programming Model (CAP) and APIs. It supports full-stack development and integration with SAP S/4HANA Cloud.

\* SAP Build (B): SAP Build is a low-code/no-code platform that enables non-developers (citizen developers) to create custom applications, automate processes, and design user interfaces using drag- and-drop functionality. It is ideal for users without extensive programming knowledge.

\* SAP HANA Cloud (C): While SAP HANA Cloud is a powerful database and application platform, it is not a development tool for creating custom applications.

\* SAP Cloud Portal Service (D): SAP Cloud Portal Service is used to create and manage digital portals, not for developing custom applications.
