Being anxious for the Chrome-Enterprise-Administrator exam ahead of you? Have a look of our Chrome-Enterprise-Administrator training engine please. Presiding over the line of our practice materials over ten years, our experts are proficient as elites who made our Chrome-Enterprise-Administrator learning questions, and it is their job to officiate the routines of offering help for you. All points are predominantly related with the exam ahead of you. You will find the exam is a piece of cake with the help of our Chrome-Enterprise-Administrator Study Materials.

Google Chrome-Enterprise-Administrator Exam Syllabus Topics:

Topic	Details
Topic 1	• Manage Chrome Enterprise in the Cloud: This section of the exam measures skills of a Cloud Systems Administrator and focuses on preparing and configuring environments for Chrome cloud management. Candidates must demonstrate how to verify domains, use admin roles, configure organizational structures, deploy enrollment tokens, enable reporting, and maintain Chrome using the Google Admin console.
Topic 2	• Chrome Updates: This section of the exam measures skills of a Chrome IT Policy Analyst and addresses the various update methods available for Chrome. It includes selecting the right update strategy for different business and security needs, managing compliance across platforms, and adapting update methods based on environmental changes or risks.
Topic 3	• Chrome Enterprise Management Fundamentals: This section of the exam measures skills of a Chrome Device Administrator and covers the foundational elements of managing Chrome in an enterprise. It includes understanding how policies are applied and resolved, differentiating managed browsers from profiles, and describing how policies work. It also covers Chrome's built-in security features, how extensions are used and deployed, and how the release cycle and channels are managed.
Topic 4	• Chrome Extensions: This section of the exam measures skills of an Endpoint Security Manager and involves managing Chrome extension policies. It includes designing extension management strategies, handling extension exemptions, creating approval workflows, and assessing extensions for their risk and compliance with business continuity requirements.

Topic 5	• Analyze Chrome Data: This section of the exam measures skills of a Chrome Data Analyst and focuses on using the Google Admin console to view, analyze, and troubleshoot browser data. It includes reviewing reports, diagnosing browser or update issues, investigating performance problems, and identifying security risks based on log events and Chrome activity.

Google Chrome-Enterprise-Administrator Dumps PDF- Easiest Preparation Method [2026]

Getting a Google Chrome-Enterprise-Administrator trusted certification is a way to prove your expertise and show you that you are ready all the time to take the additional responsibilities. The ExamPrepAway Chrome-Enterprise-Administrator certification exam assists you to climb the corporate ladder easily and helps you to achieve your professional career objectives. With the ExamPrepAway Chrome-Enterprise-Administrator Certification Exam you can get industry prestige and a significant competitive advantage.

Google Professional Chrome Enterprise Administrator Certification Exam Sample Questions (Q38-Q43):

NEW QUESTION # 38
Which percentage of Chrome is recommended during Beta before general availability'?

- A. 2%
- B. 5%
- C. 10%
- D. 1%

Answer: B

Explanation:
While the exact percentage isn't explicitly stated in the provided material, industry best practices for software deployment, including browser updates, recommend testing in a Beta environment with a representative but limited subset of users before a full rollout. A common recommendation for Beta testing is around 5% of the user base. This provides sufficient feedback and issue detection without impacting the majority of users.

NEW QUESTION # 39
An external entity is conducting a penetration test on an organization's Chrome Browser environment They report that a significant number of Manifest V2 (MV2) extensions are installed none of which are critical to business operations IT leadership has requested either block or upgrade How should an administrator proceed?

- A. Auto-upgrade the extensions from MV2 to MV3
- B. Configure the Manifest V2 availability policy
- C. Configure the installation mode to reflect removed for each extension ID
- D. Collect the extension IDs and configure an installation policy of block

Answer: B

Explanation:
Given that the MV2 extensions are not critical, and the requirement is to either block or upgrade, the most direct and efficient approach is to configure the "Manifest V2 availability" policy. This policy allows administrators to control the usage of Manifest V2 extensions, including blocking them entirely or allowing them until a specified date. Option A involves manually collecting and blocking each extension, which is less efficient. Option C ("removed") is not a standard installation mode policy. Option D is not a policy that an administrator can directly configure; the upgrade to MV3 is a developer-driven process.

NEW QUESTION # 40

Where can information about all of the profiles associated with a browser be found*?

- **A. Managed browsers detail**
- B. Chrome log events
- C. Managed devices
- D. Chrome Insights report

Answer: A

Explanation:

The "Managed browsers detail" page in the Google Admin console provides specific information about individual managed Chrome browser instances. This includes details about the profiles associated with that browser, such as the signed-in users and their management status. Chrome log events might contain some profile-related information but are more focused on actions. The "Managed devices" section primarily focuses on ChromeOS devices. The "Chrome Insights report" provides a high-level overview rather than detailed profile information for a specific browser instance.

NEW QUESTION # 41

An administrator is modifying a policy at the top-level organizational unit (OU), and there is an OU below that should not accept this modification What can the administrator do to be certain of this*?

- A. Set policy precedence to Child > Parent
- B. Turn off inheritance for all policies
- **C. Set the policy to locally applied at the child OU**
- D. Set the policy to locally applied at the parent OU

Answer: C

Explanation:

To prevent a child OU from inheriting a policy set at a parent OU, the administrator needs to configure the policy within the child OU itself and set its inheritance status to "Locally applied." This explicitly overrides the inherited policy from the parent with a specific setting for the child OU. Setting it to locally applied at the parent would not prevent inheritance. Turning off inheritance entirely might not be desired for other policies, and "Child > Parent" is the default precedence when inheritance is enabled.

NEW QUESTION # 42

A company has Chrome browser settings applied via a ChromeOS user policy. The Chrome administrator needs to deploy a new setting that will override the existing ChromeOS user setting if there is a conflict What should the administrator use?

- A. Chrome component updates
- B. Chrome Flags
- C. Enterprise Default policy
- **D. Machine Cloud level policy**

Answer: D

Explanation:

To override a ChromeOS user policy, the administrator should deploy a policy at the **Machine Cloud level**. Machine-level policies have a higher precedence than user-level policies on ChromeOS devices.
"Enterprise Default" is a general policy level and might not override user settings. Chrome Flags are experimental features and not intended for policy management. Chrome component updates manage specific browser components, not policy settings.

NEW QUESTION # 43

......

The passing rate is the best test for quality of our Chrome-Enterprise-Administrator study materials. And we can be very proud to tell you that the passing rate of our Chrome-Enterprise-Administrator Exam Questions is almost 100%.
